TO: Each Supervisor

FROM:  Mitchell H. Katz, M.D.
Director

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF PROGRESS, HOSPITAL OPERATIONS, AND OTHER ISSUES RELATED TO THE TRANSITION TO THE NEW LAC+USC MEDICAL CENTER – PROGRESS REPORT #82**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of September 2012.

Mitchell H. Katz, M.D.
Director

Hal F. Yee, Jr., M.D., Ph.D.
Chief Medical Officer

Christina R. Ghaly, M.D.
Deputy Director, Strategic Planning

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of September was 585 out of 676 licensed beds, an estimated 84% utilization rate (86% occupancy). The census for Medical/Surgical units was an estimated 94% utilization rate (96% occupancy) for September 2012.

Emergency Department (ED) Indicators

Attachment #1 demonstrates increase in key indicators such as Median ED Boarding, Average Length of Stay (ALOS), and Dangerously Overcrowding. ED Wait Time and Left Without Being Seen (LWBS) for this period remained the same. There was an increase in the number of patients transferred out.

To ensure access to high-quality, patient-centered, cost-effective health care to Los Angeles County residents through direct services at DHS facilities and through collaboration with community and university partners.

The Dangerously Overcrowding Level Comparison for this period was 25.6%, compared to 10% in August 2012. Since the last report to the Board, two additional nurses have been hired, for a total of 20 nurses. Four nurses already had ED experience; 15 nurses started the ED Nurse Training Program on September 25, 2012; and one nurse will start the next ED Nurse Training Program in April 2013.

If you have any questions or need additional information please contact me or Pete Delgado, LAC+USC Chief Executive Officer, at (323) 409-2800.

Fifth District

TO: Each Supervisor

FROM:  Mitchell H. Katz, M.D.
Director

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF PROGRESS,
HOSPITAL OPERATIONS, AND OTHER ISSUES RELATED
TO THE TRANSITION TO THE NEW LAC+USC MEDICAL
CENTER – PROGRESS REPORT #83**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of October 2012.

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of October was 572 out of 676 licensed beds, an estimated 83% utilization rate (85% occupancy). The census for Medical/Surgical units was an estimated 92% utilization rate (94% occupancy) for October 2012.

Emergency Department (ED) Indicators

Attachment #1 demonstrates decrease in key indicators such as Median ED Boarding, ED Wait Time, Left Without Being Seen (LWBS), and Dangerously Overcrowding. Average Length of Stay (ALOS) for this period remained the same. There was a decrease in the number of patients transferred out.

The Dangerously Overcrowding Level Comparison for this period was 4% compared to 25.6% in September 2012.

If you have any questions or need additional information, please contact me or Dr. Christina Ghaly, Interim LAC+USC Chief Executive Officer, at (323) 409-2800.

<p>2a. Median Emergency Department Boarding Time (EDBT)</p> <p>*Harris Rodde Indicator</p>	<p>Boarding Time: Time from MD Admit time (effective date and time of pre-admit) to time the patient actually leaves the ED en route to assigned bed (effective date and time of the ED disposition).</p> <p>Calculation: The middle value in the set of individual boarding times for the month arranged in increasing order. If there is an even number of values, then the median is the average of the middle two values.</p> <p>Source of Data: Affinity</p> <p>Target: Less than 7 hours.</p>	<p style="text-align: center;">Median EDBT</p> <table border="1"> <caption>Median EDBT Data (hr:min)</caption> <thead> <tr> <th>Month</th> <th>Adult</th> <th>Peds</th> <th>Total</th> </tr> </thead> <tbody> <tr><td>Jul '10</td><td>8:44</td><td>2:16</td><td>5:48</td></tr> <tr><td>Aug '10</td><td>10:26</td><td>1:59</td><td>8:44</td></tr> <tr><td>Sep '10</td><td>11:32</td><td>2:14</td><td>9:08</td></tr> <tr><td>Oct '10</td><td>7:57</td><td>2:20</td><td>6:27</td></tr> <tr><td>Nov '10</td><td>7:41</td><td>2:07</td><td>6:18</td></tr> <tr><td>Dec '10</td><td>9:37</td><td>2:10</td><td>6:39</td></tr> <tr><td>Jan '11</td><td>11:22</td><td>2:08</td><td>5:33</td></tr> <tr><td>Feb '11</td><td>7:27</td><td>2:23</td><td>8:36</td></tr> <tr><td>Mar '11</td><td>7:09</td><td>2:04</td><td>6:09</td></tr> <tr><td>Apr '11</td><td>7:28</td><td>1:57</td><td>6:03</td></tr> <tr><td>May '11</td><td>5:19</td><td>2:00</td><td>6:16</td></tr> <tr><td>Jun '11</td><td>5:40</td><td>1:50</td><td>4:40</td></tr> <tr><td>Jul '11</td><td>7:43</td><td>1:54</td><td>4:59</td></tr> <tr><td>Aug '11</td><td>4:23</td><td>1:54</td><td>4:06</td></tr> <tr><td>Sep '11</td><td>6:06</td><td>2:03</td><td>5:09</td></tr> <tr><td>Oct '11</td><td>6:16</td><td>2:06</td><td>5:26</td></tr> <tr><td>Nov '11</td><td>10:08</td><td>1:49</td><td>8:25</td></tr> <tr><td>Dec '11</td><td>9:04</td><td>2:06</td><td>7:28</td></tr> <tr><td>Jan '12</td><td>6:41</td><td>2:07</td><td>5:45</td></tr> <tr><td>Feb '12</td><td>6:18</td><td>2:12</td><td>6:18</td></tr> <tr><td>Mar '12</td><td>7:11</td><td>2:26</td><td>5:20</td></tr> <tr><td>Apr '12</td><td>5:57</td><td>2:07</td><td>6:10</td></tr> <tr><td>May '12</td><td>4:13</td><td>2:04</td><td>5:08</td></tr> <tr><td>Jun '12</td><td>7:08</td><td>1:57</td><td>3:42</td></tr> <tr><td>Jul '12</td><td>5:37</td><td>2:01</td><td>6:06</td></tr> <tr><td>Aug '12</td><td>7:47</td><td>2:10</td><td>4:58</td></tr> <tr><td>Sep '12</td><td>4:53</td><td>2:05</td><td>6:08</td></tr> <tr><td>Oct '12</td><td>4:53</td><td>2:13</td><td>4:18</td></tr> </tbody> </table> <p>Oct '12 data is Preliminary data</p>	Month	Adult	Peds	Total	Jul '10	8:44	2:16	5:48	Aug '10	10:26	1:59	8:44	Sep '10	11:32	2:14	9:08	Oct '10	7:57	2:20	6:27	Nov '10	7:41	2:07	6:18	Dec '10	9:37	2:10	6:39	Jan '11	11:22	2:08	5:33	Feb '11	7:27	2:23	8:36	Mar '11	7:09	2:04	6:09	Apr '11	7:28	1:57	6:03	May '11	5:19	2:00	6:16	Jun '11	5:40	1:50	4:40	Jul '11	7:43	1:54	4:59	Aug '11	4:23	1:54	4:06	Sep '11	6:06	2:03	5:09	Oct '11	6:16	2:06	5:26	Nov '11	10:08	1:49	8:25	Dec '11	9:04	2:06	7:28	Jan '12	6:41	2:07	5:45	Feb '12	6:18	2:12	6:18	Mar '12	7:11	2:26	5:20	Apr '12	5:57	2:07	6:10	May '12	4:13	2:04	5:08	Jun '12	7:08	1:57	3:42	Jul '12	5:37	2:01	6:06	Aug '12	7:47	2:10	4:58	Sep '12	4:53	2:05	6:08	Oct '12	4:53	2:13	4:18

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF PROGRESS,
HOSPITAL OPERATIONS, AND OTHER ISSUES RELATED
TO THE TRANSITION TO THE NEW LAC+USC MEDICAL
CENTER – PROGRESS REPORT #84**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of November 2012.

Mitchell H. Katz, M.D.
Director

Deputy Director, Strategic Planning

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of November was 534 out of 676 licensed beds, an estimated 77% utilization rate (79% occupancy). The census for Medical/Surgical units was an estimated 85% utilization rate (87% occupancy) for November 2012.

Emergency Department (ED) Indicators

Attachment #1 demonstrates decrease in key indicators such as Median ED Boarding, ED Wait Time and Left Without Being Seen (LWBS), Average Length of Stay (ALOS), and Dangerously Overcrowded. There was a decrease in the number of patients transferred out.

To ensure access to high-quality, patient-centered, cost-effective health care to Los Angeles County residents through direct services at DHS facilities and through collaboration with community and university partners.

The Dangerously Overcrowded Level Comparison for this period was 0%, compared to 4% in October 2012. ED and hospital overcrowding decreased secondary to implementation of new operational policies and procedures, including those related to the implementation of the TAR-free process using InterQual, a evidence-based tool used to help determine whether acute care hospitalization is medically indicated. The implementation of InterQual has resulted in fewer patients being admitted and more rapid discharge of admitted patients with corresponding improvement in operational indicators (e.g., ED Boarding Time) and a decline in inpatient census.

If you have any questions or need additional information, please contact me or Christina R. Ghaly, Interim Chief Executive Officer, LAC+USC, at (323) 409-2800.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Nov 2012

Indicator #1 – Trends in Average Daily Census and Hospital Operations Metrics

1b.
Occupancy Rate
LAC+USC
Medical Center

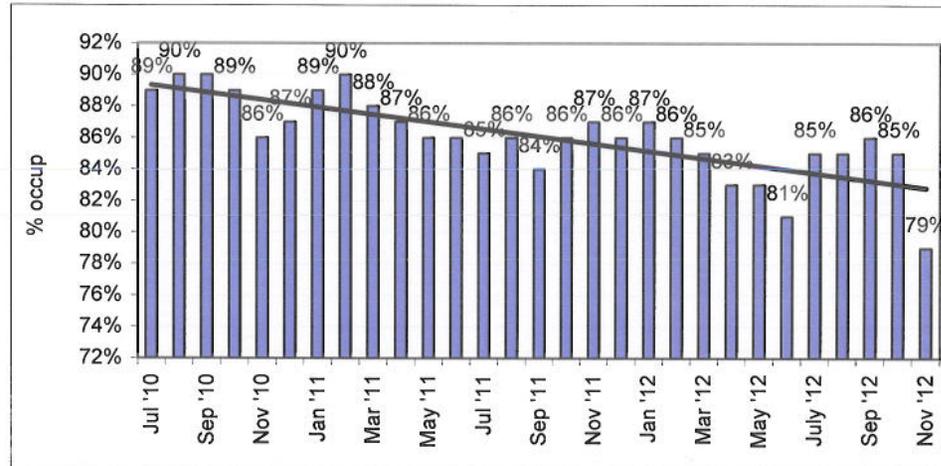

Definition:
 A measure of the usage of the licensed beds during the reporting period that is derived by dividing the patient days in the reporting period by the licensed bed days in the reporting period.

Calculation:
 The total number of admitted inpatients at 12:00 AM midnight, including women in labor, may include normal newborns and psychiatric inpatients divided by licensed or budgeted beds.

Source of Data:
 Affinity

Target:
 95%

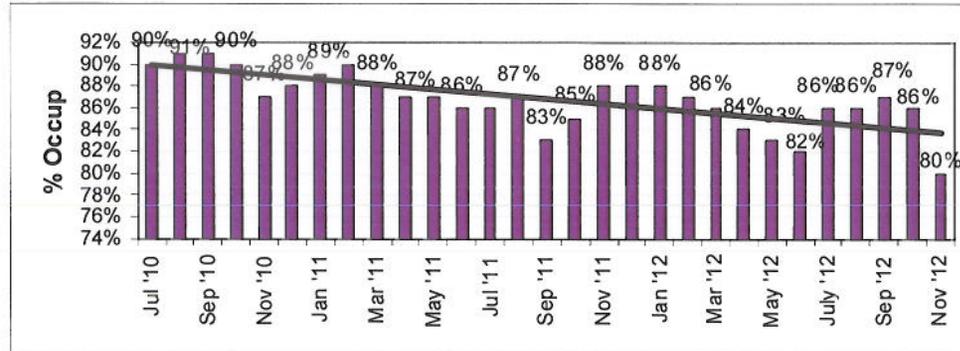

1. Medical Center Licensed Occupancy Rate (excluding Newborns) =
 Med Center Census - Newborns / 600

For comparison, occupancy rates reported in the old facility were reported including newborns and were based on budgeted beds.

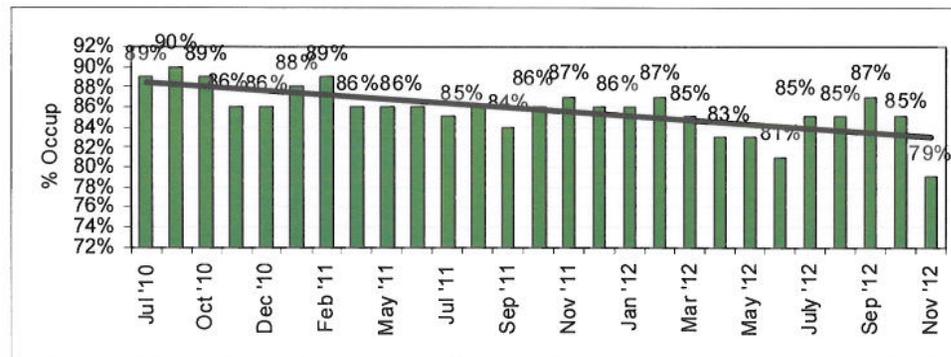

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Nov 2012

Medical Center Licensed Occupancy Rate (including Newborns) Med Center Census/600

Healthcare Network Budgeted Occupancy

Med Center Census + Newborns + Psych Hosp Census / 676

Medical Center = New Facility

Healthcare Network = New Facility + Psychiatric Hospitals

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Nov 2012

Indicator #2 - Emergency Department Metrics

2a. Median Emergency Department Boarding Time (EDBT)

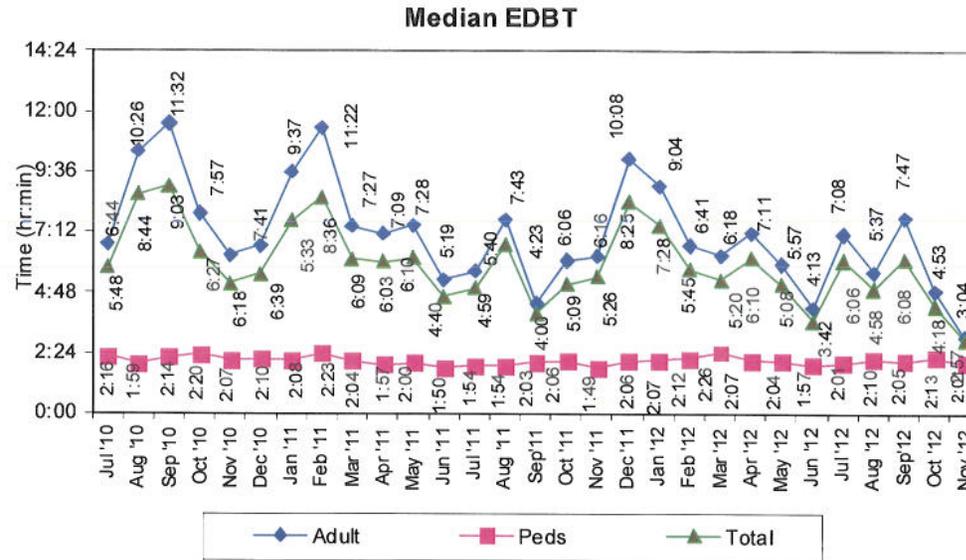

Boarding Time:
 Time from MD Admit time (effective date and time of pre-admit) to time the patient actually leaves the ED en route to assigned bed (effective date and time of the ED disposition).

Calculation:
 The middle value in the set of individual boarding times for the month arranged in increasing order. If there is an even number of values, then the median is the average of the middle two values.

Source of Data:
 Affinity

Target:
 Less than 7 hours.

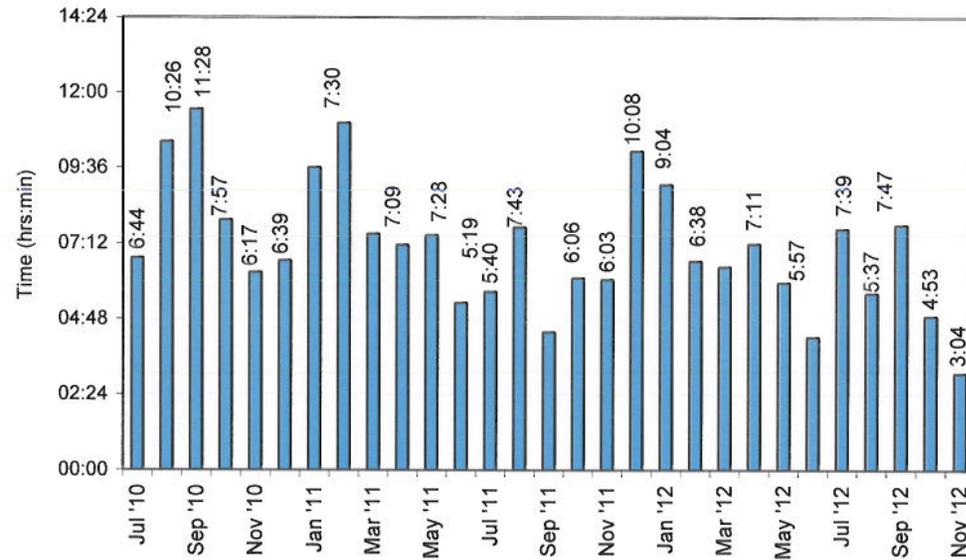

***Harris Rodde Indicator**

Nov'12 data is Preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Nov 2012

Median Boarding Time (Adult)*

Nov '12 data is Preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Nov 2012

Indicator #2 - Emergency Department Metrics

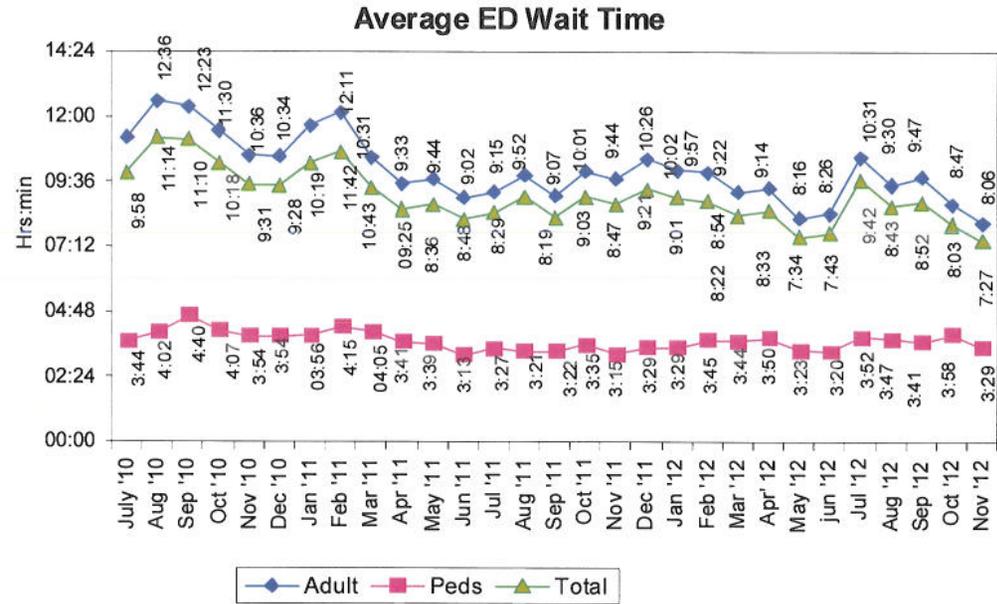

2b. ED Wait Time

ED Wait Time:
 Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

Definition:
 Sum of all wait time values during the monthly reporting period divided by the total number of values.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Adult Wait Time : *Excludes Psych, Pediatric, Observation Unit, and Jail patients

Total ED Wait time: *Excludes Psych, Observation Unit, and Jail

Nov'12 data is Preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Nov 2012

Indicator #2 - Emergency Department Metrics

2c.
Left Without Being Seen (LWBS)

***Harris Rodde Indicator**

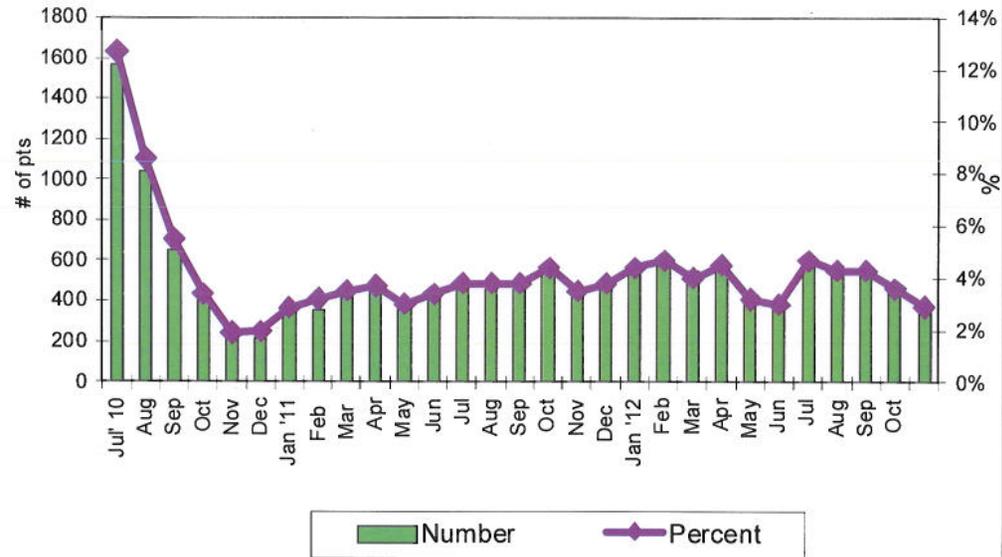

LWBS:
 The total number of patients who left the ED without being seen by a physician reported as a percentage of all ED visits.

Calculation:
 The total number of patients who left the ED without being seen divided by the total number of ED patient visits on a monthly basis.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Left Without Being Seen

Nov '12 data is Preliminary data

LAC+USC Medical Center
 Operational Monitoring Report
 Reporting Period Nov 2012

Indicator #2 - Emergency Department Metrics

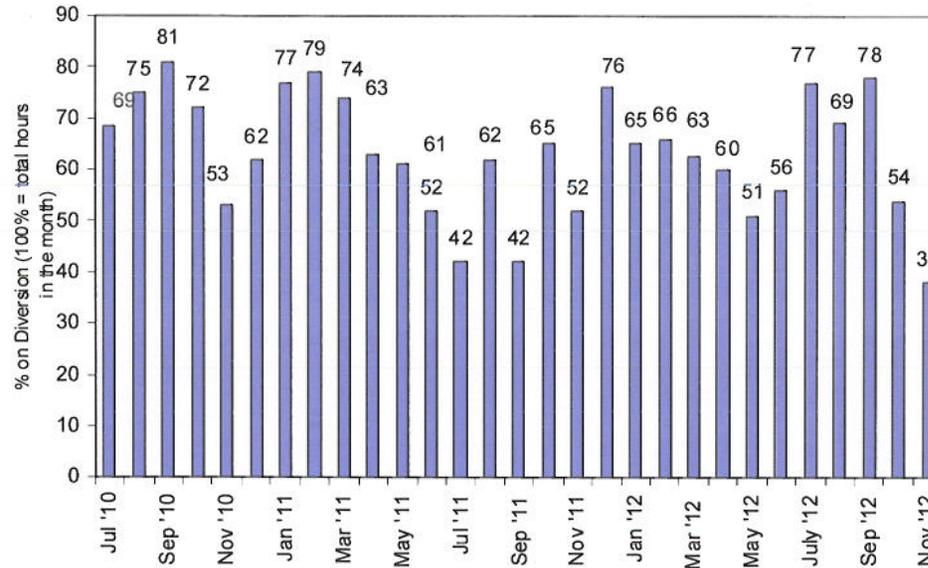

**2d.
ED
Diversion**

ED Diversion:
 A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:
 The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
 ReddiNet

Diversion of ALS Units due to ED Saturation

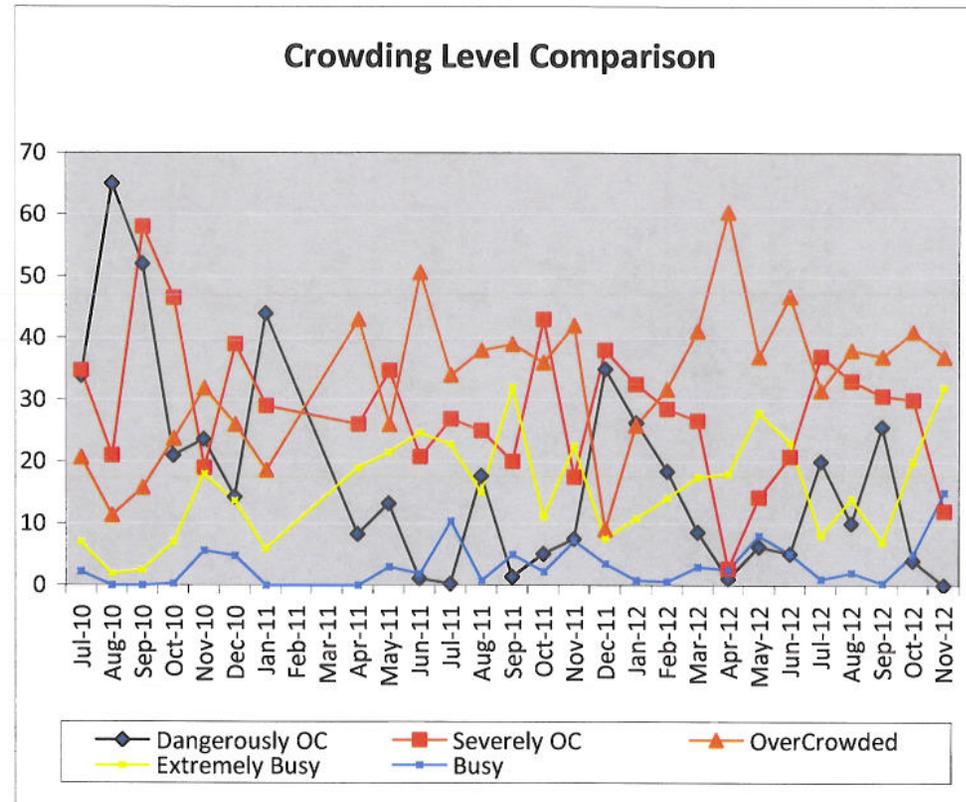

This is slightly lower than the before move diversion history which generally ranged between 50-60%.

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

Indicator #3 – Trends for Patient Diversions and Transfers & #4 – Transfers to Rancho Los Amigos Metrics

**3. & 4.
Rancho
Los
Amigos
Hospital
(RLAH)
Transfers**

Transfers:
The volume of patients transferred to RLAH for acute hospitalization from the Emergency Department and from Inpatient Units.

Data Source:
Manual record keeping.

Cancelled category includes patients whose condition changed leading to higher level of care or discharge home.

Month of No '12

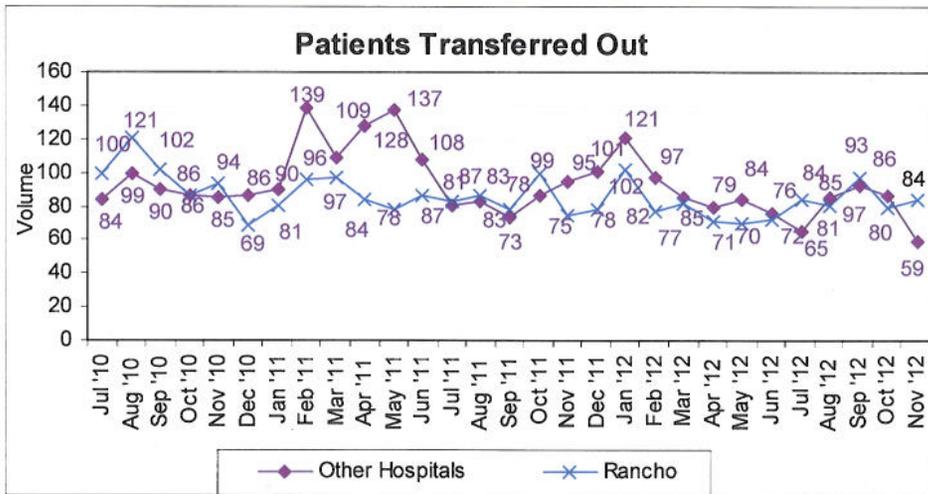

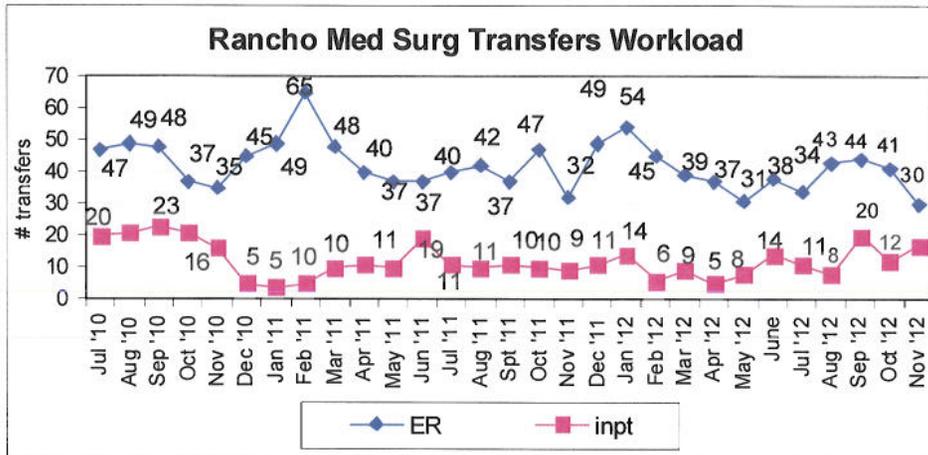

Referrals from ER:

	Med/Surg	Acute Stroke	Total

Indicator #5 – Harris Rodde Indicators

5.

Average Length of Stay (ALOS)

***Harris Rodde Indicator**

LOS:

The difference between discharge date and the admission date or 1 if the 2 dates are the same.

Total LOS:

Calculation:

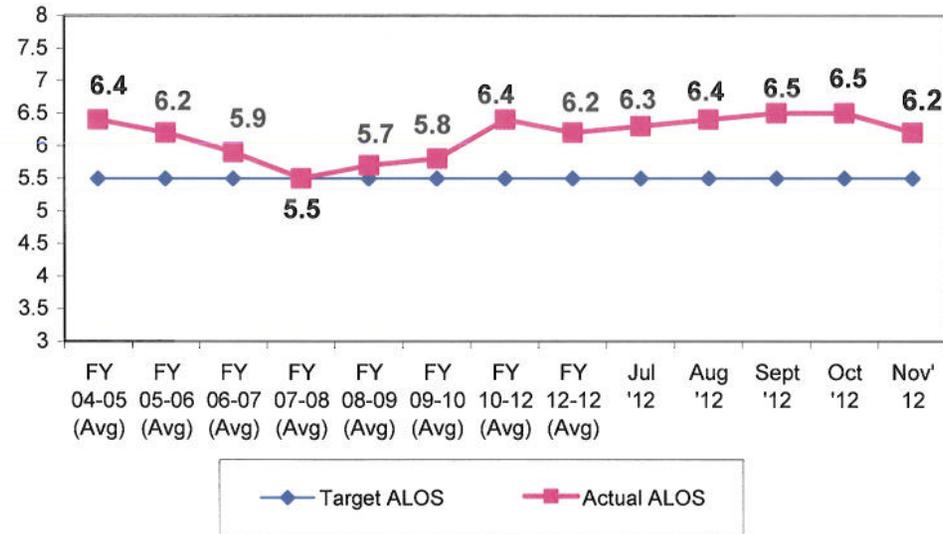

ALOS is the arithmetic mean calculated by dividing the Total LOS by the Total # of discharges in the monthly reporting period, rounded off to one decimal place.

Source of Data:

Affinity

Target: <5.5 days

Average length of Stay

***Healthcare Network ALOS** - Preliminary data pending Auditor-Controller validation

Overall trend in ALOS for the 2-year period prior to the move reduced to a low range of 4.7 – 5.5 days in 2008. Immediately prior to the move, the ALOS increased as the lower acuity patients were transferred to other facilities. This trend may continue depending on number of transfers.

*As of July 2010 with the consolidation of Ingleside and Hawkins, all psychiatric services are now included. There were 3 patients discharged in November, 2012 with LOS > 100. Without the effect of these 3, ALOS would have been 6.0 rather than 6.2

Reporting Period Dec 2012

Indicator #2 - Emergency Department Metrics

2d.

ED
Diversion

ED Diversion:

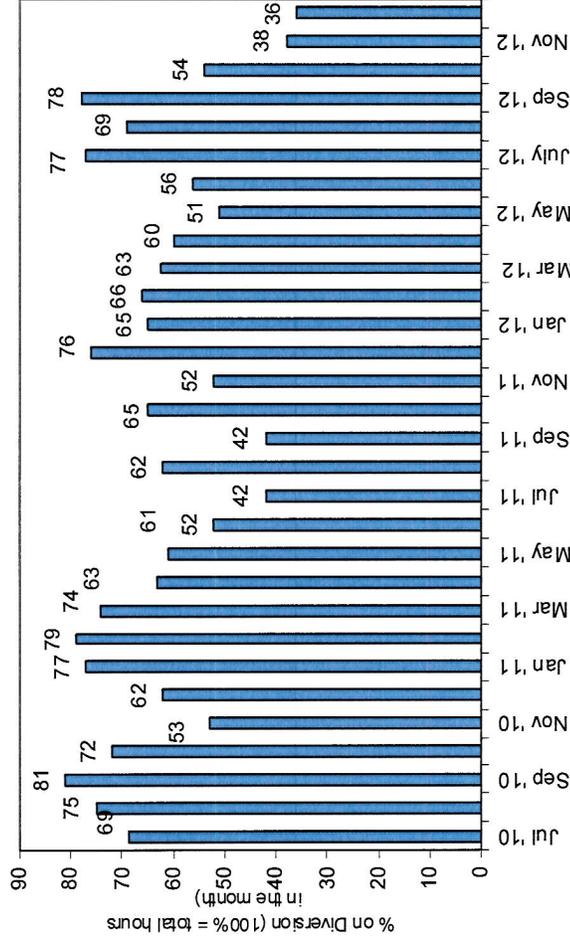

A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:

The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
ReddiNet

Diversion of ALS Units due to ED Saturation

This is slightly lower than the before move diversion history which generally ranged between 50-60%.

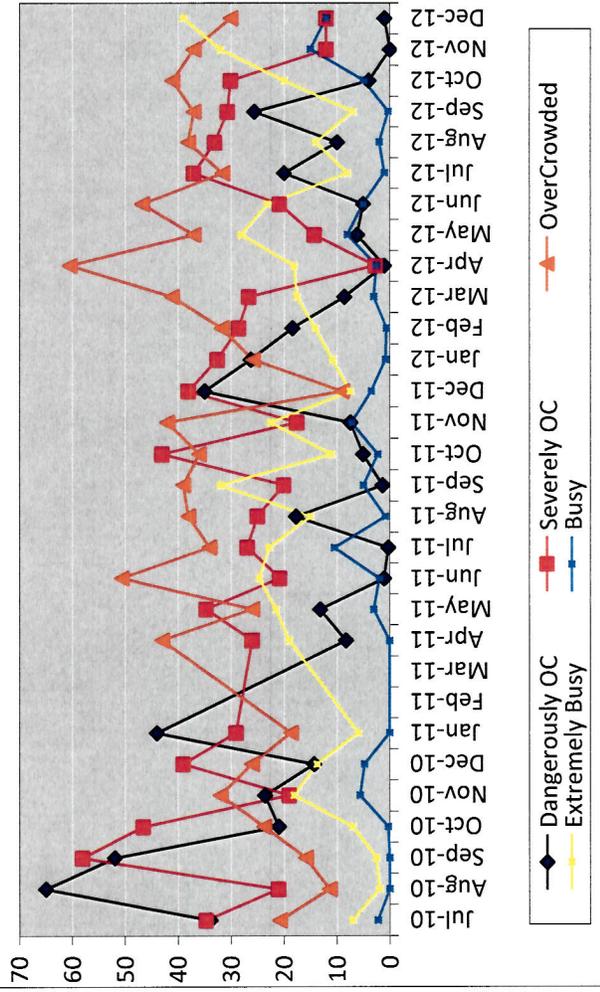

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
 - When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital.
- Therefore, ambulances often arrive while "on diversion".

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF PROGRESS,
HOSPITAL OPERATIONS, AND OTHER ISSUES RELATED
TO THE TRANSITION TO THE NEW LAC+USC MEDICAL
CENTER – PROGRESS REPORT #85**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of January 2013.

Mitchell H. Katz, M.D.
Director

Hal F. Yee, Jr., M.D., Ph.D.
Chief Medical Officer

Christina R. Ghaly, M.D.
Deputy Director, Strategic Planning

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of December was 573 out of 676 licensed beds, an estimated 83% utilization rate (85% occupancy). The census for Medical/Surgical units was an estimated 93% utilization rate (95% occupancy) for January 2013.

Emergency Department (ED) Indicators

The attachment demonstrates an increase in the key indicator Average Length of Stay (ALOS), Median ED Boarding, ED Wait Time, Left Without Being Seen (LWBS), and Dangerously Overcrowding for this period. There was also an increase in the number of patients transferred out. The Dangerously Overcrowding Level Comparison for this period was 33%, compared to 1% in December 2012. However, this increase is similar to Dangerously Overcrowding levels observed in January 2012 at 26.3% and January 2011 at 44%. The drastic change in the key indicators from November and December 2012 to January 2013 can potentially be attributed to the increased presentation of influenza like illness towards the end of the month.

If you have any questions or need additional information please contact me or Christina Ghaly, LAC+USC Interim Chief Executive Officer, at (323) 409-2800.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Jan 2013

Indicator #1 – Trends in Average Daily Census and Hospital Operations Metrics

1b.
Occupancy Rate
LAC+USC Medical Center

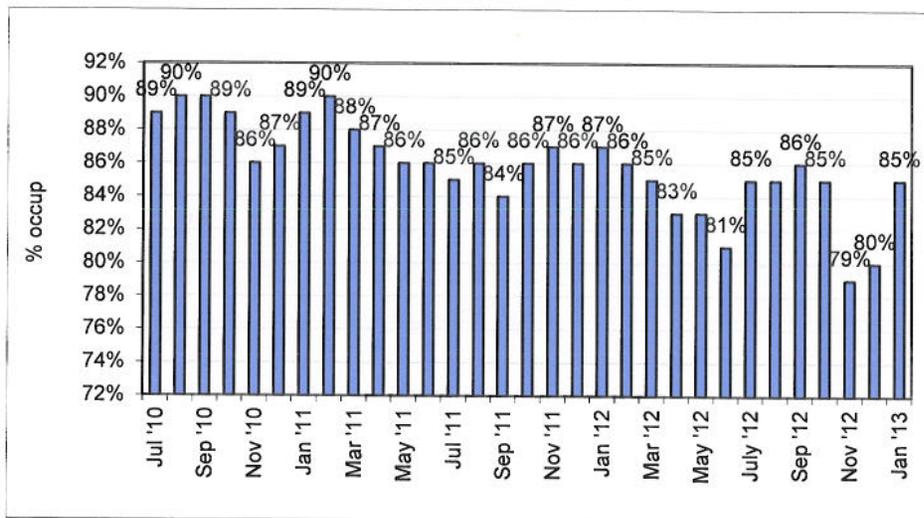

Definition:
 A measure of the usage of the licensed beds during the reporting period that is derived by dividing the patient days in the reporting period by the licensed bed days in the reporting period.

Calculation:
 The total number of admitted inpatients at 12:00 AM midnight, including women in labor, may include normal newborns and psychiatric inpatients divided by licensed or budgeted beds.

Source of Data:
 Affinity

Target:
 95%

1. Medical Center Licensed Occupancy Rate (excluding Newborns) =
 Med Center Census - Newborns / 600

For comparison, occupancy rates reported in the old facility were reported including newborns and were based on budgeted beds.

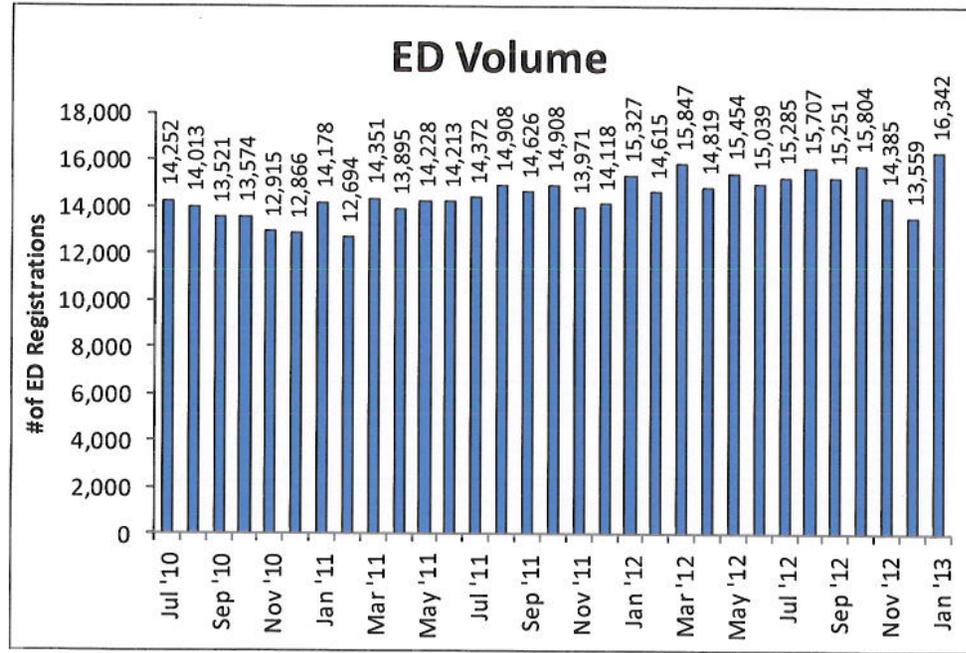

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Jan 2013

Indicator #2 - Emergency Department Metrics

2a.
ED
Volume

ED Volume:
 Measured by total number of Emergency Department patient registrations.

Source of Data:
 Affinity

The annual total ED Volume for FY 10-11 was 164,700 which increased to 178,004 in FY 11-12. If the current increase in ED monthly volume is maintained, the annual total ED volume for FY 12-13 will surpass the FY 11-12 amount.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Jan 2013

2b. Median Emergency Department Boarding Time (EDBT)

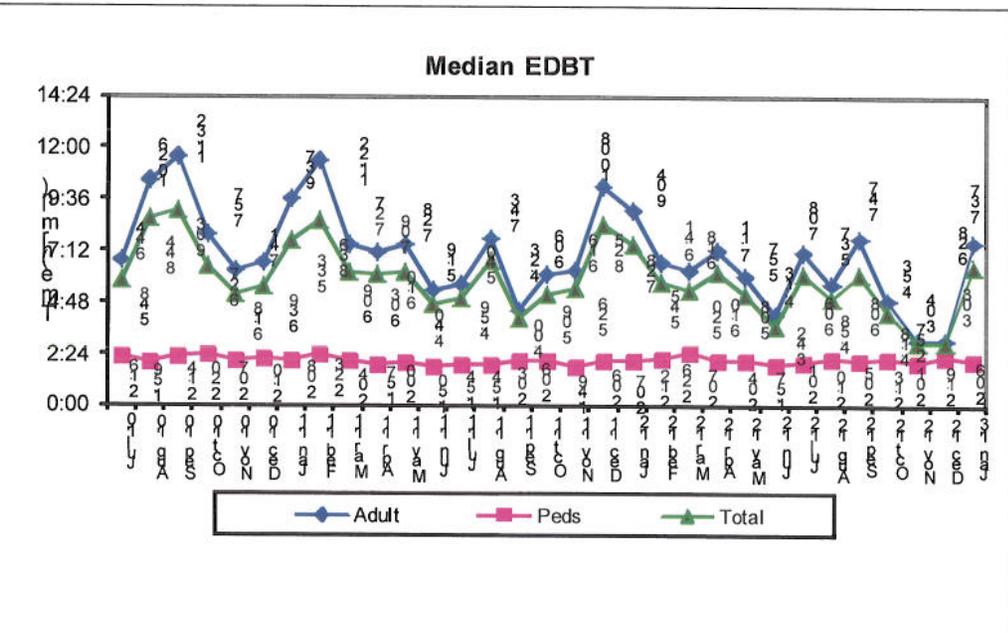

***Harris Rodde Indicator**

Boarding Time: Time from MD Admit time (effective date and time of pre-admit) to time the patient actually leaves the ED en route to assigned bed (effective date and time of the ED disposition).

Calculation: The middle value in the set of individual boarding times for the month arranged in increasing order. If there is an even number of values, then the median is the average of the middle two values.

Source of Data: Affinity

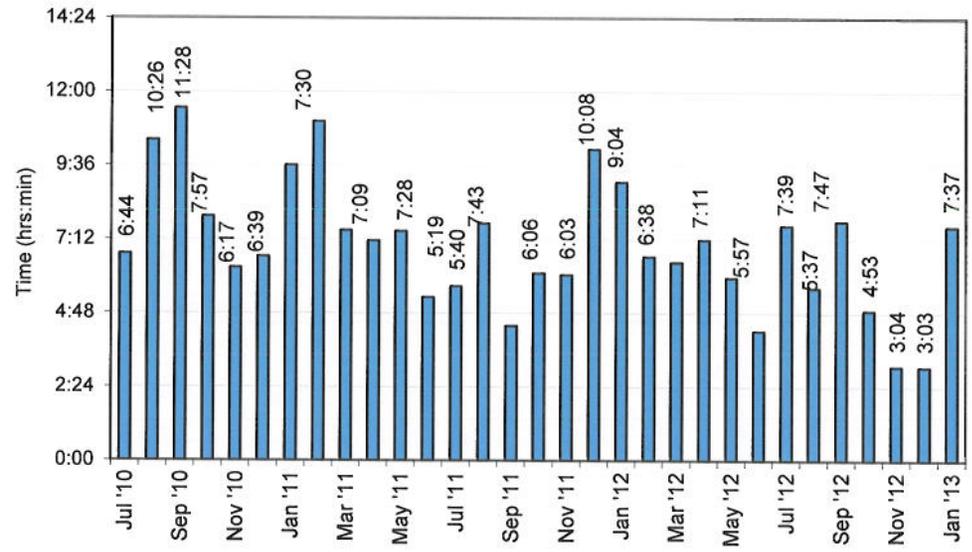

Target: Less than 7 hours.

Jan '13 data is Preliminary data

Operational Monitoring Report
Reporting Period Jan 2013

Indicator #2 - Emergency Department Metrics

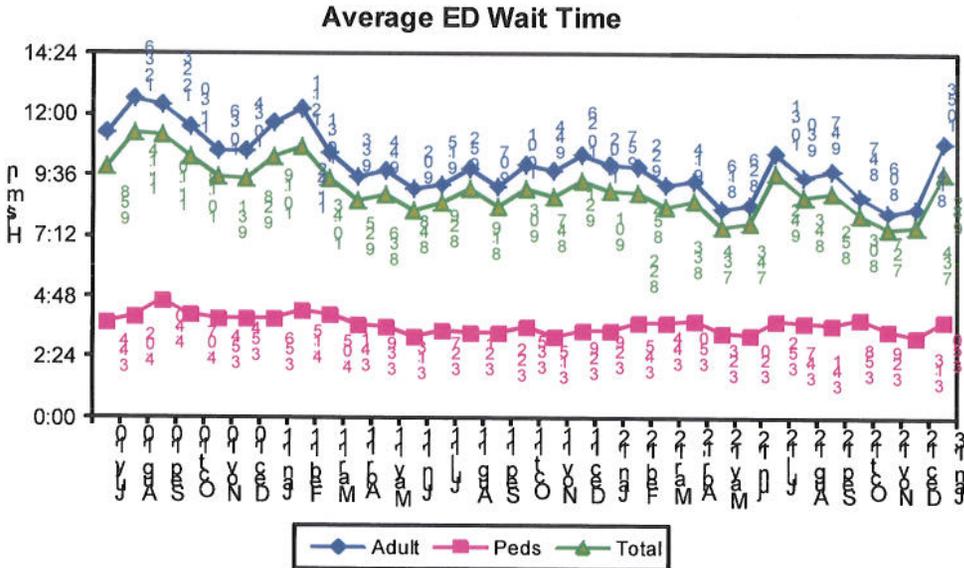

2c. ED Wait Time

ED Wait Time:
 Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

Definition:
 Sum of all wait time values during the monthly reporting period divided by the total number of values.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Adult Wait Time : *Excludes Psych, Pediatric, Observation Unit, and Jail patients

Total ED Wait time: *Excludes Psych, Observation Unit, and Jail

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Jan 2013

Indicator #2 - Emergency Department Metrics

2d.
Left Without Being Seen (LWBS)

***Harris Rodde Indicator**

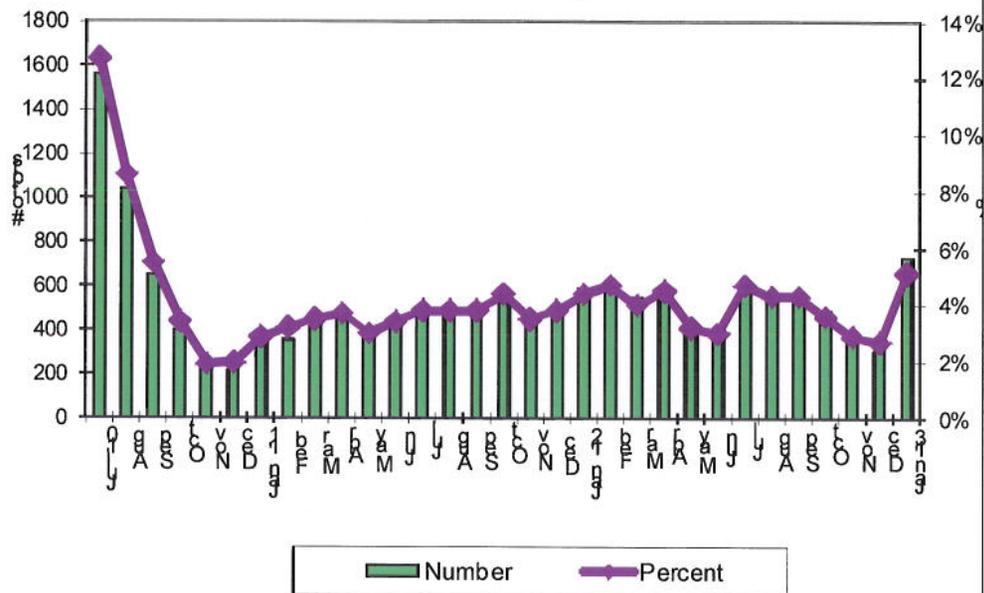

LWBS:
 The total number of patients who left the ED without being seen by a physician reported as a percentage of all ED visits.

Calculation:
 The total number of patients who left the ED without being seen divided by the total number of ED patient visits on a monthly basis.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Left Without Being Seen

Indicator #2 - Emergency Department Metrics

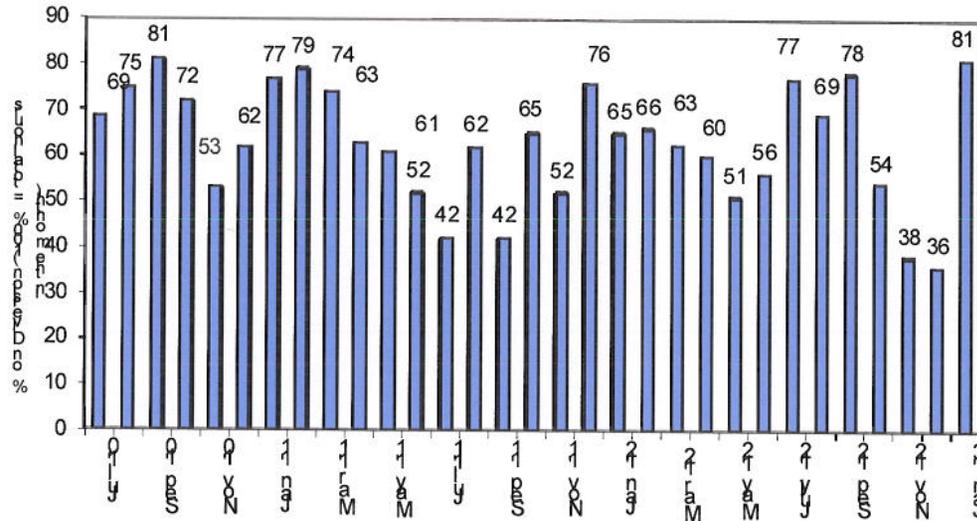

**2e.
ED
Diversion**

ED Diversion:
 A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:
 The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
 ReddiNet

Diversion of ALS Units due to ED Saturation

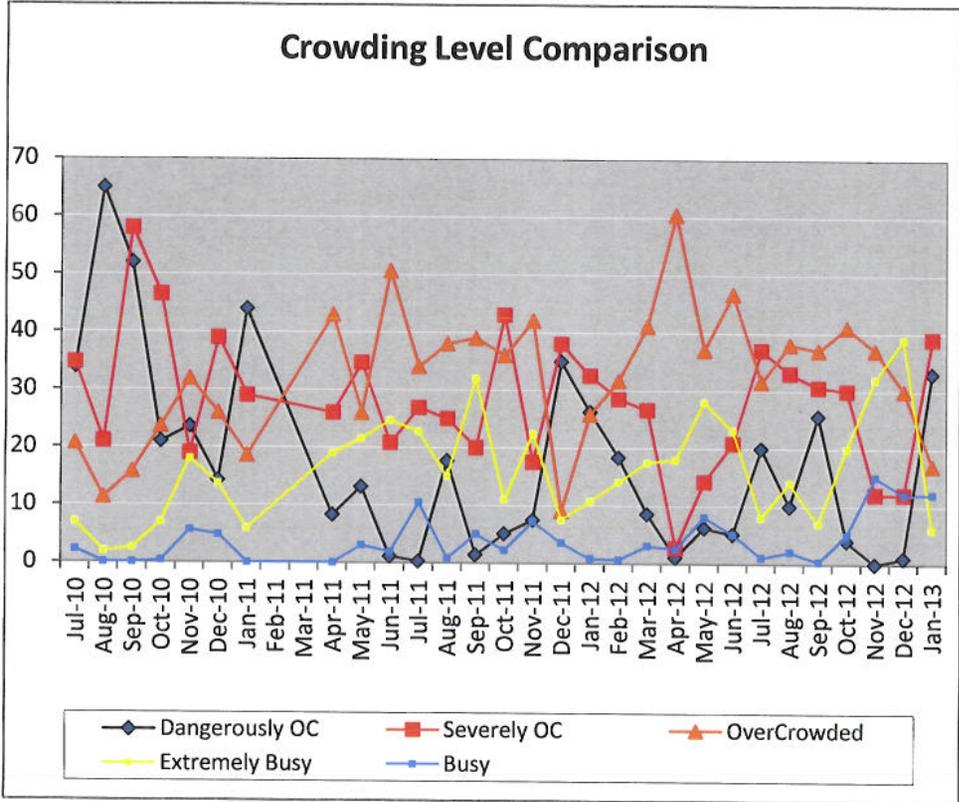

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

Indicator #5 – Harris Rodde Indicators

5.

Average Length of Stay (ALOS)

***Harris Rodde Indicator**

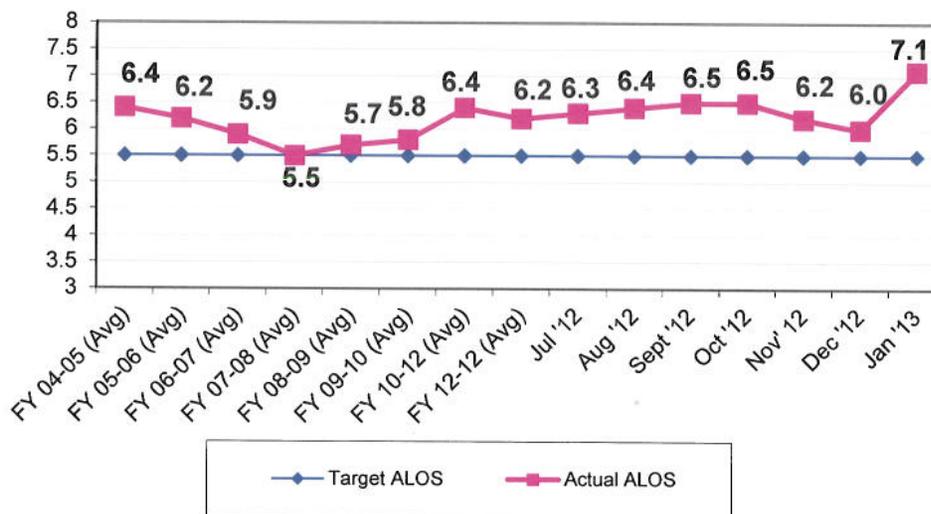

LOS:
The difference between discharge date and the admission date or 1 if the 2 dates are the same.

Total LOS:

Calculation:
ALOS is the arithmetic mean calculated by dividing the Total LOS by the Total # of discharges in the monthly reporting period, rounded off to one decimal place.

Source of Data:
Affinity
Target: <5.5 days

Average length of Stay

***Medical Center (New Facility + Psychiatric Hospital) ALOS - Preliminary data pending Auditor-Controller validation**

Overall trend in ALOS for the 2-year period prior to the move reduced to a low range of 4.7 – 5.5 days in 2008. Immediately prior to the move, the ALOS increased as the lower acuity patients were transferred to other facilities. This trend may continue depending on number of transfers.

*As of July 2010 with the consolidation of Ingleside and Hawkins, all psychiatric services are now included. There were 9 patients discharged in January, 2013 with LOS > 100. Without the effect of these 9, ALOS would have been 6.5 rather than 7.1.

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF
PROGRESS, HOSPITAL OPERATIONS, AND OTHER
ISSUES RELATED TO THE TRANSITION TO THE NEW
LAC+USC MEDICAL CENTER – PROGRESS REPORT #86**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of February 2013.

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of February was 563 out of 676 licensed beds, an estimated 81% utilization rate (83% occupancy). The census for Medical/Surgical units was an estimated 91% utilization rate (93% occupancy) for February 2013.

Emergency Department (ED) Indicators

The attachment demonstrates a decrease in the following key indicators: Average Length of Stay (ALOS), Median ED Boarding, ED Wait Time, Left Without Being Seen (LWBS), and Dangerously Overcrowding for this period. There was also a decrease in the number of patients transferred out. The Dangerously Overcrowding Level Comparison for this period was 19%, compared to 33% in January 2013.

If you have any questions or need additional information, please contact me or Christina Ghaly, LAC+USC Interim Chief Executive Officer, at (323) 409-2800.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Feb 2013

Indicator #1 – Trends in Average Daily Census and Hospital Operations Metrics

1b. Occupancy Rate LAC+USC Medical Center

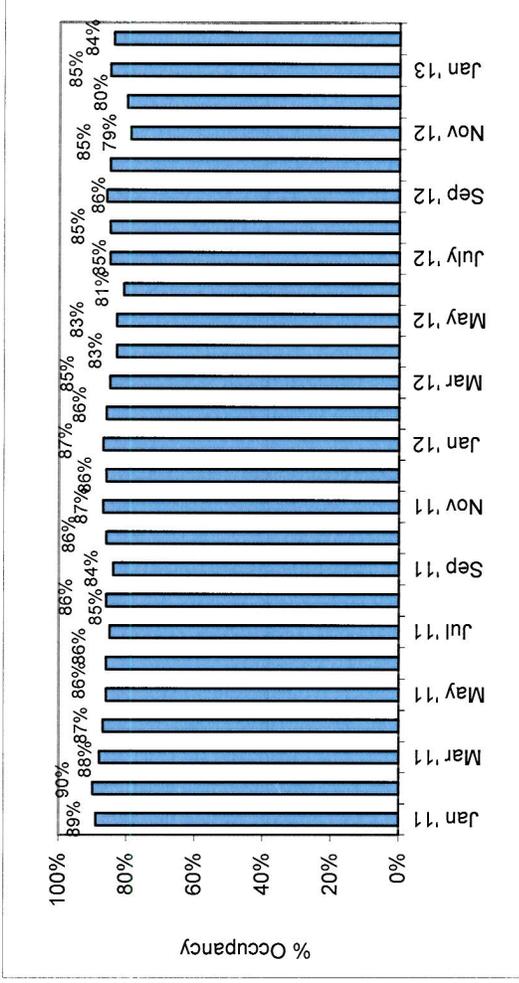

Definition:
A measure of the usage of the licensed beds during the reporting period that is derived by dividing the patient days in the reporting period by the licensed bed days in the reporting period.

Calculation:
The total number of admitted inpatients at 12:00 AM midnight, including women in labor, may include normal newborns and psychiatric inpatients divided by licensed or budgeted beds.

Source of Data:
Affinity

Target:
95%

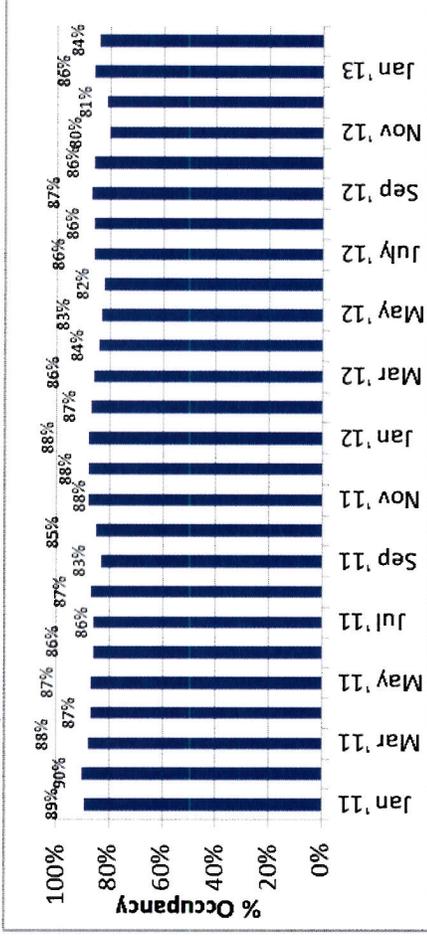

Medical Center Licensed Occupancy Rate (excluding Newborns) = **Med Center Census – Newborns / 600**

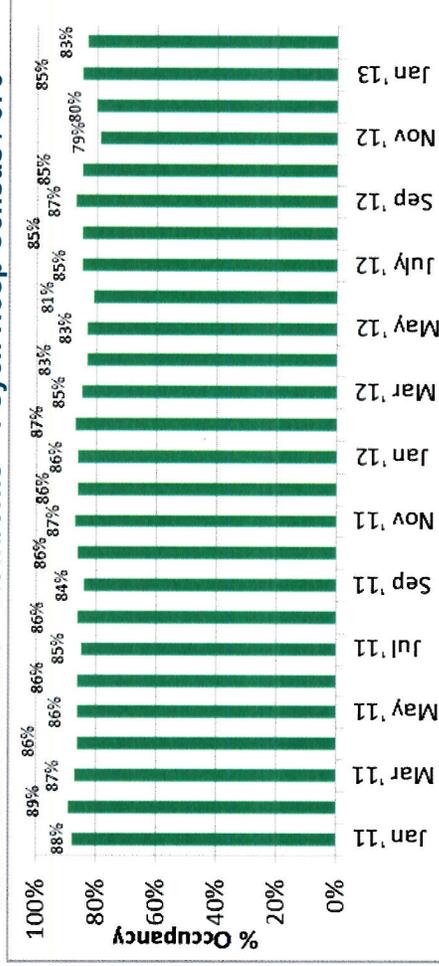

For comparison, occupancy rates reported in the old facility were reported including newborns and were based on budgeted beds.

LAC+USC Medical Center

Medical Center = New Facility + Psychiatric Hospital

LAC+USC Medical Center
 Operational Monitoring Report
 Reporting Period Feb 2013

Indicator #2 - Emergency Department Metrics

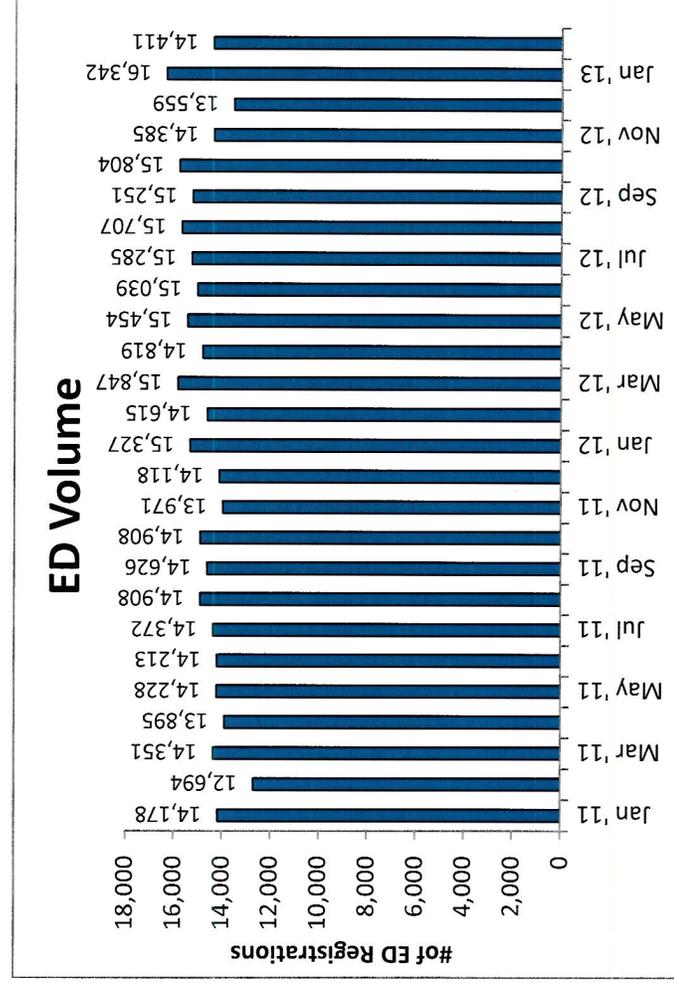

2a.

ED Volume

ED Volume:

Measured by total number of Emergency Department patient registrations.

Source of Data:
Affinity

The annual total ED Volume for FY 10-11 was 164,700 which increased to 178,004 in FY 11-12. If the current increase in ED monthly volume is maintained, the annual total ED volume for FY 12-13 will surpass the FY 11-12 amount.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Feb 2013

2b.
Median
Emergency
Department
Boarding
Time
(EDBT)

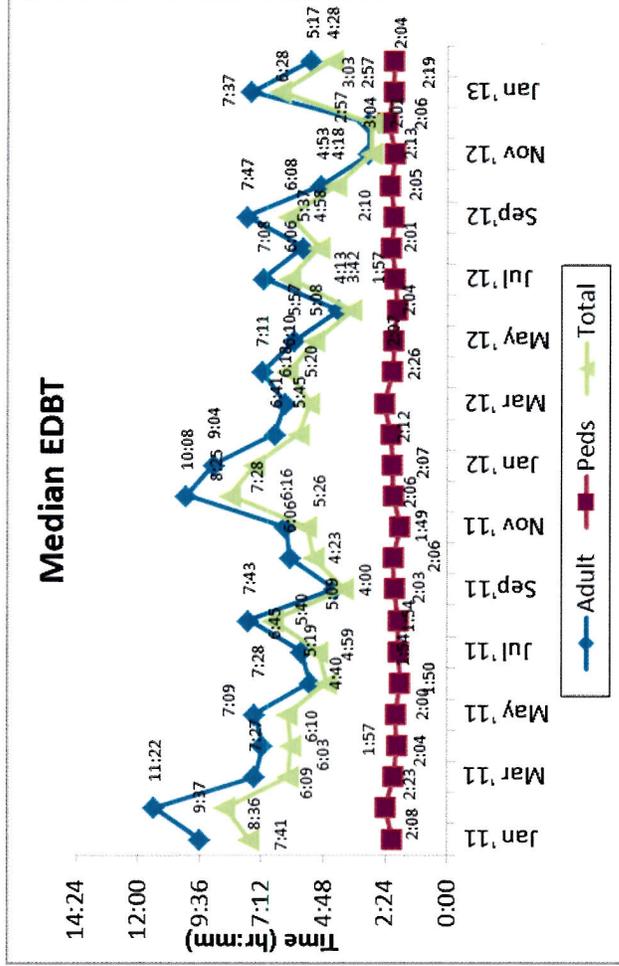

Boarding Time:
Time from MD Admit
time (effective date
and time of pre-admit)
to time the patient
actually leaves the
ED en route to
assigned bed
(effective date and
time of the ED
disposition).

Calculation:
The middle value in
the set of individual
boarding times for the
month arranged in
increasing order. If
there is an even
number of values,
then the median is the
average of the middle
two values.

Source of Data:
Affinity

Target:
Less than 7 hours.

Reporting Period Feb 2013

Indicator #2 - Emergency Department Metrics

2c.

ED Wait Time

ED Wait Time:
Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

Definition:

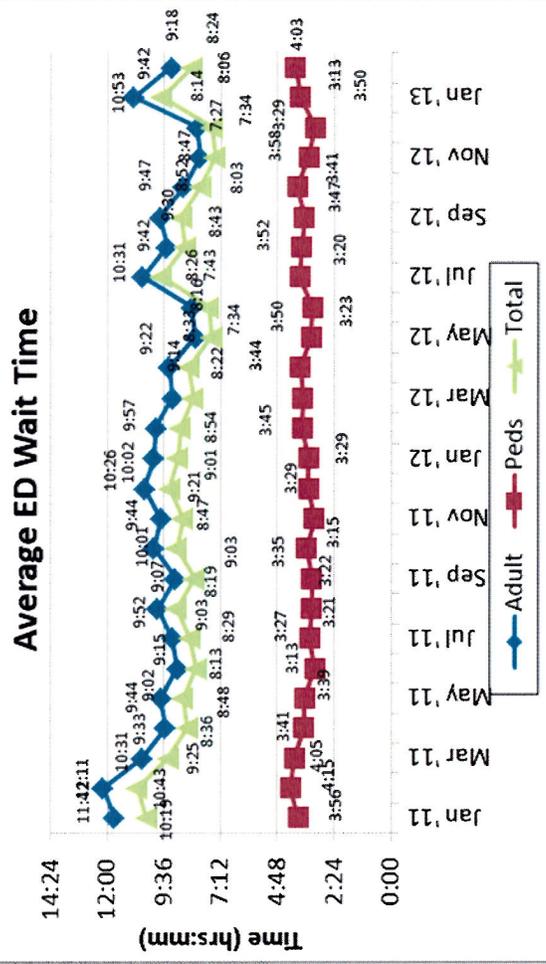

Sum of all wait time values during the monthly reporting period divided by the total number of values.

Source of Data:

Affinity

Target:

No target value.
Lower numbers are better.

Adult Wait Time : *Excludes Psych, Pediatric, Observation Unit, and Jail patients

Total ED Wait time: *Excludes Psych, Observation Unit, and Jail

Feb '13 data is Preliminary data

Indicator #2 - Emergency Department Metrics

2d.

Left Without Being Seen (LWBS)

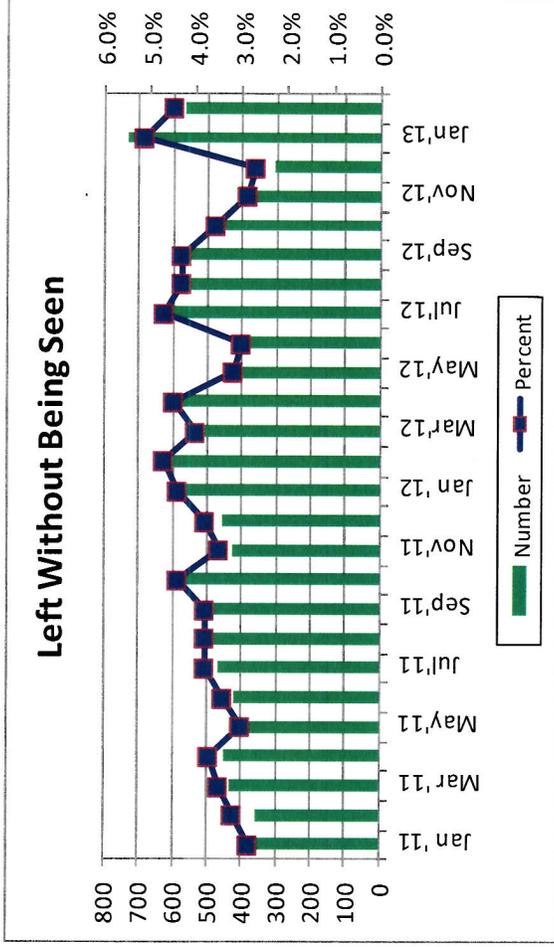

LWBS:
 The total number of patients who left the ED without being seen by a physician reported as a percentage of all ED visits.

***Harris Rodde Indicator**

Calculation:
 The total number of patients who left the ED without being seen divided by the total number of ED patient visits on a monthly basis.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Feb '13 data is Preliminary data

Indicator #2 - Emergency Department Metrics

2e.

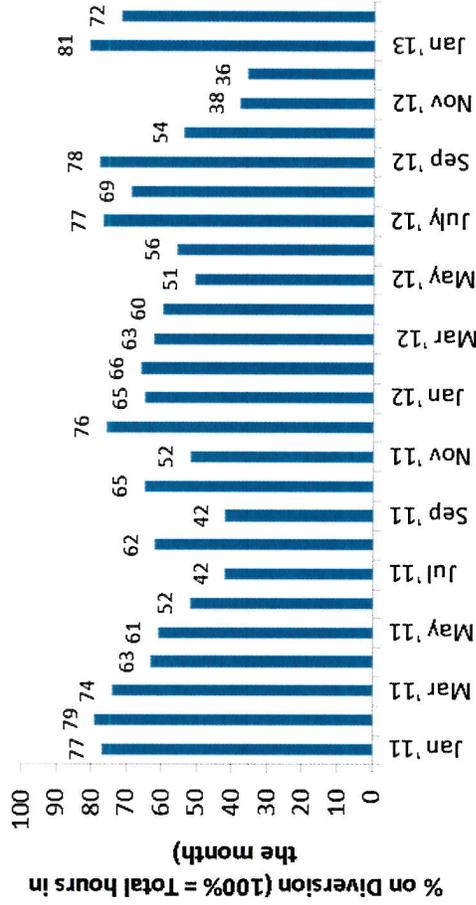

ED Diversion

ED Diversion:
 A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:
 The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
 ReddiNet

Diversion of ALS Units due to ED Saturation

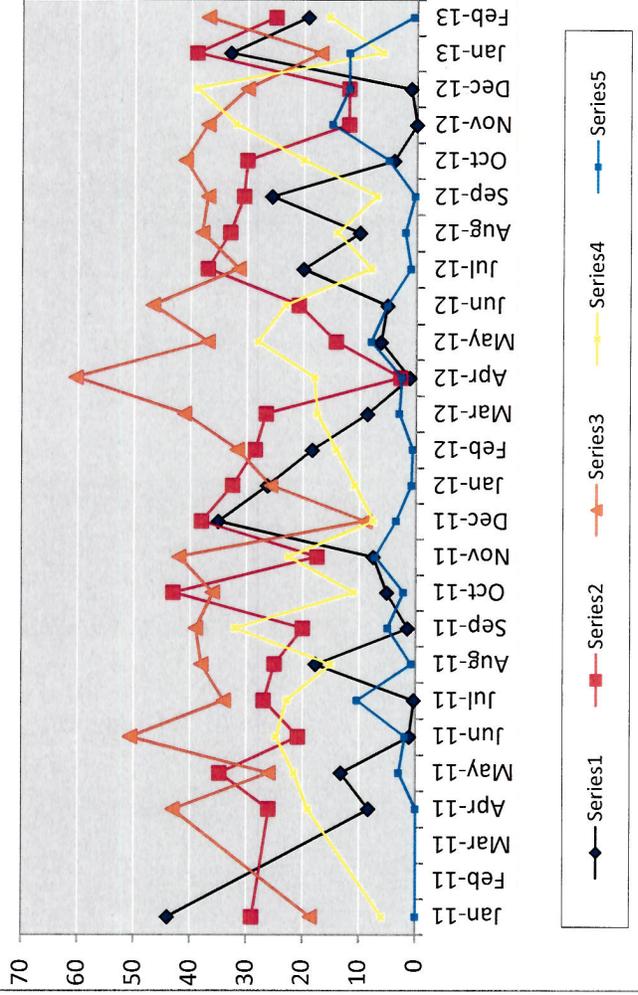

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period Feb 2013

Indicator #5 – Harris Rodde Indicators

5.

Average Length of Stay (ALOS)

LOS:
The difference between discharge date and the admission date or 1 if the 2 dates are the same.

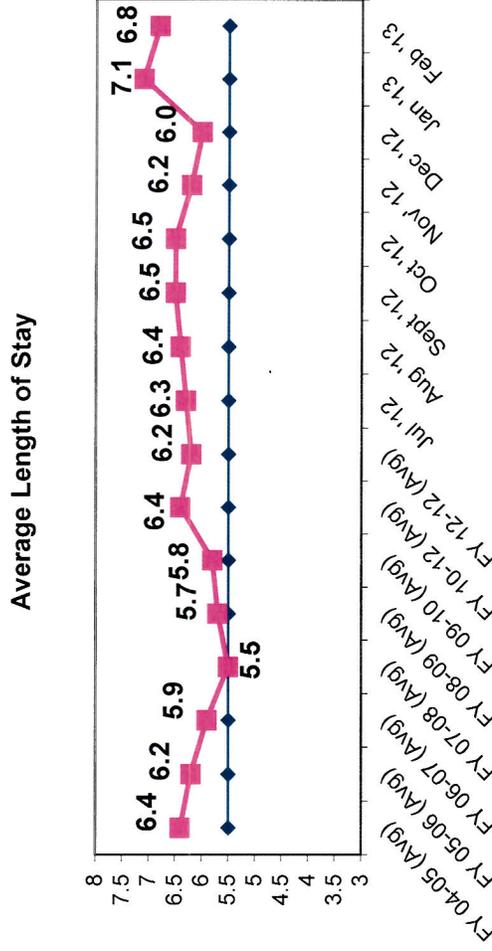

Total LOS:

Calculation:
ALOS is the arithmetic mean calculated by dividing the Total LOS by the Total # of discharges in the monthly reporting period, rounded off to one decimal place.

Source of Data:
Affinity

Target: <5.5 days

***Harris Rodde Indicator**

The increasing length of stay observed in January and February is largely attributed to the discharge of several patients with extended lengths of stay. In February 2013, these include 7 patients who were discharged with LOS > 100. Without the effect of these 7 patients, ALOS would have been 6.5 rather than 6.8. Preliminary data from the first half of March 2013 shows a reversal of this trend, with LOS at approximately 6.2.

*As of July 2010 with the consolidation of Ingleside and Hawkins, all psychiatric services are now included.

***Medical Center (New Facility + Psychiatric Hospital) ALOS - Preliminary**

Director

Hal F. Yee, Jr., M.D., Ph.D.
Chief Medical Officer

Christina R. Ghaly, M.D.
Deputy Director, Strategic Planning

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of March 2013.

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of March was 545 out of 676 licensed beds, an estimated 79% utilization rate (81% occupancy). The census for Medical/Surgical units was an estimated 89% utilization rate (91% occupancy) for March 2013.

Emergency Department (ED) Indicators

The attachment demonstrates a decrease in the following key indicators: Average Length of Stay (ALOS), Median ED Boarding, and Dangerously Overcrowding for this period. There was an increase in ED Wait Time, Left Without Being Seen (LWBS), and the number of patients transferred out. The Dangerously Overcrowding Level Comparison for this period was 11.6%, compared to 19.3% in February 2013.

If you have any questions or need additional information, please contact me or Dr. Christina Ghaly, LAC+USC Interim Chief Executive Officer, at (323) 409-2800.

Diversion**

ED Diversion:

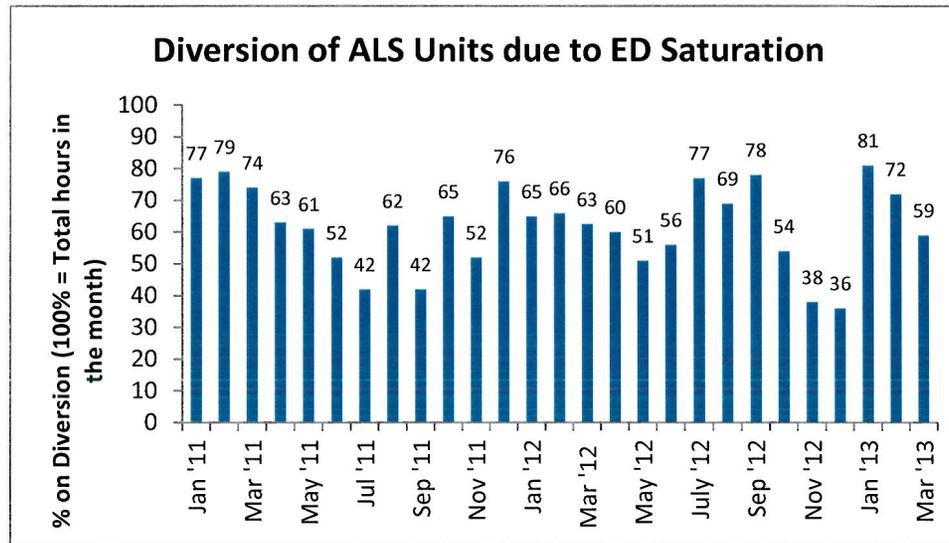

A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:

The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:

ReddiNet

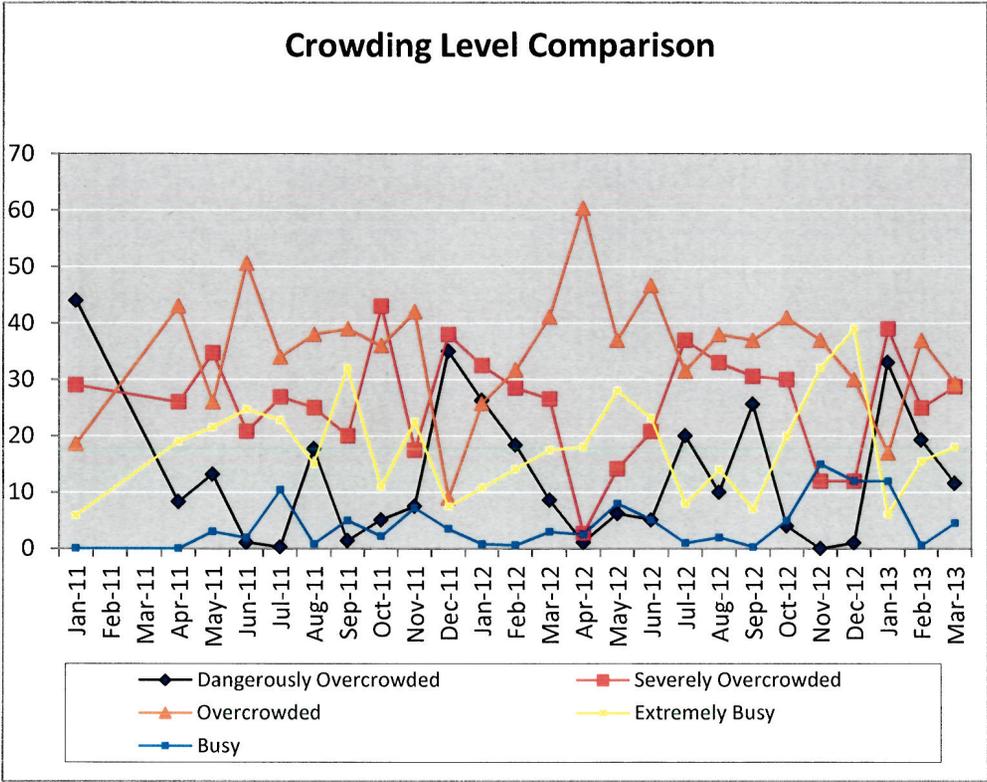

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

Indicator #5 – Harris Rodde Indicators

5.

Average Length of Stay (ALOS)

LOS:
 The difference between discharge date and the admission date or 1 if the 2 dates are the same.

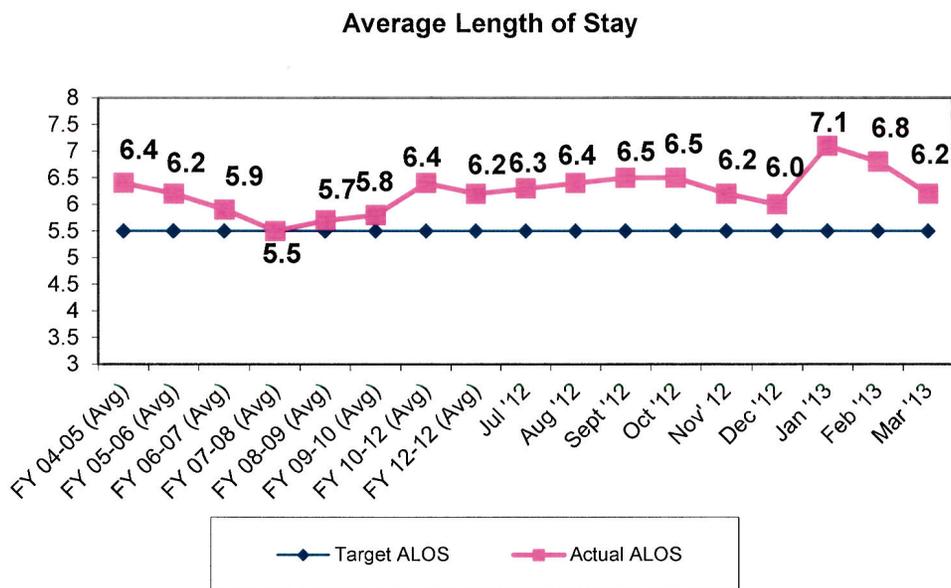

Total LOS:

Calculation:
 ALOS is the arithmetic mean calculated by dividing the Total LOS by the Total # of discharges in the monthly reporting period, rounded off to one decimal place.

***Harris Rodde Indicator**

Source of Data:
 Affinity

Target: <5.5 days

***Medical Center (New Facility + Psychiatric Hospital) ALOS - Preliminary data pending Auditor-Controller validation**

The increasing length of stay observed in January and February is largely attributed to the discharge of several patients with extended lengths of stay. In March 2013, these include 5 patients who were discharged with LOS > 100. Without the effect of these 5 patients, ALOS would have been 6.0 rather than 6.2.

*As of July 2010 with the consolidation of Ingleside and Hawkins, all psychiatric services are now included.

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF
PROGRESS, HOSPITAL OPERATIONS, AND OTHER
ISSUES RELATED TO THE TRANSITION TO THE NEW
LAC+USC MEDICAL CENTER – PROGRESS REPORT #88**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of April 2013.

Mitchell H. Katz, M.D.
Director

Hal F. Yee, Jr., M.D., Ph.D.
Chief Medical Officer

Christina R. Ghaly, M.D.
Deputy Director, Strategic Planning

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of April was 542 out of 676 licensed beds, an estimated 77% utilization rate (79% occupancy). The census for Medical/Surgical units was an estimated 86% utilization rate (88% occupancy) for April 2013.

Emergency Department (ED) Indicators

The attachment demonstrates a decrease in the following key indicators: average daily census (ADC), median ED boarding time, and the number of patients transferred out for this period. There was an increase in the rate of patients who left without being seen (LWBS). The Dangerously Overcrowding Level Comparison for this period remained the same as well as ED wait time.

If you have any questions or need additional information, please contact me or Dr. Christina Ghaly, LAC+USC Interim Chief Executive Officer, at (323) 409-2800.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: Apr 2013

Indicator #1 – Trends in Average Daily Census and Hospital Operations Metrics

1b.
Occupancy Rate
LAC+USC
Medical
Center

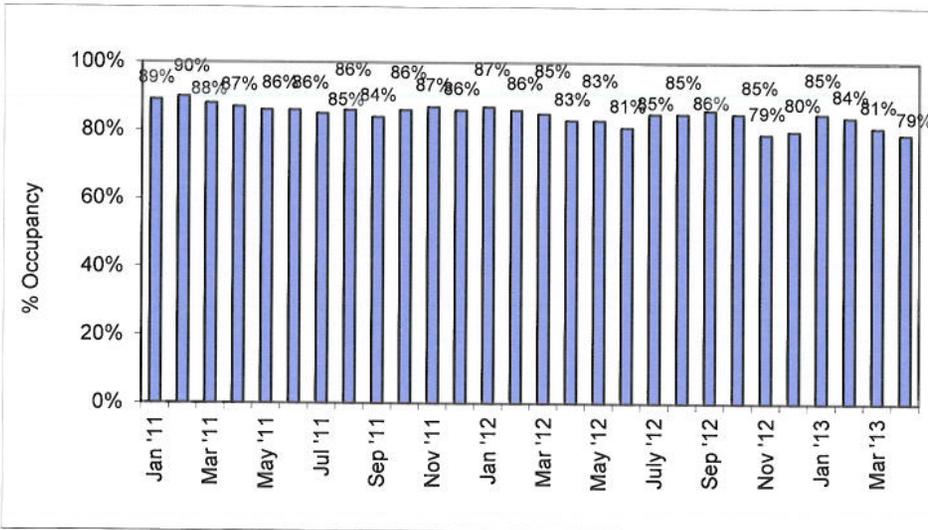

Definition:
 A measure of the usage of the licensed beds during the reporting period that is derived by dividing the patient days in the reporting period by the licensed bed days in the reporting period.

Calculation:
 The total number of admitted inpatients at 12:00 AM midnight, including women in labor, may include normal newborns and psychiatric inpatients divided by licensed or budgeted beds.

Source of Data:
 Affinity

Target:
 95%

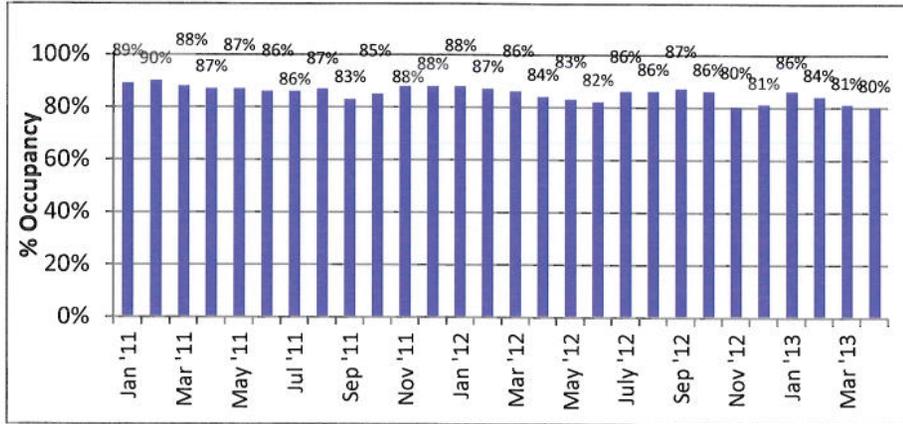

Medical Center Licensed Occupancy Rate (excluding Newborns) = **Med**
Center Census - Newborns / 600

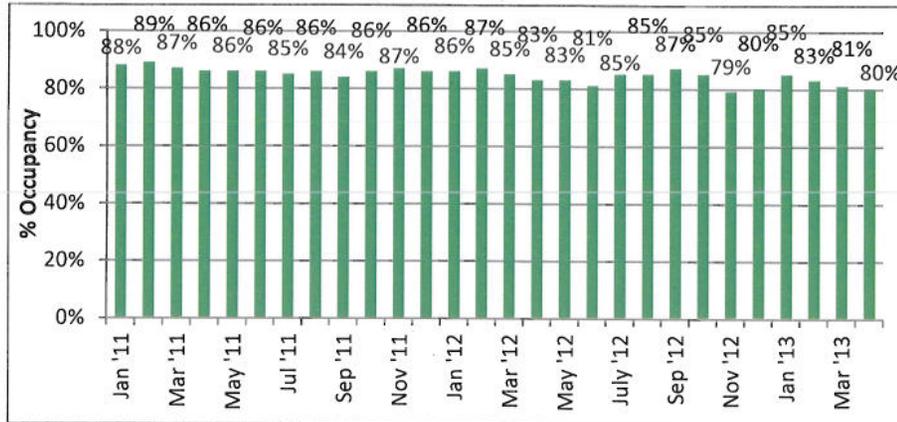

For comparison, occupancy rates reported in the old facility were reported including newborns and were based on budgeted beds.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: Apr 2013

Medical Center Licensed Occupancy Rate (including Newborns) Med Center Census/600

Medical Center Budgeted Occupancy Med Center Census + Newborns + Psych Hosp Census / 676

Medical Center = New Facility + Psychiatric Hospital

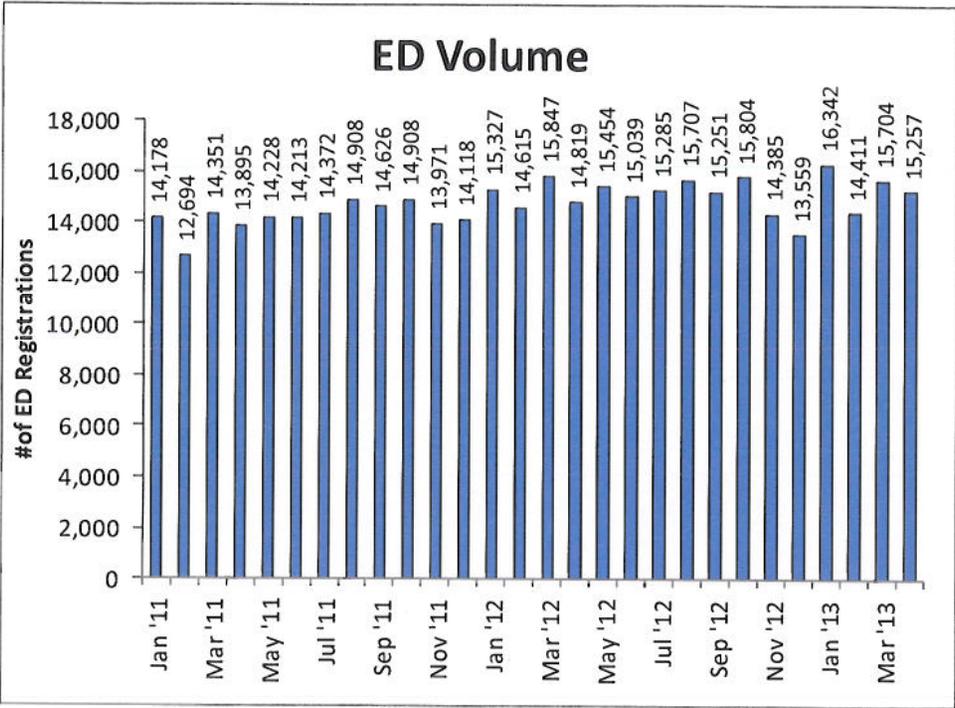

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: Apr 2013

Indicator #2 - Emergency Department Metrics

2a.
ED
Volume

ED Volume:
 Measured by total number of Emergency Department patient registrations.

Source of Data:
 Affinity

The annual total ED Volume for FY 10-11 was 164,700 which increased to 178,004 in FY 11-12. If the current increase in ED monthly volume is maintained, the annual total ED volume for FY 12-13 will surpass the FY 11-12 amount.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: Apr 2013

2b.
Median
Emergency
Department
Boarding
Time
(EDBT)

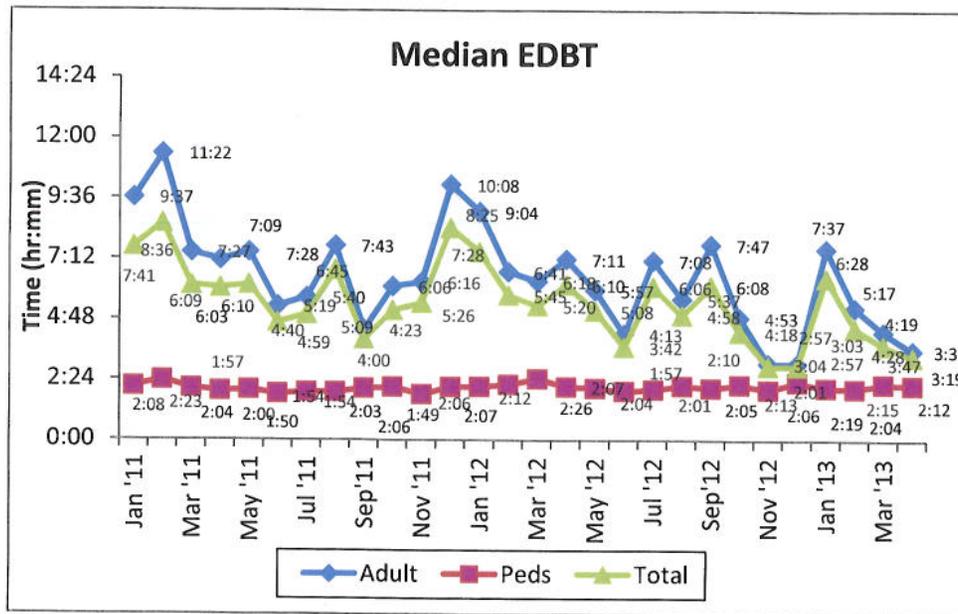

***Harris**
Rodde
Indicator

Boarding Time:
 Time from MD Admit time (effective date and time of pre-admit) to time the patient actually leaves the ED en route to assigned bed (effective date and time of the ED disposition).

Calculation:
 The middle value in the set of individual boarding times for the month arranged in increasing order. If there is an even number of values, then the median is the average of the middle two values.

Source of Data:
 Affinity

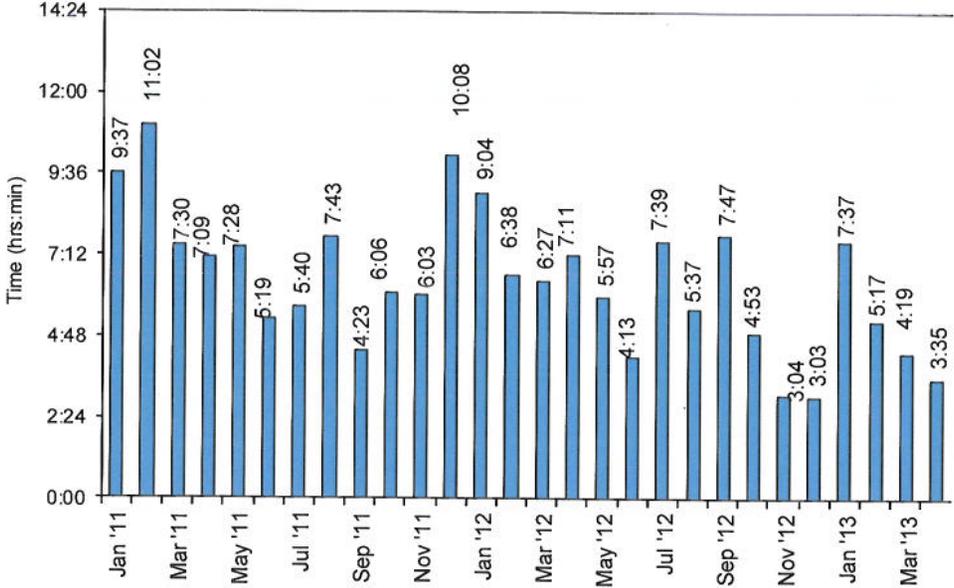

Target:
 Less than 7 hours.

Apr '13 data is Preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: Apr 2013

Median Boarding Time (Adult)*

Apr '13 data is Preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: Apr 2013

Indicator #2 - Emergency Department Metrics

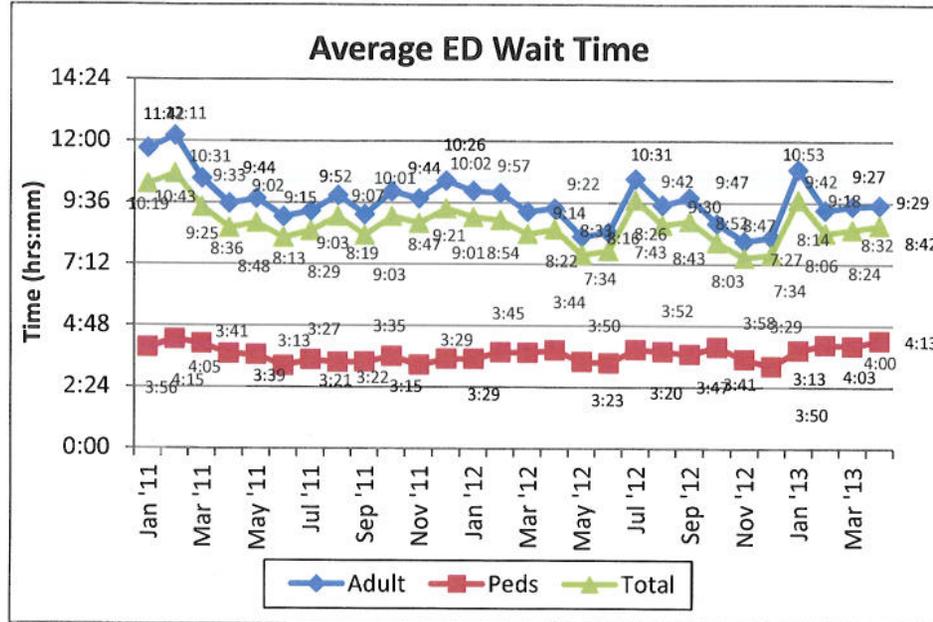

2c.
ED Wait Time

ED Wait Time: Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

Definition: Sum of all wait time values during the monthly reporting period divided by the total number of values.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Adult Wait Time : *Excludes Psych, Pediatric, Observation Unit, and Jail patients

Total ED Wait time: *Excludes Psych, Observation Unit, and Jail

Apr '13 data is Preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: Apr 2013

Indicator #2 - Emergency Department Metrics

2d.
Left Without Being Seen (LWBS)

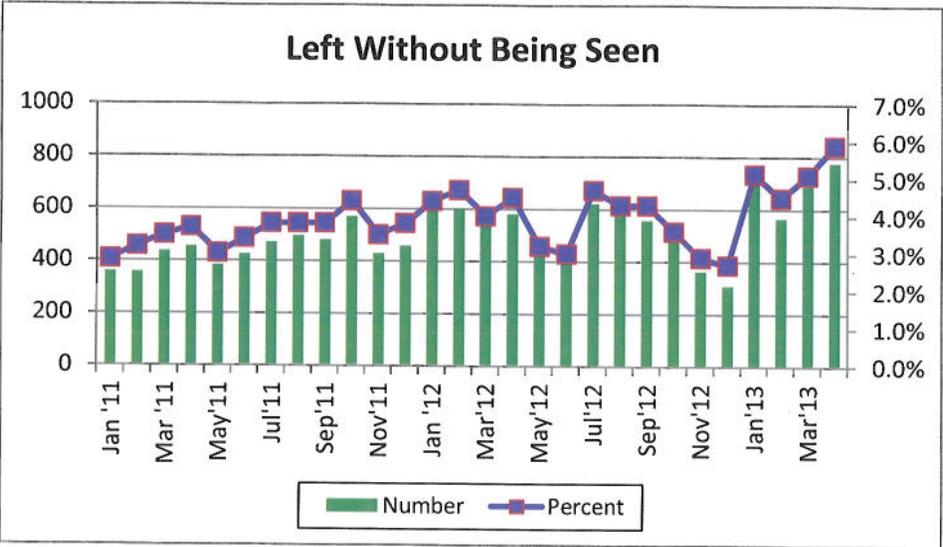

***Harris Rodde Indicator**

LWBS:
 The total number of patients who left the ED without being seen by a physician reported as a percentage of all ED visits.

Calculation:
 The total number of patients who left the ED without being seen divided by the total number of ED patient visits on a monthly basis.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Apr '13 data is Preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: Apr 2013

Indicator #2 - Emergency Department Metrics

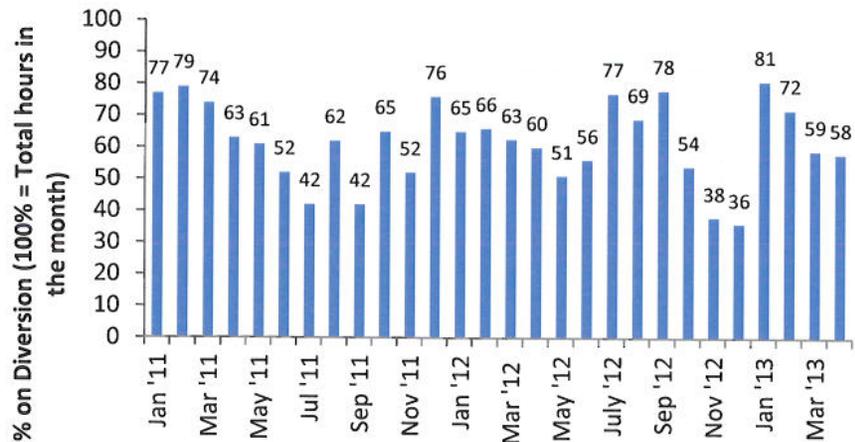

2e.
ED
Diversion

ED Diversion:
 A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:
 The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
 ReddiNet

Diversion of ALS Units due to ED Saturation

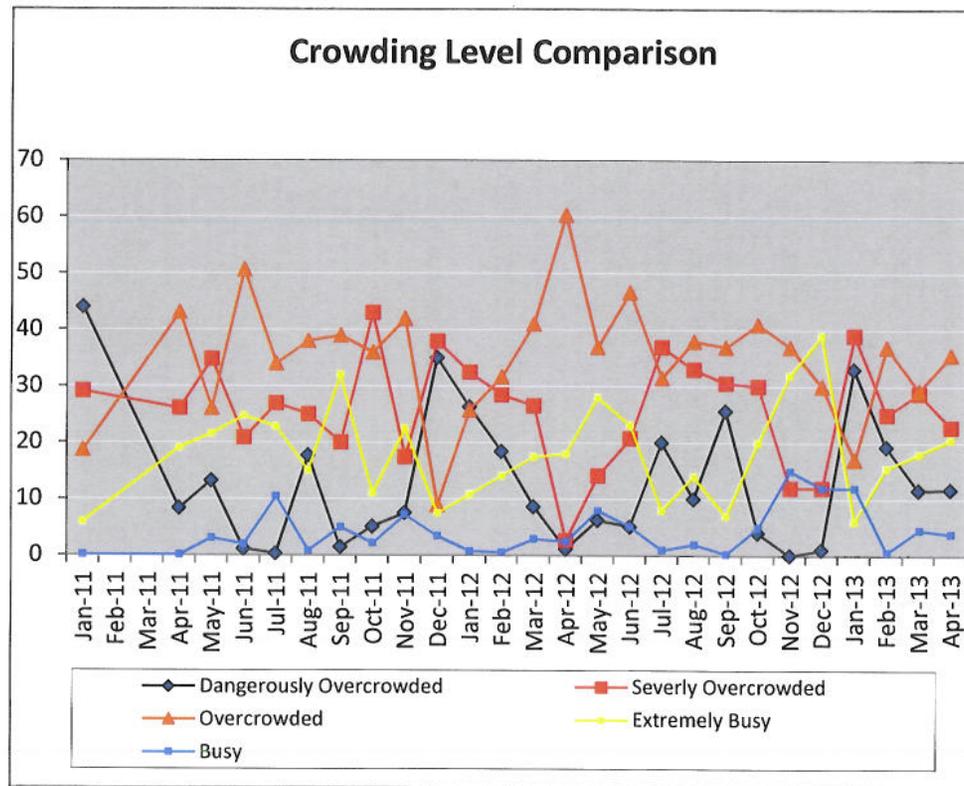

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF
PROGRESS, HOSPITAL OPERATIONS, AND OTHER
ISSUES RELATED TO THE TRANSITION TO THE NEW
LAC+USC MEDICAL CENTER – PROGRESS REPORT #89**

Mitchell H. Katz, M.D.
Director

Hal F. Yee, Jr., M.D., Ph.D.
Chief Medical Officer

Christina R. Ghaly, M.D.
Deputy Director, Strategic Planning

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of May 2013.

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of May was 525 out of 676 licensed beds, an estimated 76% utilization rate (78% occupancy). The census for Medical/Surgical units was an estimated 86% utilization rate (88% occupancy) for May 2013.

Emergency Department (ED) Indicators

The attachment demonstrates a decrease in the average daily census (ADC) and the rate of patients who left without being seen (LWBS). ED wait times and boarding times were stable. The number of patients transferred out remained the same for this period. The Dangerously Overcrowding Level Comparison for May 2013 was 2.7% compared to 11.7% in April 2013.

If you have any questions or need additional information, please contact me or Dr. Christina Ghaly, LAC+USC Interim Chief Executive Officer, at (323) 409-2800.

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF
PROGRESS, HOSPITAL OPERATIONS, AND OTHER
ISSUES RELATED TO THE TRANSITION TO THE NEW
LAC+USC MEDICAL CENTER – PROGRESS REPORT #90**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of June 2013.

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of June was 504 out of 676 licensed beds, an estimated 73% utilization rate (75% occupancy). The census for Medical/Surgical units was an estimated 80% utilization rate (82% occupancy) for June 2013.

Emergency Department (ED) Indicators

The attachment demonstrates a decrease in the average daily census (ADC), boarding times, and the rate of patients who left without being seen (LWBS). ED wait times were stable. The number of patients transferred out remained the same for this period. The Dangerously Overcrowding Level Comparison for June 2013 was 1.1% compared to 2.7% in May 2013.

If you have any questions or need additional information, please contact me or Dr. Christina Ghaly, LAC+USC Interim Chief Executive Officer, at (323) 409-2800.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: June 2013

Indicator #1 – Trends in Average Daily Census and Hospital Operations Metrics

1b.
Occupancy Rate
LAC+USC
Medical
Center

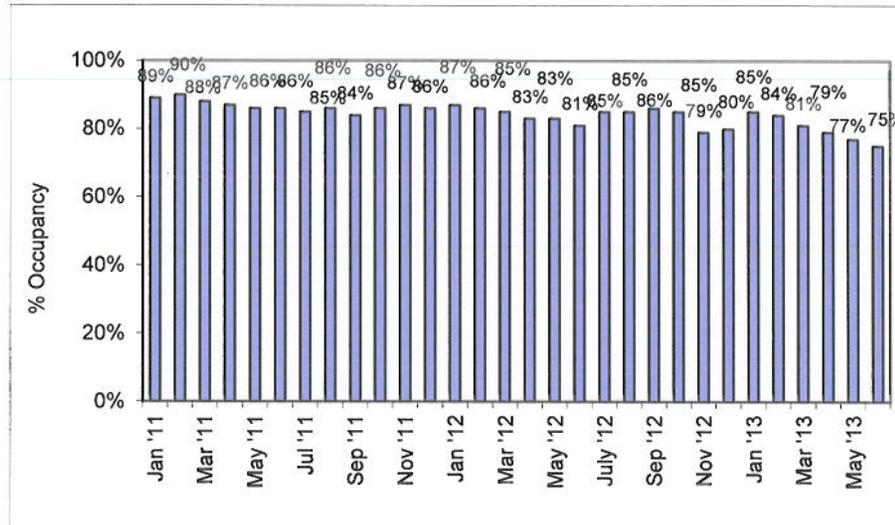

Definition:
 A measure of the usage of the licensed beds during the reporting period that is derived by dividing the patient days in the reporting period by the licensed bed days in the reporting period.

Calculation:
 The total number of admitted inpatients at 12:00 AM midnight, including women in labor, may include normal newborns and psychiatric inpatients divided by licensed or budgeted beds.

Source of Data:
 Affinity

Target:
 95%

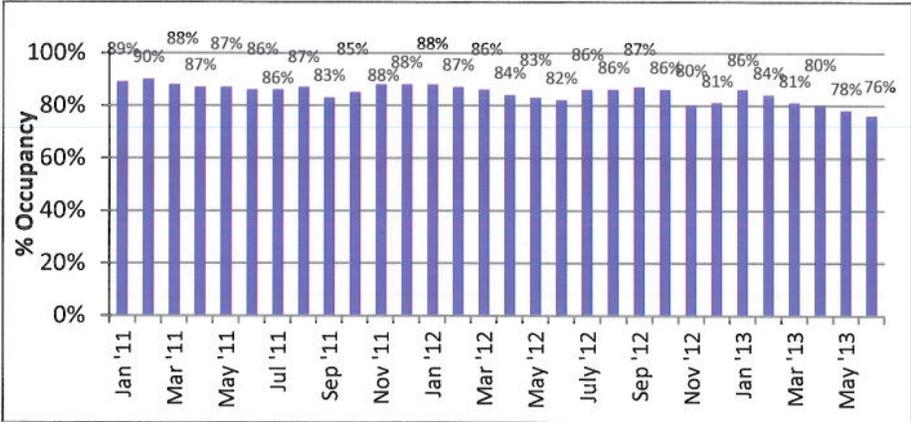

Medical Center Licensed Occupancy Rate (excluding Newborns) = $\frac{\text{Med Center Census} - \text{Newborns}}{600}$

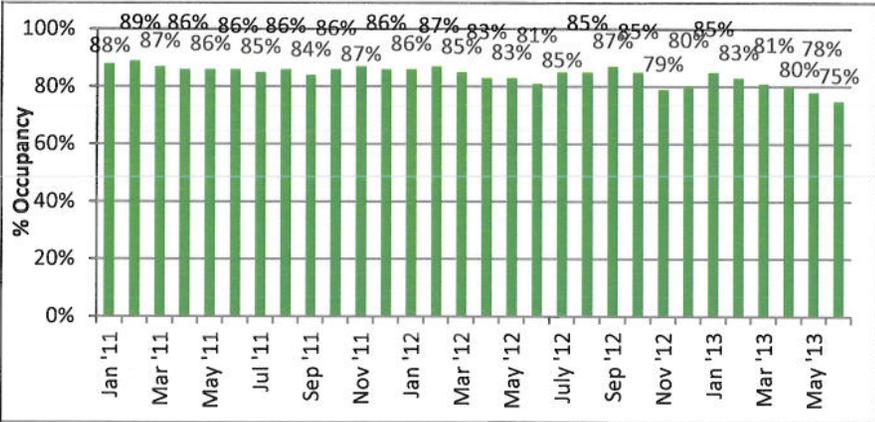

For comparison, occupancy rates reported in the old facility were reported including newborns and were based on budgeted beds.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: June 2013

Medical Center Licensed Occupancy Rate (including Newborns) Med Center Census/600

Medical Center Budgeted Occupancy Med Center Census + Newborns + Psych Hosp Census / 676

Medical Center = New Facility + Psychiatric Hospital

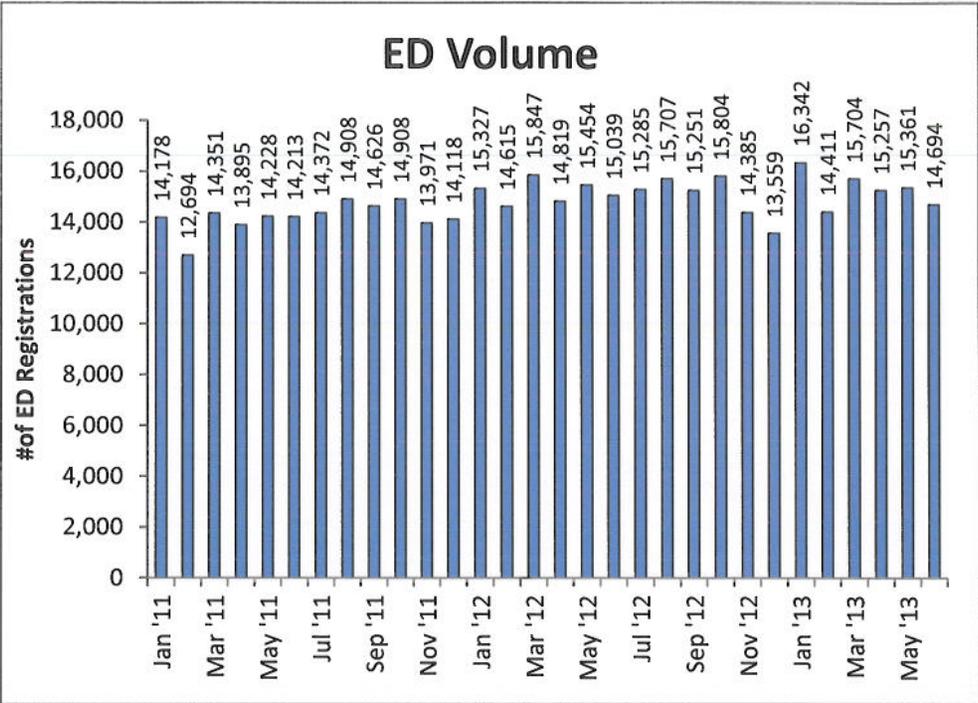

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: June 2013

Indicator #2 - Emergency Department Metrics

2a.
ED
Volume

ED Volume:
 Measured by total number of Emergency Department patient registrations.

Source of Data:
 Affinity

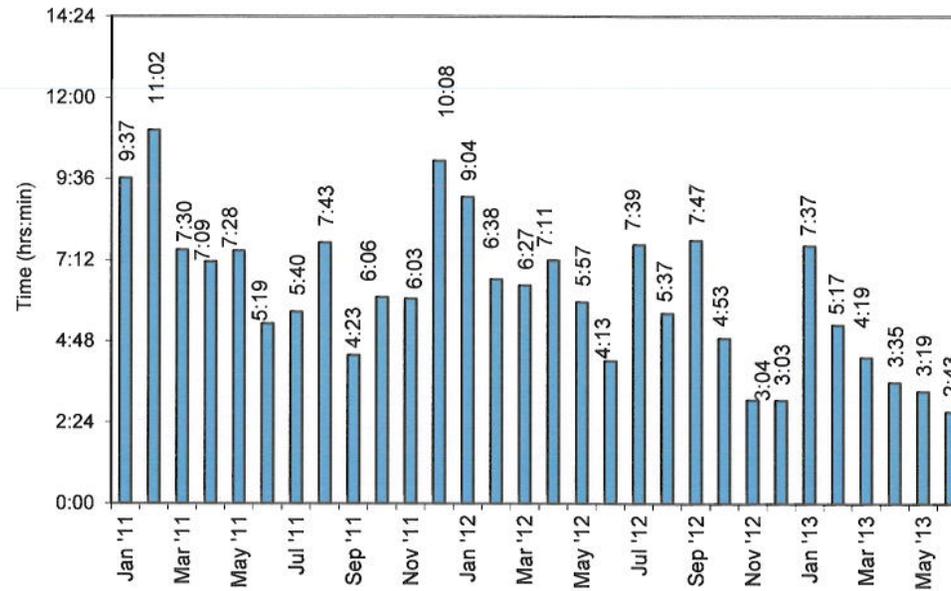

The annual total ED volume for FY 10-11 was 164,700 which increased to 178,004 in FY 11-12. ED volume for FY 12-13 was 181,760 which surpassed the FY 11-12 amount.

Median Boarding Time (Adult)*

June '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: June 2013

Indicator #2 - Emergency Department Metrics

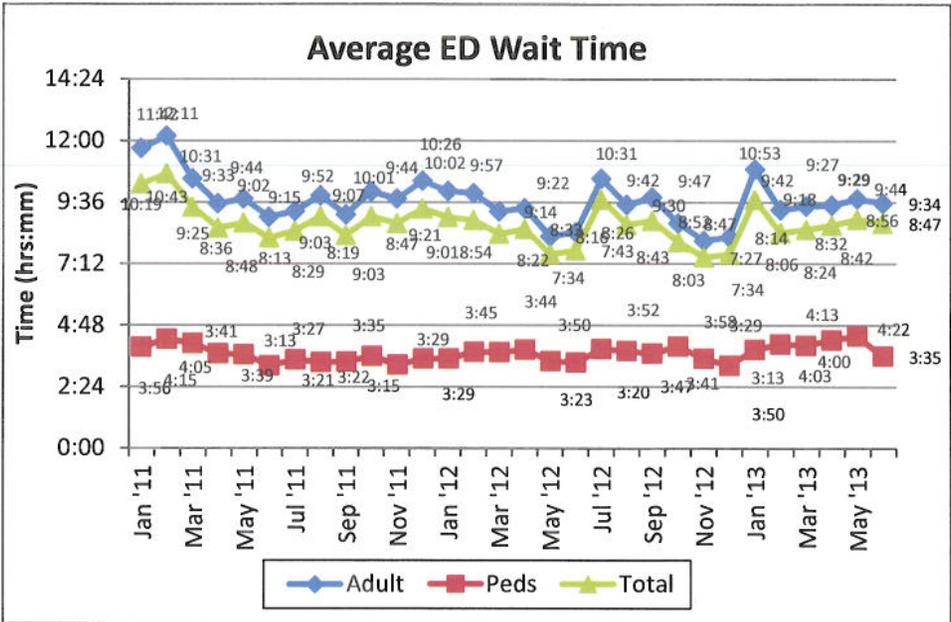

**2c.
ED Wait Time**

ED Wait Time:
 Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

Definition:
 Sum of all wait time values during the monthly reporting period divided by the total number of values.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Adult Wait Time : *Excludes Psych, Pediatric, Observation Unit, and Jail patients

Total ED Wait time: *Excludes Psych, Observation Unit, and Jail patients

June '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: June 2013

Indicator #2 - Emergency Department Metrics

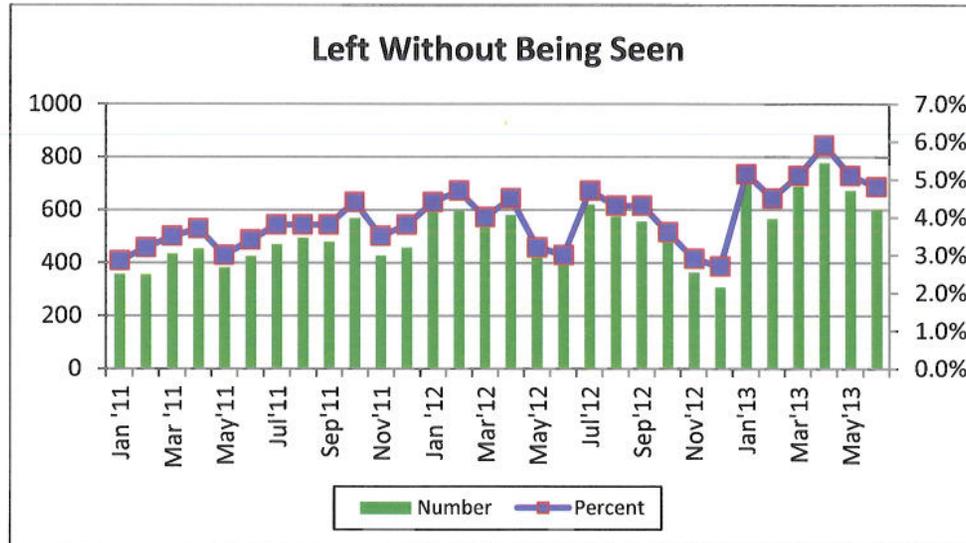

2d.
Left Without Being Seen (LWBS)
***Harris Rodde Indicator**

LWBS:
 The total number of patients who left the ED without being seen by a physician reported as a percentage of all ED visits.

Calculation:
 The total number of patients who left the ED without being seen divided by the total number of ED patient visits on a monthly basis.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

June '13 data is preliminary data

LAC+USC Medical Center
 Operational Monitoring Report
 Reporting Period: June 2013

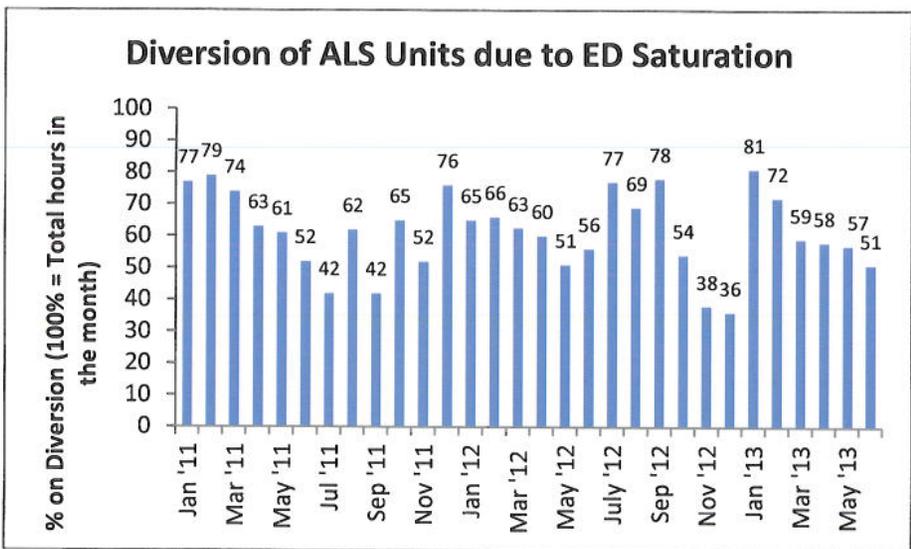

Indicator #2 - Emergency Department Metrics

**2e.
ED
Diversion**

ED Diversion:
 A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:
 The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
 ReddiNet

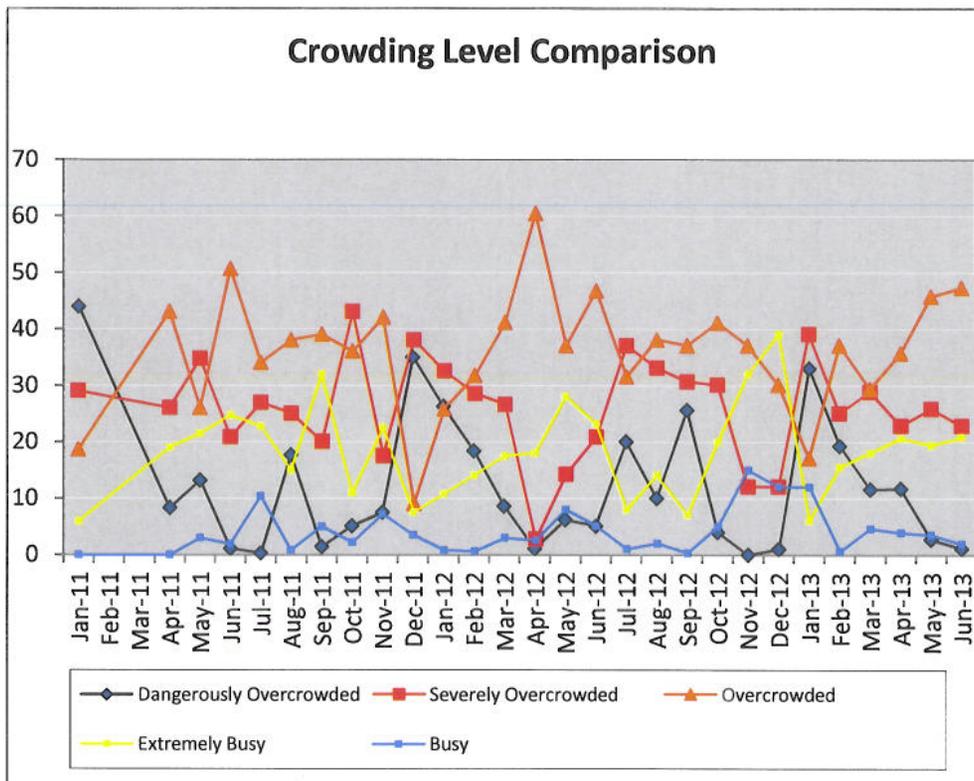

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

Indicator #3 – Trends for Patient Diversions and Transfers & #4 – Transfers to Rancho Los Amigos Metrics

**3. & 4.
 Rancho
 Los
 Amigos
 Hospital
 (RLAH)
 Transfers**

Transfers:
 The volume of patients transferred to RLAH for acute hospitalization from the Emergency Department and from Inpatient Units.

Data Source:
 Manual record keeping.

Cancelled category includes patients whose condition changed leading to higher level of care or discharge home.

Month of June '13

Operational Monitoring Report
Reporting Period: June 2013

* Other hospitals = Silver Lake (0), Managed Care Repatriation (63)
 Data was revised to reflect total # of patients (including stroke patients) referred to Rancho

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: June 2013

Indicator #5 – Harris Rodde Indicators

5.

Average Length of Stay (ALOS)

LOS:
 The difference between discharge date and the admission date or 1 if the 2 dates are the same.

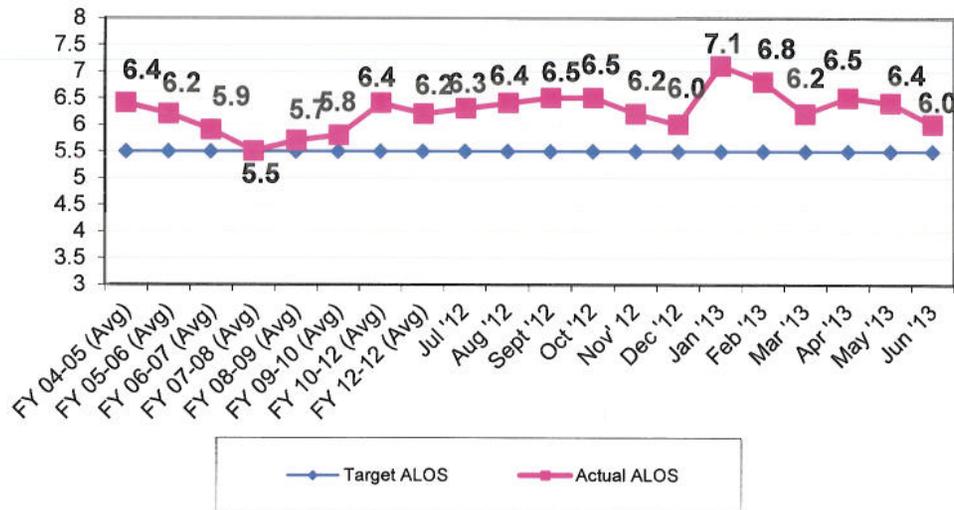

Total LOS:

Calculation:
 ALOS is the arithmetic mean calculated by dividing the Total LOS by the Total # of discharges in the monthly reporting period, rounded off to one decimal place.

***Harris Rodde Indicator**

Source of Data:
 Affinity
Target: <5.5 days

Average Length of Stay

***Medical Center (New Facility + Psychiatric Hospital) ALOS - Preliminary data pending Auditor-Controller validation**

The increasing length of stay observed in January and February is largely attributed to the discharge of several patients with extended lengths of stay. In June 2013, these include 6 patients who were discharged with LOS > 100. Without the effect of these 6 patients, ALOS would have been 5.7 rather than 6.0.

*As of July 2010 with the consolidation of Ingleside and Hawkins, all psychiatric services are now included.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: June 2013

Indicator #6 – Pediatric Metrics						
6.	Census: The total number admitted pediatric inpatients at 12:00 AM midnight of a designated pediatric ward.	Date	NICU (40 Beds)	Peds Ward (25 Beds)	PICU (10 Beds)	Med/Surg Adolescent (20 Beds)
		Pediatric Bed Census and Occupancy (%)	Occupancy: The total number of admitted pediatric inpatients divided by the total number of licensed beds on that unit and reported as percentage.	Jan-11	55%	60%

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF
PROGRESS, HOSPITAL OPERATIONS, AND OTHER
ISSUES RELATED TO THE TRANSITION TO THE NEW
LAC+USC MEDICAL CENTER – PROGRESS REPORT #91**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of July 2013.

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of June was 529 out of 676 licensed beds, an estimated 77% utilization rate (79% occupancy). The census for Medical/Surgical units was an estimated 86% utilization rate (88% occupancy) for July 2013.

Emergency Department (ED) Indicators

The attachment demonstrates an increase in the average daily census (ADC), ED wait times, and the rate of patients who left without being seen (LWBS) in comparison with June 2013. ED boarding times were stable. The number of patients transferred out increased for this period. The Dangerously Overcrowding Level Comparison for July 2013 was 4.6% compared to 1.1% in June 2013.

If you have any questions or need additional information, please contact me or Dr. Christina Ghaly, LAC+USC Interim Chief Executive Officer, at (323) 409-2800.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: July 2013

Indicator #1 – Trends in Average Daily Census and Hospital Operations Metrics

1b.
Occupancy Rate
LAC+USC
Medical Center

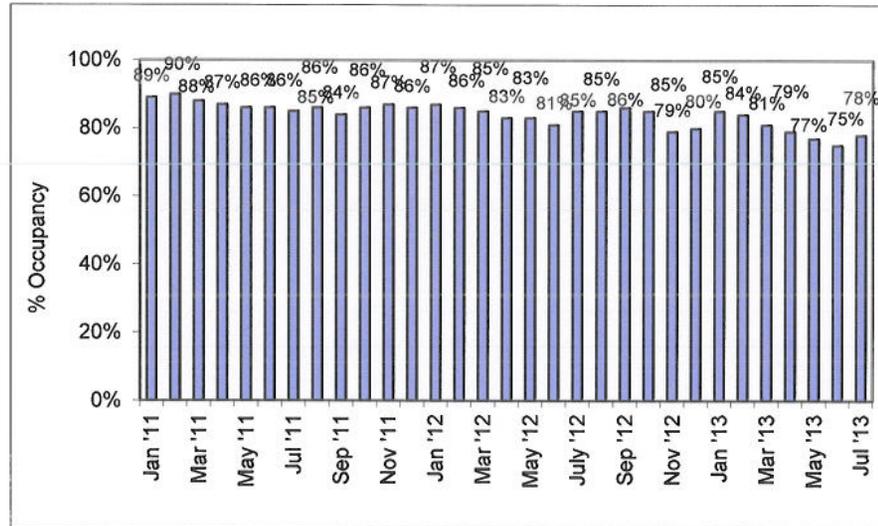

Definition:
 A measure of the usage of the licensed beds during the reporting period that is derived by dividing the patient days in the reporting period by the licensed bed days in the reporting period.

Calculation:
 The total number of admitted inpatients at 12:00 AM midnight, including women in labor, may include normal newborns and psychiatric inpatients divided by licensed or budgeted beds.

Source of Data:
 Affinity

Target:
 95%

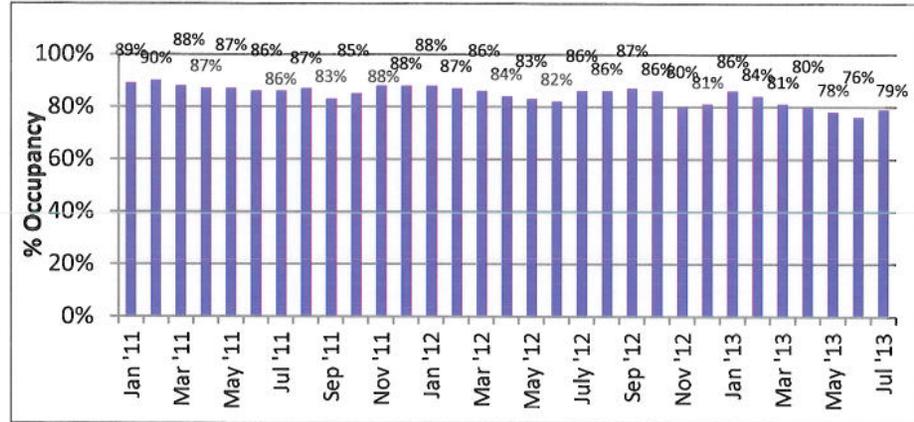

Medical Center Licensed Occupancy Rate (excluding Newborns) = **Med Center Census - Newborns / 600**

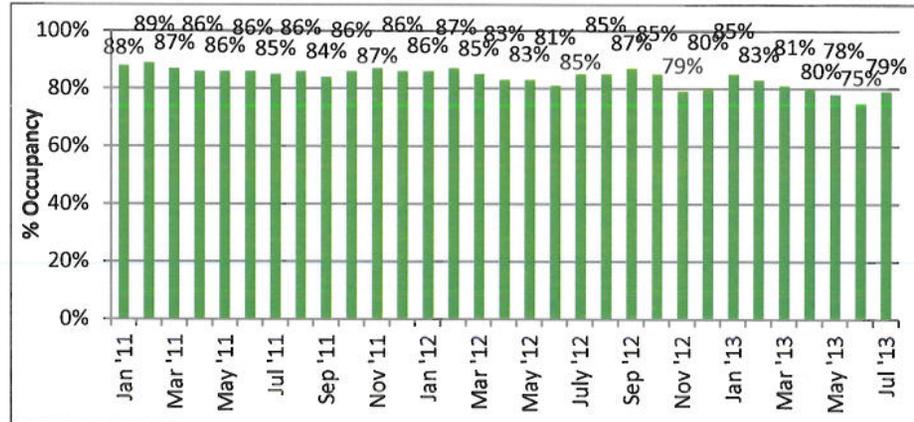

For comparison, occupancy rates reported in the old facility were reported including newborns and were based on budgeted beds.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: July 2013

Medical Center Licensed Occupancy Rate (including Newborns) Med Center Census/600

Medical Center Budgeted Occupancy
Med Center Census + Newborns + Psych Hosp Census / 676

Medical Center = New Facility + Psychiatric Hospital

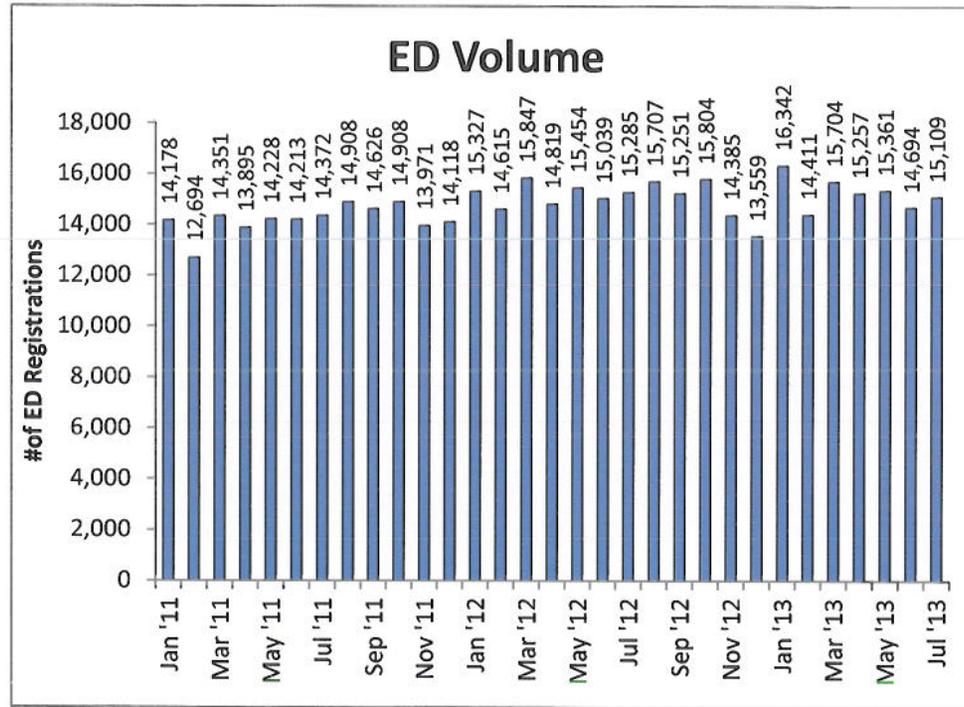

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: July 2013

Indicator #2 - Emergency Department Metrics

2a.
ED
Volume

ED Volume:
 Measured by total number of Emergency Department patient registrations.

Source of Data:
 Affinity

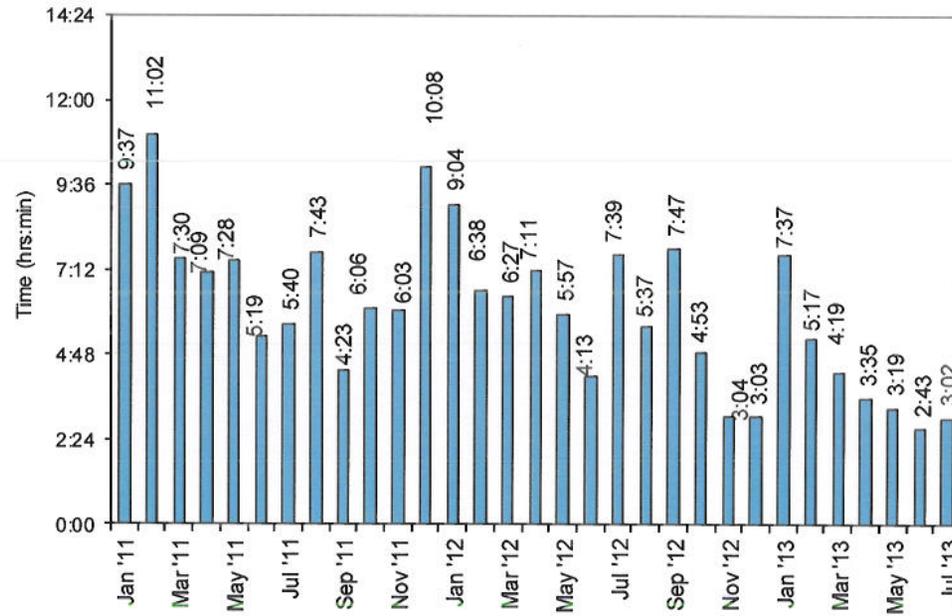

The annual total ED volume for FY 10-11 was 164,700 which increased to 178,004 in FY 11-12. ED volume for FY 12-13 was 181,760 which surpassed the FY 11-12 amount.

Median Boarding Time (Adult)*

July '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: July 2013

Indicator #2 - Emergency Department Metrics

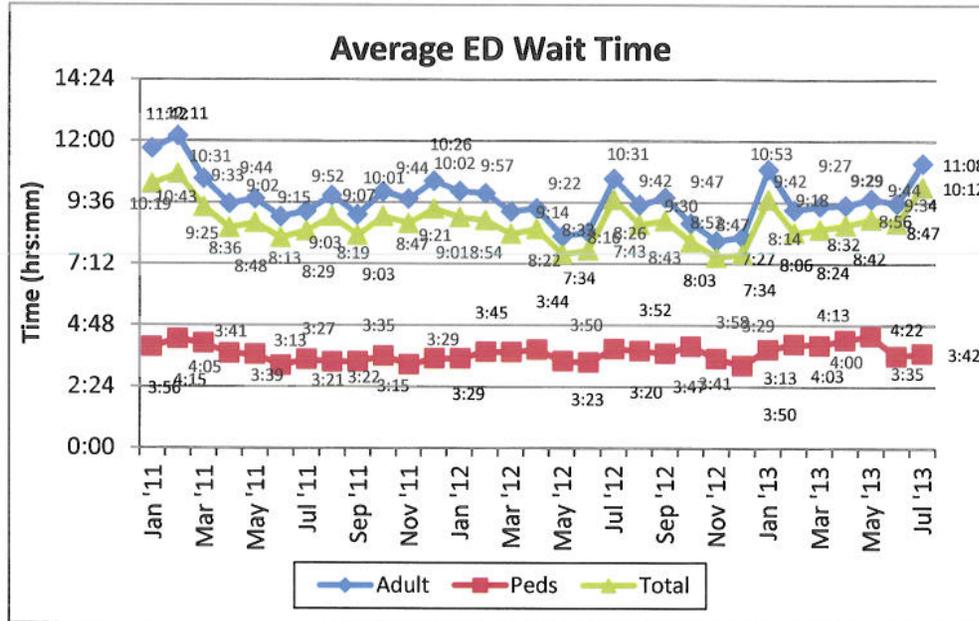

2c.
ED Wait Time

ED Wait Time:
 Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

Definition:
 Sum of all wait time values during the monthly reporting period divided by the total number of values.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Adult Wait Time : *Excludes Psych, Pediatric, Observation Unit, and Jail patients

Total ED Wait time: *Excludes Psych, Observation Unit, and Jail patients

July '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: July 2013

Indicator #2 - Emergency Department Metrics

2d.
Left Without Being Seen (LWBS)

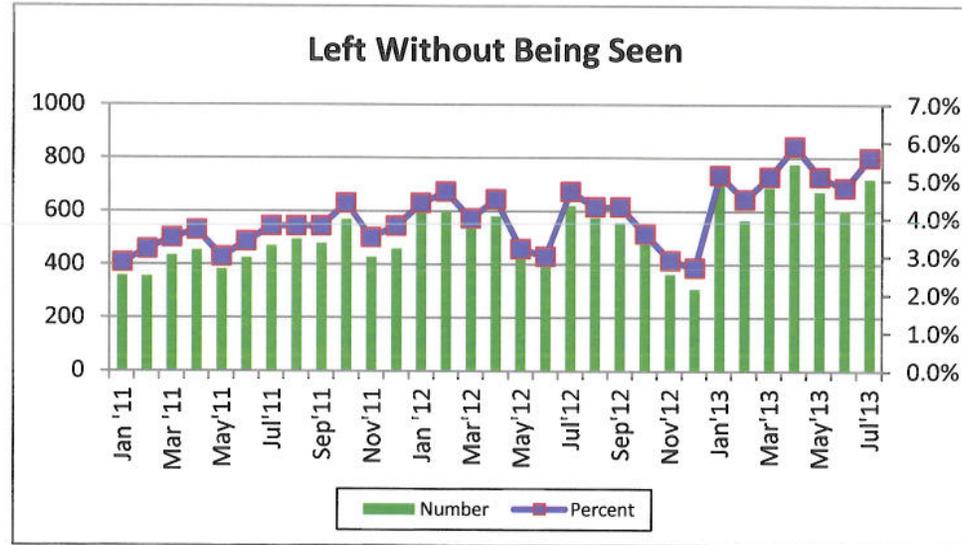

***Harris Rodde Indicator**

LWBS:
 The total number of patients who left the ED without being seen by a physician reported as a percentage of all ED visits.

Calculation:
 The total number of patients who left the ED without being seen divided by the total number of ED patient visits on a monthly basis.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

July '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: July 2013

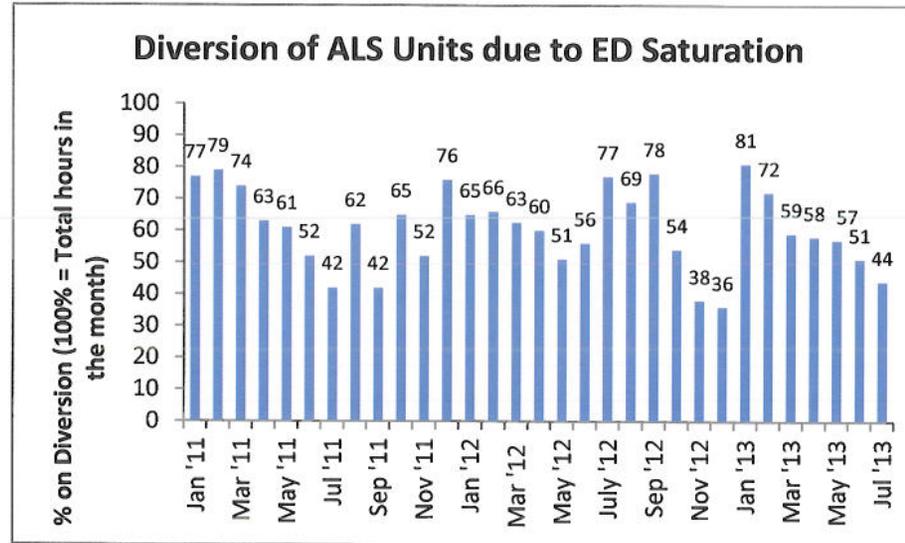

Indicator #2 - Emergency Department Metrics

**2e.
ED
Diversion**

ED Diversion:
 A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:
 The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
 ReddiNet

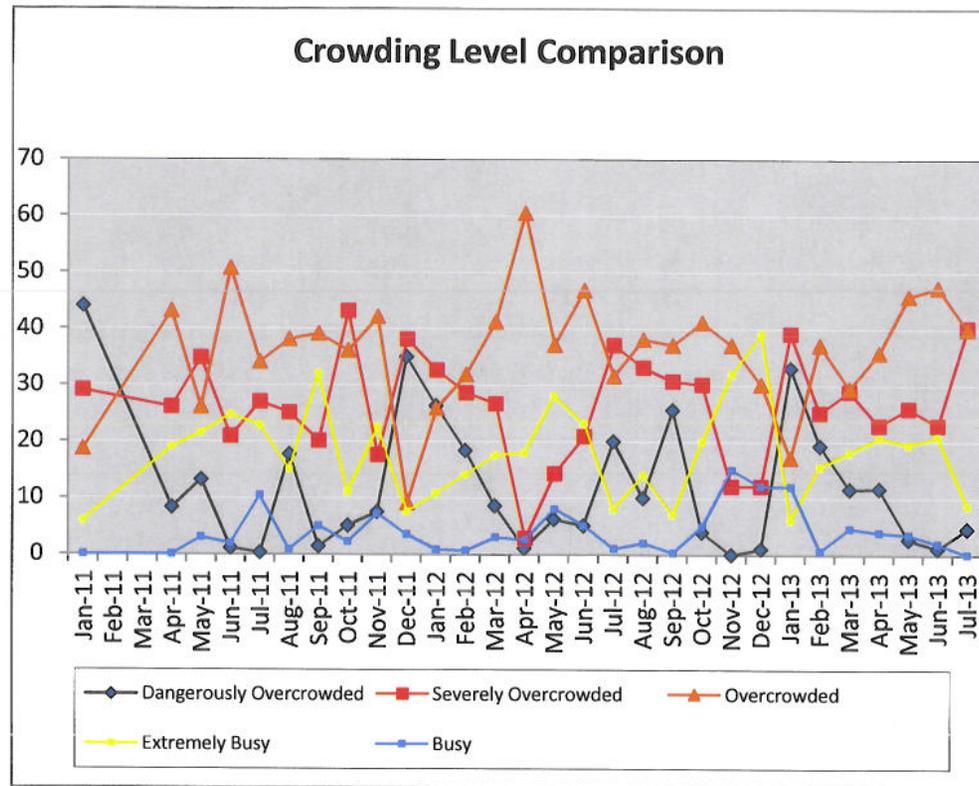

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

Operational Monitoring Report
Reporting Period: July 2013

Indicator #3 – Trends for Patient Diversions and Transfers & #4 – Transfers to Rancho Los Amigos Metrics

3. & 4.
Rancho Los Amigos Hospital (RLAH) Transfers

Transfers:
 The volume of patients transferred to RLAH for acute hospitalization from the Emergency Department and from Inpatient Units.

Data Source:
 Manual record keeping.

Cancelled category includes patients whose condition changed leading to higher level of care or discharge home.

Month of July '13

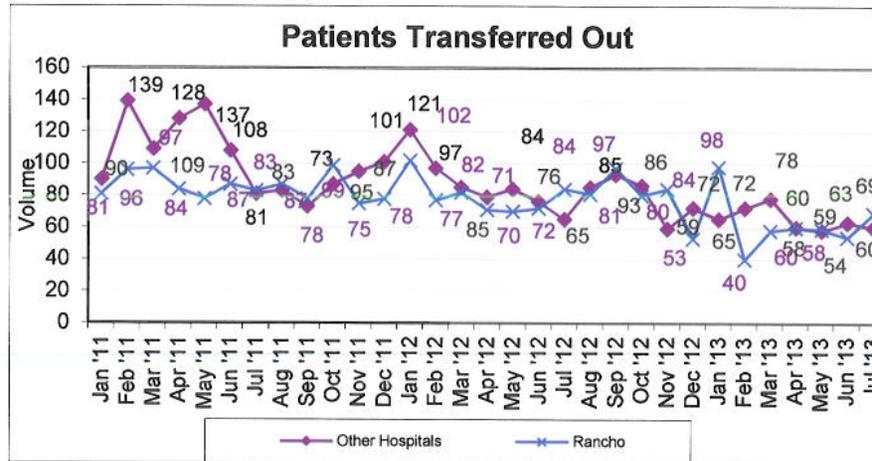

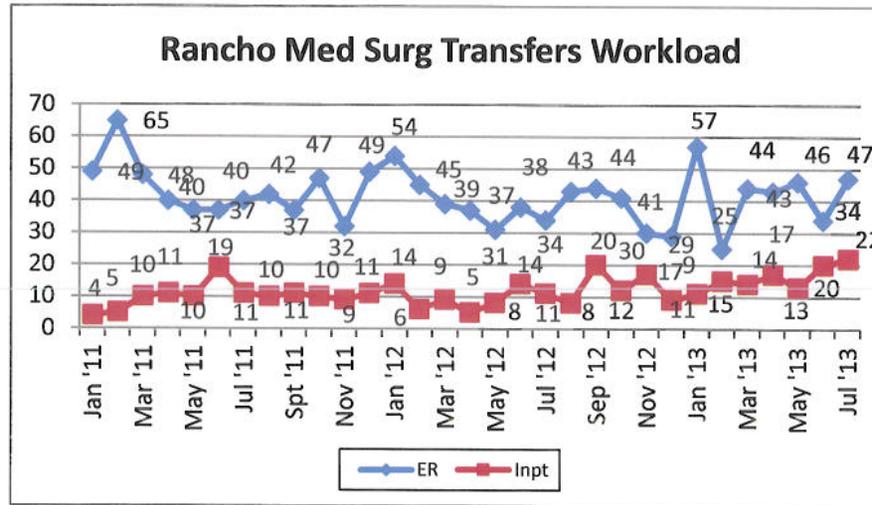

Referrals from ER:

	Med/Surg	Acute Stroke	Total
# Met transfer criteria	19	NA	-
# Referred to RLAH	19	29	47

 Data was revised to reflect total # of patients (including stroke patients) referred to Rancho

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: July 2013

Indicator #5 – Harris Rodde Indicators

5.

Average Length of Stay (ALOS)

LOS:
 The difference between discharge date and the admission date or 1 if the 2 dates are the same.

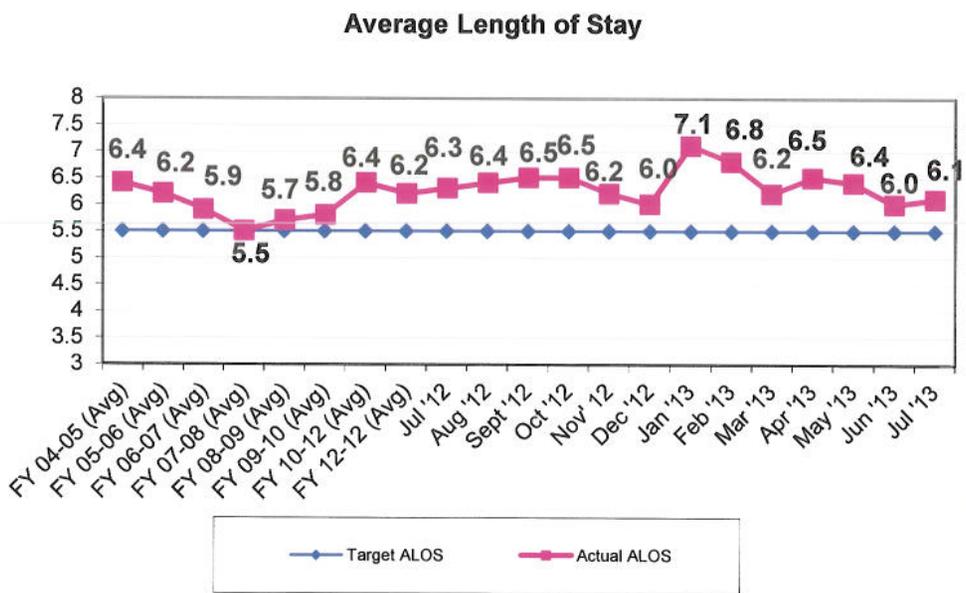

Total LOS:

Calculation:
 ALOS is the arithmetic mean calculated by dividing the Total LOS by the Total # of discharges in the monthly reporting period, rounded off to one decimal place.

***Harris Rodde Indicator**

Source of Data:
 Affinity

Target: <5.5 days

***Medical Center (New Facility + Psychiatric Hospital) ALOS - Preliminary data pending Auditor-Controller validation**

The increasing length of stay observed in January and February is largely attributed to the discharge of several patients with extended lengths of stay. In June 2013, these include 6 patients who were discharged with LOS > 100. Without the effect of these 6 patients, ALOS would have been 5.8 rather than 6.1.

*As of July 2010 with the consolidation of Ingleside and Hawkins, all psychiatric services are now included.

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF PROGRESS, HOSPITAL OPERATIONS, AND OTHER ISSUES RELATED TO THE TRANSITION TO THE NEW LAC+USC MEDICAL CENTER – PROGRESS REPORT #92**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of August 2013.

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of August was 550 out of 676 licensed beds, an estimated 80% utilization rate (82% occupancy). The census for Medical/Surgical units was an estimated 91% utilization rate (93% occupancy) for August 2013.

Emergency Department (ED) Indicators

The attachment demonstrates an increase in the average daily census (ADC) and ED boarding times. There was a decrease in ED wait times and the rate of patients who left without being seen (LWBS) in comparison with July 2013. The number of patients transferred out increased for this period compared to July 2013. The Dangerously Overcrowding Level Comparison for August 2013 was 14% compared to 4.6% in July 2013.

If you have any questions or need additional information, please contact me or Henry Ornelas, LAC+USC Interim Chief Executive Officer, at (323) 409-2800.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: August 2013

Indicator #1 – Trends in Average Daily Census and Hospital Operations Metrics

1b.
Occupancy Rate
LAC+USC
Medical Center

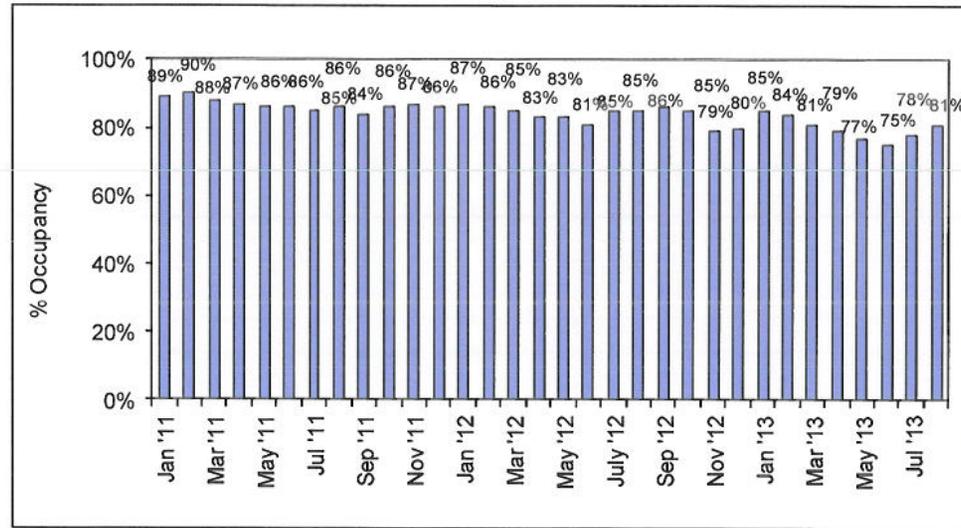

Definition:
 A measure of the usage of the licensed beds during the reporting period that is derived by dividing the patient days in the reporting period by the licensed bed days in the reporting period.

Calculation:
 The total number of admitted inpatients at 12:00 AM midnight, including women in labor, may include normal newborns and psychiatric inpatients divided by licensed or budgeted beds.

Source of Data:
 Affinity

Target:
 95%

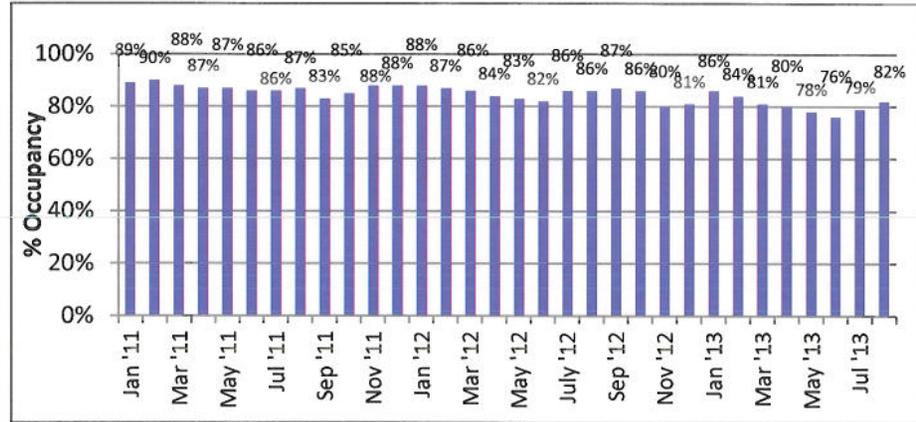

Medical Center Licensed Occupancy Rate (excluding Newborns) = **Med Center Census - Newborns / 600**

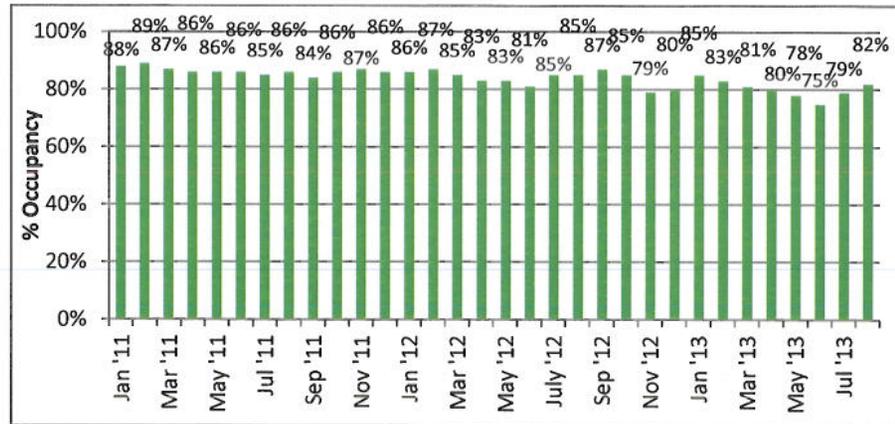

For comparison, occupancy rates reported in the old facility were reported including newborns and were based on budgeted beds.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: August 2013

Medical Center Licensed Occupancy Rate (including Newborns) Med Center Census/600

Medical Center Budgeted Occupancy
Med Center Census + Newborns + Psych Hosp Census / 676

Medical Center = New Facility + Psychiatric Hospital

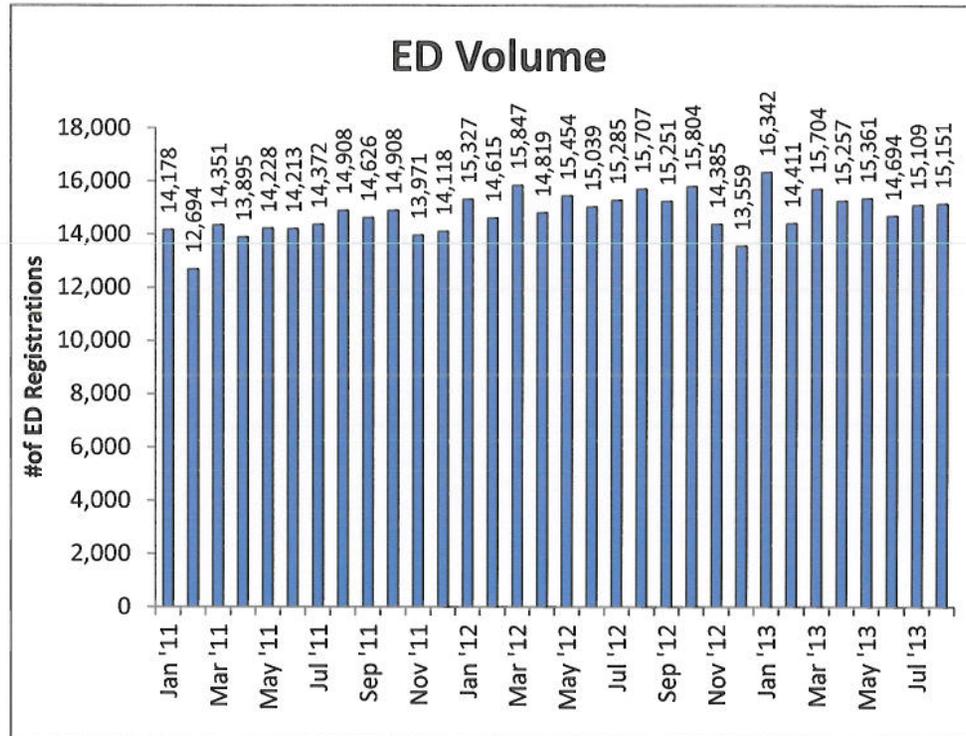

**LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: August 2013**

Indicator #2 - Emergency Department Metrics

**2a.
ED
Volume**

ED Volume:
Measured by total number of Emergency Department patient registrations.

Source of Data:
Affinity

The annual total ED volume for FY 10-11 was 164,700 which increased to 178,004 in FY 11-12. ED volume for FY 12-13 was 181,760 which surpassed the FY 11-12 amount.

**LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: August 2013**

**2b.
Median
Emergency
Department
Boarding
Time
(EDBT)**

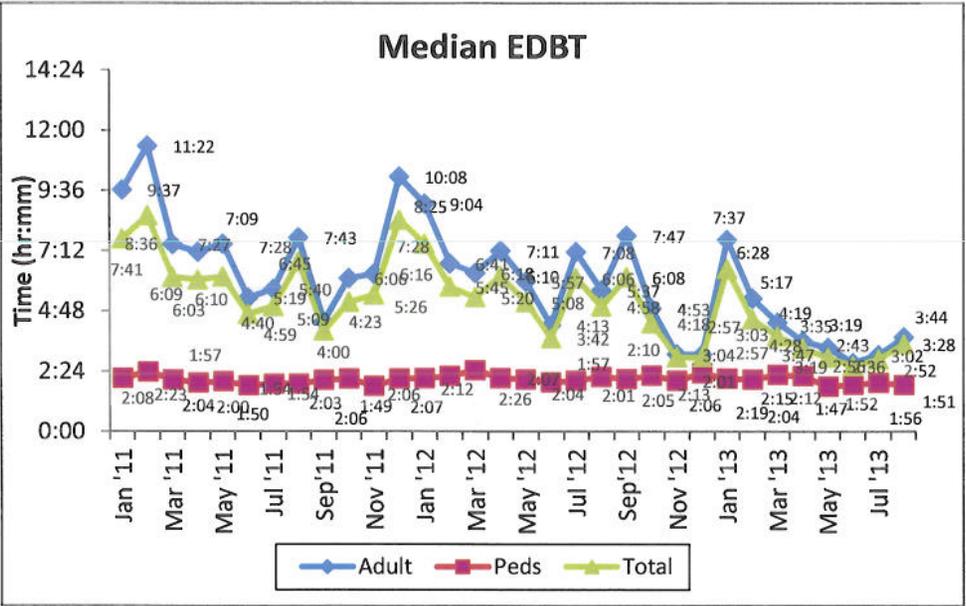

Boarding Time:
Time from MD Admit time (effective date and time of pre-admit) to time the patient actually leaves the ED en route to assigned bed (effective date and time of the ED disposition).

Calculation:
The middle value in the set of individual boarding times for the month arranged in increasing order. If there is an even number of values, then the median is the average of the middle two values.

Source of Data:
Affinity

Target:
Less than 7 hours.

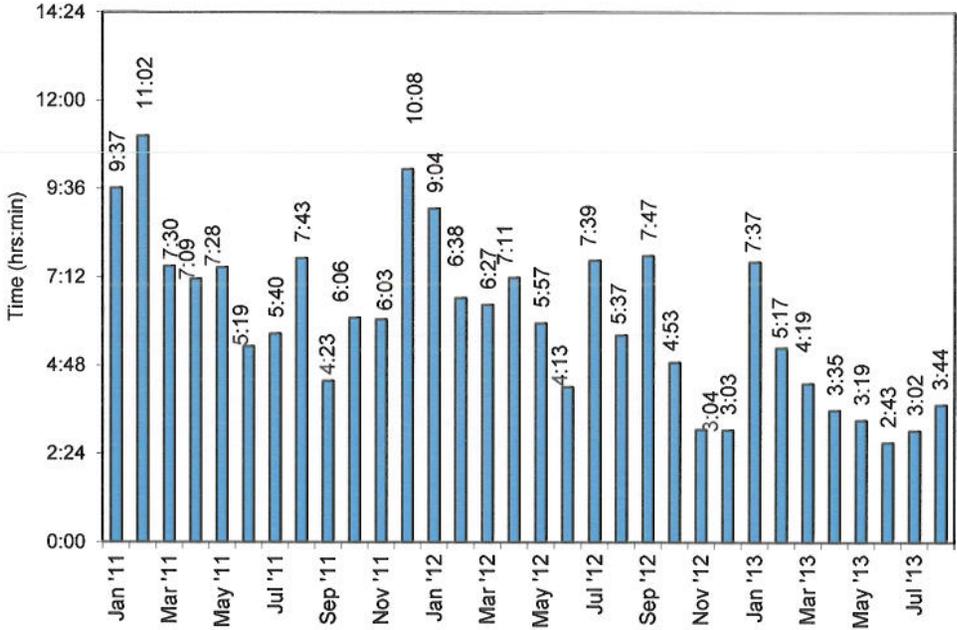

***Harris
Rodde
Indicator**

Median Boarding Time (Adult)*

August '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: August 2013

Indicator #2 - Emergency Department Metrics

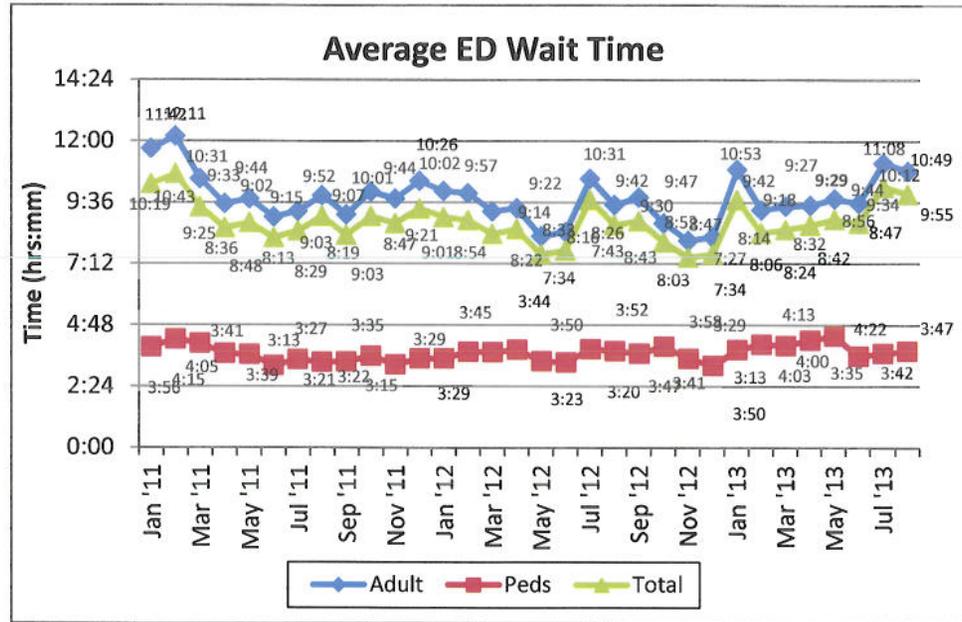

2c.
ED Wait Time

ED Wait Time:
 Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

Definition:
 Sum of all wait time values during the monthly reporting period divided by the total number of values.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Adult Wait Time : *Excludes Psych, Pediatric, Observation Unit, and Jail patients

Total ED Wait time: *Excludes Psych, Observation Unit, and Jail patients

August '13 data is preliminary data

LAC+USC Medical Center

Reporting Period: August 2013

Indicator #2 - Emergency Department Metrics

2d.
Left Without Being Seen (LWBS)

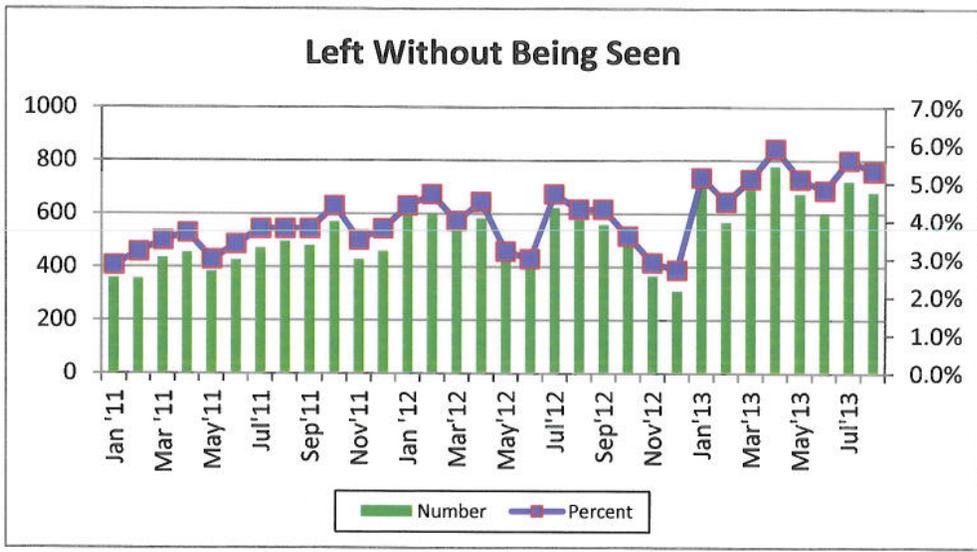

***Harris Rodde Indicator**

LWBS:
 The total number of patients who left the ED without being seen by a physician reported as a percentage of all ED visits.

Calculation:
 The total number of patients who left the ED without being seen divided by the total number of ED patient visits on a monthly basis.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

August '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: August 2013

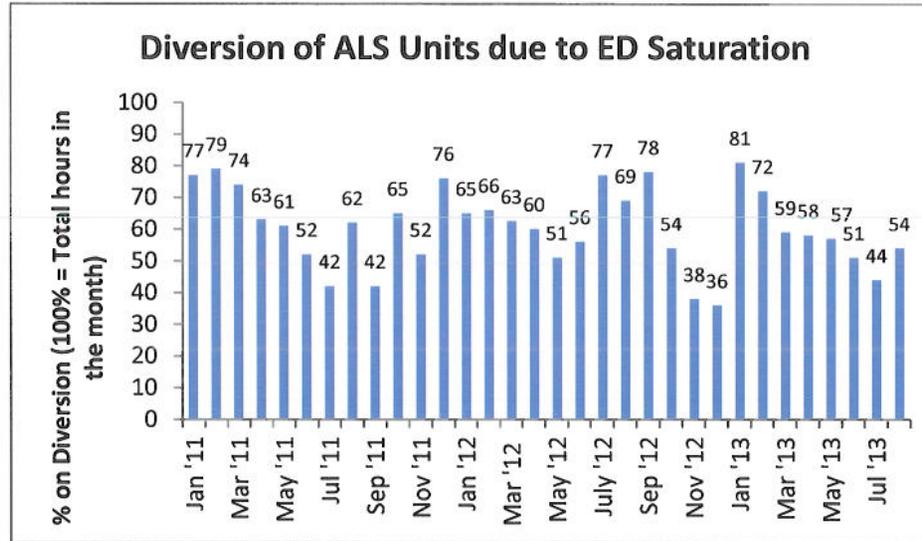

Indicator #2 - Emergency Department Metrics

**2e.
ED
Diversion**

ED Diversion:
 A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:
 The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
 ReddiNet

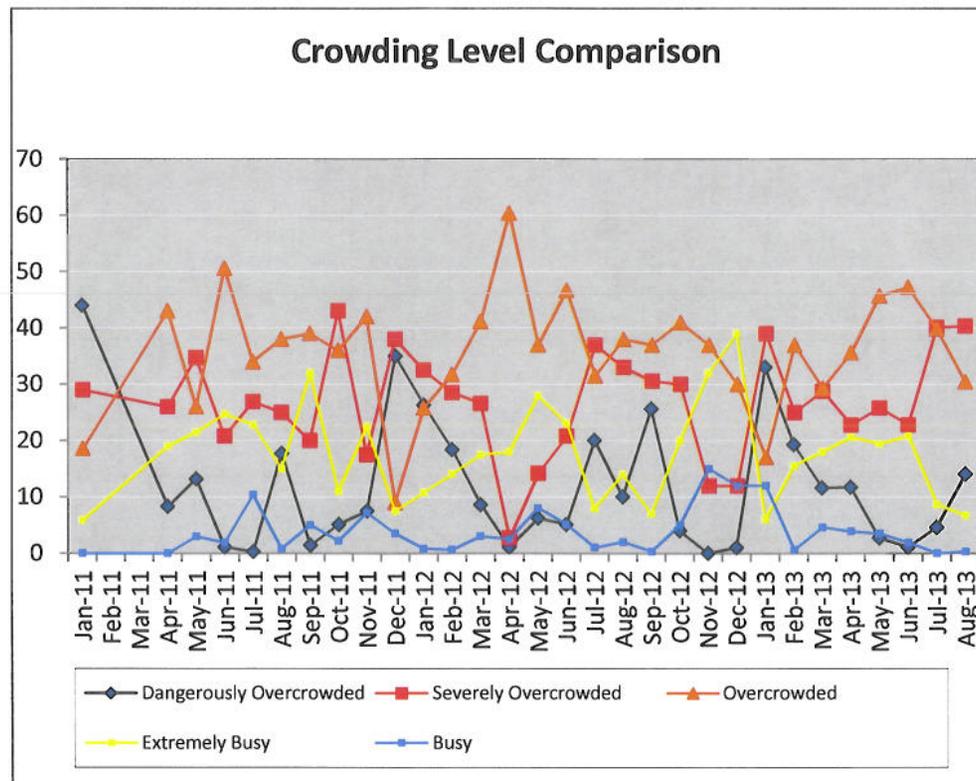

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

 Reporting Period: August 2013

Indicator #3 – Trends for Patient Diversions and Transfers & #4 – Transfers to Rancho Los Amigos Metrics

3. & 4.
Rancho Los Amigos Hospital (RLAH) Transfers

Transfers:
 The volume of patients transferred to RLAH for acute hospitalization from the Emergency Department and from Inpatient Units.

Data Source:
 Manual record keeping.

Cancelled category includes patients whose condition changed leading to higher level of care or discharge home.

Month of August '13

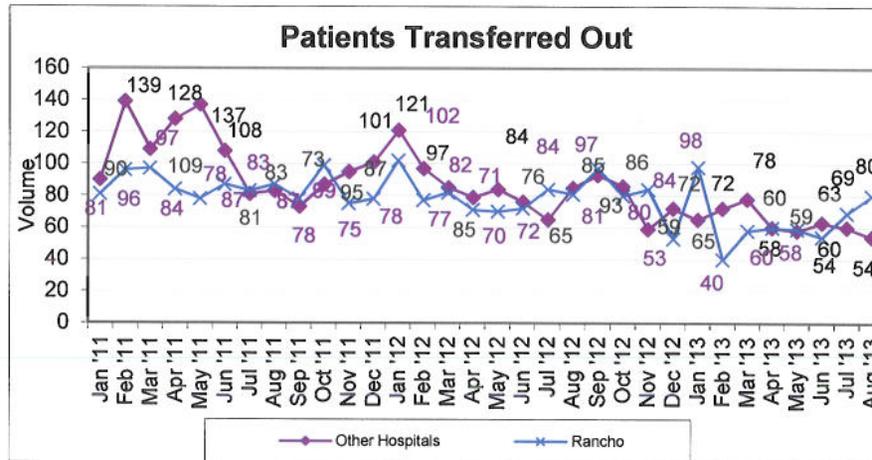

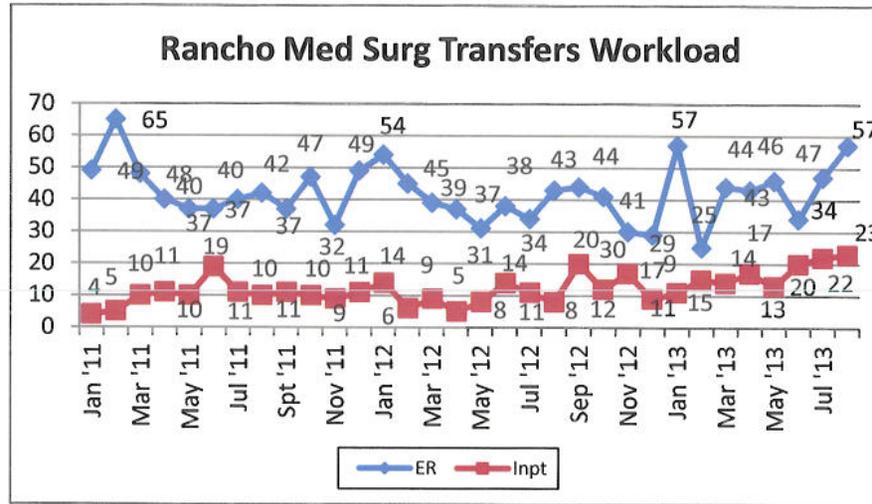

Referrals from ER:

	Med/Surg	Acute Stroke	Total
# Met transfer criteria	24	NA	-
# Referred to RLAH	24	33	57

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF
PROGRESS, HOSPITAL OPERATIONS, AND OTHER
ISSUES RELATED TO THE TRANSITION TO THE NEW
LAC+USC MEDICAL CENTER – PROGRESS REPORT #93**

Mitchell H. Katz, M.D.
Director

Hal F. Yee, Jr., M.D., Ph.D.
Chief Medical Officer

Christina R. Ghaly, M.D.
Deputy Director, Strategic Planning

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of September 2013.

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of September was 569 out of 676 licensed beds, an estimated 82% utilization rate (84% occupancy). The census for Medical/Surgical units was an estimated 93% utilization rate (95% occupancy) for September 2013.

Emergency Department (ED) Indicators

The attachment demonstrates an increase in the average daily census (ADC), ED boarding times, and the rate of patients who left without being seen (LWBS) in comparison to August 2013. ED wait times and the number of patients transferred out for this period were stable. The Dangerously Overcrowding Level Comparison for September 2013 was 21% compared to 14% in August 2013 and 26% in September 2012.

If you have any questions or need additional information, please contact me or Dan Castillo, LAC+USC Chief Executive Officer, at (323) 409-2800.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: September 2013

Indicator #1 – Trends in Average Daily Census and Hospital Operations Metrics

1b.
Occupancy Rate
LAC+USC
Medical Center

Definition:

A measure of the usage of the licensed beds during the reporting period that is derived by dividing the patient days in the reporting period by the licensed beds in the reporting period.

Calculation:

The total number of admitted inpatients at 12:00 AM midnight, including women in labor, may include normal newborns and psychiatric inpatients divided by licensed or budgeted beds.

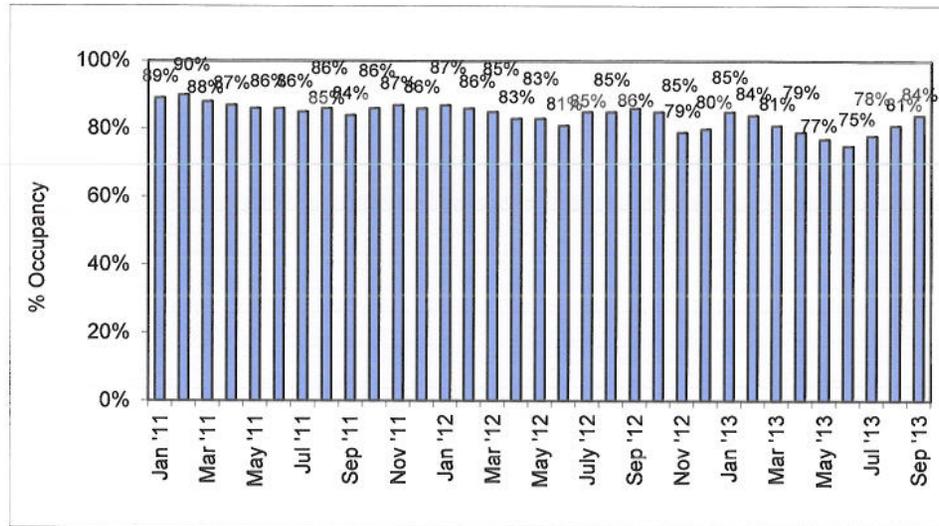

Source of Data:

Affinity

Target:

95%

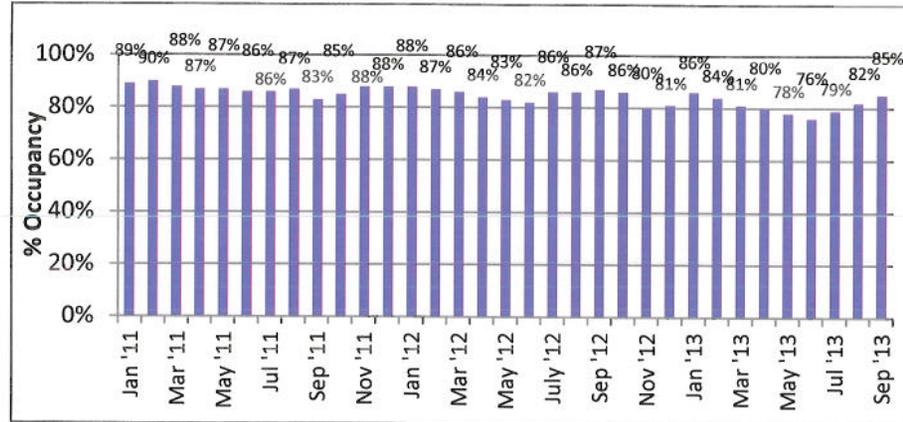

Medical Center Licensed Occupancy Rate (excluding Newborns) = $\frac{\text{Med Center Census} - \text{Newborns}}{600}$

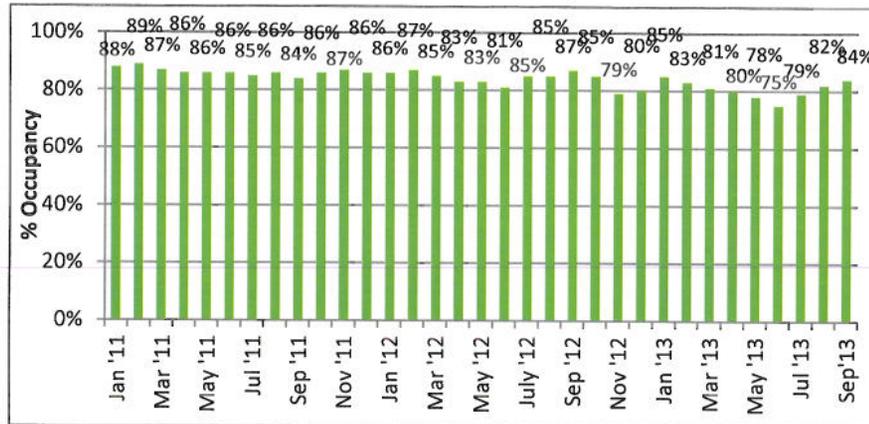

For comparison, occupancy rates reported in the old facility were reported including newborns and were based on budgeted beds.

Indicator #2 - Emergency Department Metrics

2c.
ED Wait Time

ED Wait Time:
 Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

Definition:
 Sum of all wait time values during the monthly reporting period divided by the total number of values.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Adult Wait Time : *Excludes Psych, Pediatric, Observation Unit, and Jail patients

Total ED Wait time: *Excludes Psych, Observation Unit, and Jail patients

September '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: September 2013

Indicator #2 - Emergency Department Metrics

2d.
Left Without Being Seen (LWBS)

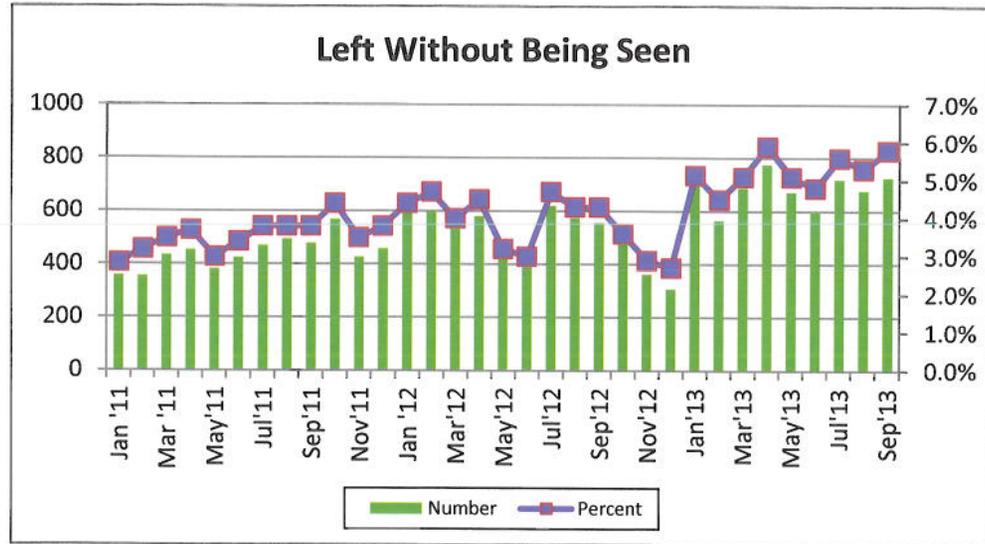

***Harris Rodde Indicator**

LWBS:
 The total number of patients who left the ED without being seen by a physician reported as a percentage of all ED visits.

Calculation:
 The total number of patients who left the ED without being seen divided by the total number of ED patient visits on a monthly basis.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

September '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: September 2013

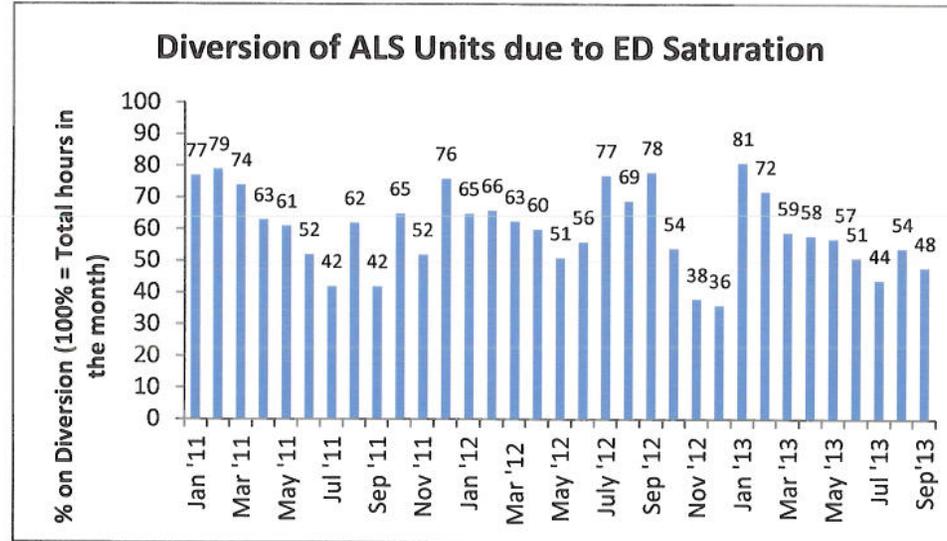

Indicator #2 - Emergency Department Metrics

**2e.
ED
Diversion**

ED Diversion:
 A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:
 The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
 ReddiNet

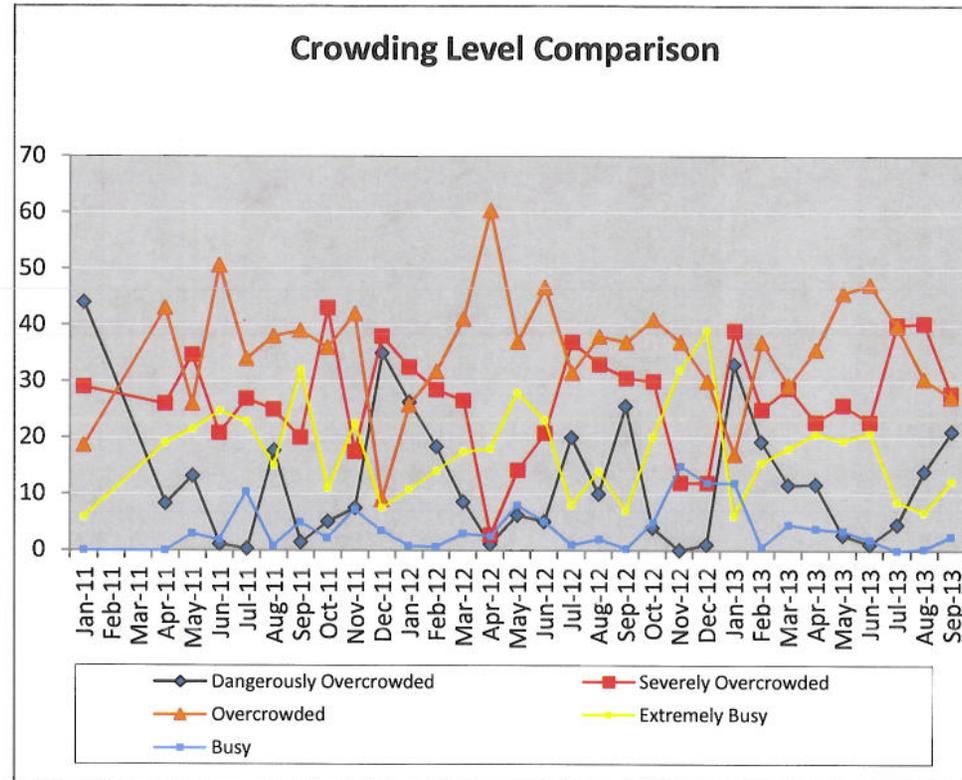

Key points:

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

Indicator #3 – Trends for Patient Diversions and Transfers & #4 – Transfers to Rancho Los Amigos Metrics

3. & 4.
Rancho Los Amigos Hospital (RLAH) Transfers

Transfers:
 The volume of patients transferred to RLAH for acute hospitalization from the Emergency Department and from Inpatient Units.

Data Source:
 Manual record keeping.

Cancelled category includes patients whose condition changed leading to higher level of care or discharge home.

Month of September '13

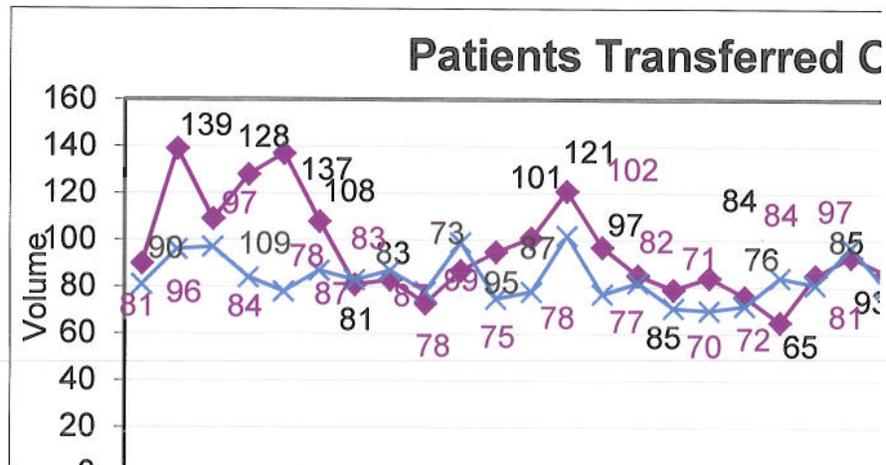

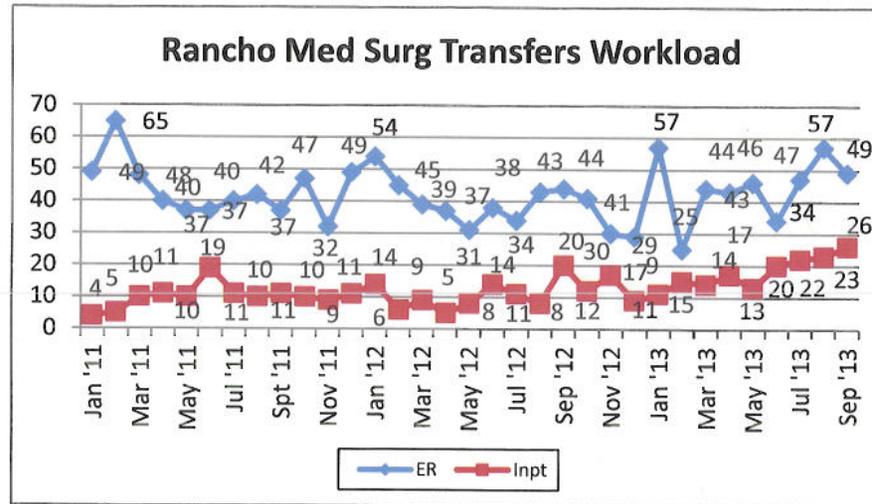

Referrals from ER:

	Med/Surg	Acute Stroke	Total
# Met transfer criteria	25	NA	-
# Referred to RLAH	25	24	49
# Transfers	25	24	49
# Denied	0	NA	-
# Cancelled	0	NA	-
# Patients Refused of Those Cancelled	0	NA	-

Referrals from Inpatients:

	Med/Surg	Acute Stroke	Total

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: September 2013

Indicator #5 – Harris Rodde Indicators

5.

Average Length of Stay (ALOS)

LOS:
 The difference between discharge date and the admission date or 1 if the 2 dates are the same.

Total LOS:

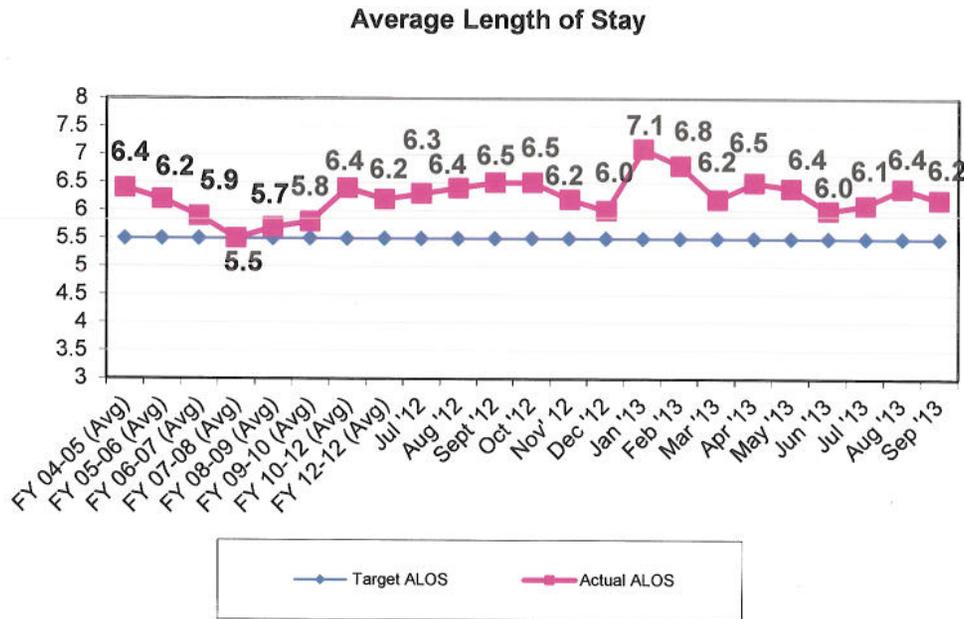

Calculation:
 ALOS is the arithmetic mean calculated by dividing the Total LOS by the Total # of discharges in the monthly reporting period, rounded off to one decimal place.

***Harris Rodde Indicator**

Source of Data:
 Affinity

Target: <5.5 days

***Medical Center (New Facility + Psychiatric Hospital) ALOS - Preliminary data pending Auditor-Controller validation**

The increasing length of stay observed in January and February is largely attributed to the discharge of several patients with extended lengths of stay. In September 2013, this includes 1 patient who was discharged with LOS > 100. Without the effect of this 1 patient, ALOS would have been 6.1 rather than 6.2.

*As of July 2010 with the consolidation of Ingleside and Hawkins, all psychiatric services are now included.

SUBJECT: **STATUS REPORT ON KEY INDICATORS OF PROGRESS, HOSPITAL OPERATIONS, AND OTHER ISSUES RELATED TO THE TRANSITION TO THE NEW LAC+USC MEDICAL CENTER – PROGRESS REPORT #94**

Mitchell H. Katz, M.D.
Director

Hal F. Yee, Jr., M.D., Ph.D.
Chief Medical Officer

Christina R. Ghaly, M.D.
Deputy Director, Strategic Planning

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of October 2013.

Census Trending (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of October was 543 out of 676 licensed beds, an estimated 79% utilization rate (81% occupancy). The census for Medical/Surgical units was an estimated 89% utilization rate (91% occupancy) for October 2013.

Emergency Department (ED) Indicators

The attachment demonstrates a decrease in the average daily census (ADC), ED boarding times, ED wait times, and the rate of patients who left without being seen (LWBS) in comparison to September 2013. The number of patients transferred out for this period was stable. The Dangerously Overcrowding Level Comparison for October 2013 was 3.8% compared to 21% in September 2013.

If you have any questions or need additional information, please contact me or Dan Castillo, LAC+USC Chief Executive Officer, at (323) 409-2800.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: October 2013

Indicator #1 – Trends in Average Daily Census and Hospital Operations Metrics

1b.
Occupancy Rate
LAC+USC
Medical
Center

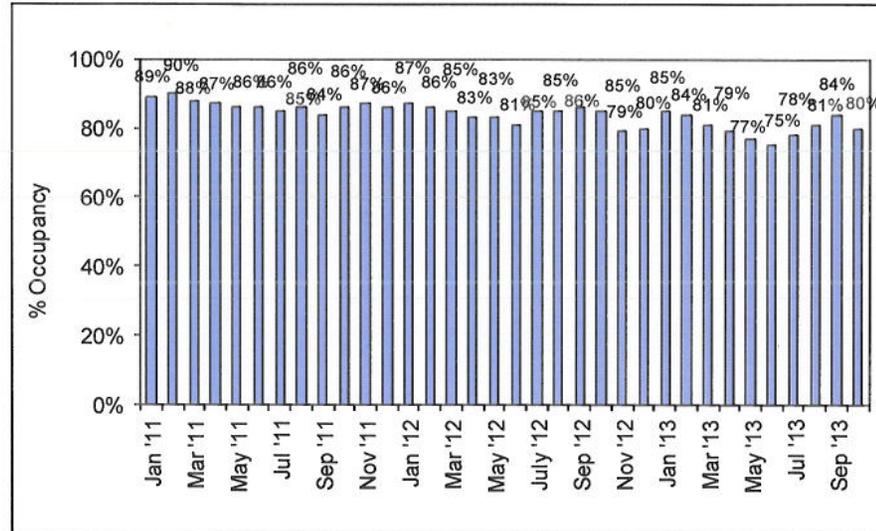

Definition:
 A measure of the usage of the licensed beds during the reporting period that is derived by dividing the patient days in the reporting period by the licensed bed days in the reporting period.

Calculation:
 The total number of admitted inpatients at 12:00 AM midnight, including women in labor, may include normal newborns and psychiatric inpatients divided by licensed or budgeted beds.

Source of Data:
 Affinity

Target:
 95%

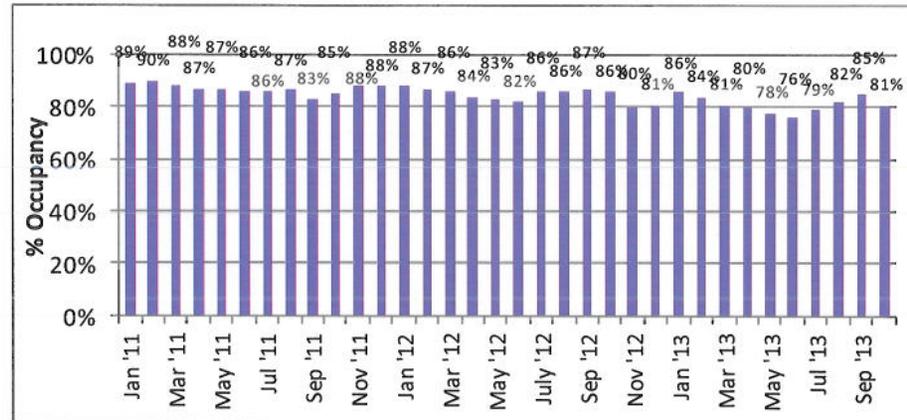

Medical Center Licensed Occupancy Rate (excluding Newborns) = $\frac{\text{Med Center Census} - \text{Newborns}}{600}$

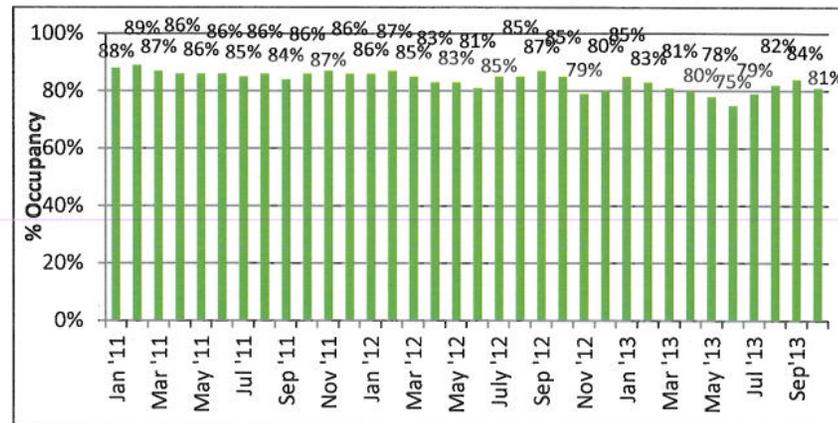

For comparison, occupancy rates reported in the old facility were reported including newborns and were based on budgeted beds.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: October 2013

Medical Center Licensed Occupancy Rate (including Newborns) **Med Center Census/600**

Medical Center Budgeted Occupancy
Med Center Census + Newborns + Psych Hosp Census / 676

Medical Center = New Facility + Psychiatric Hospital

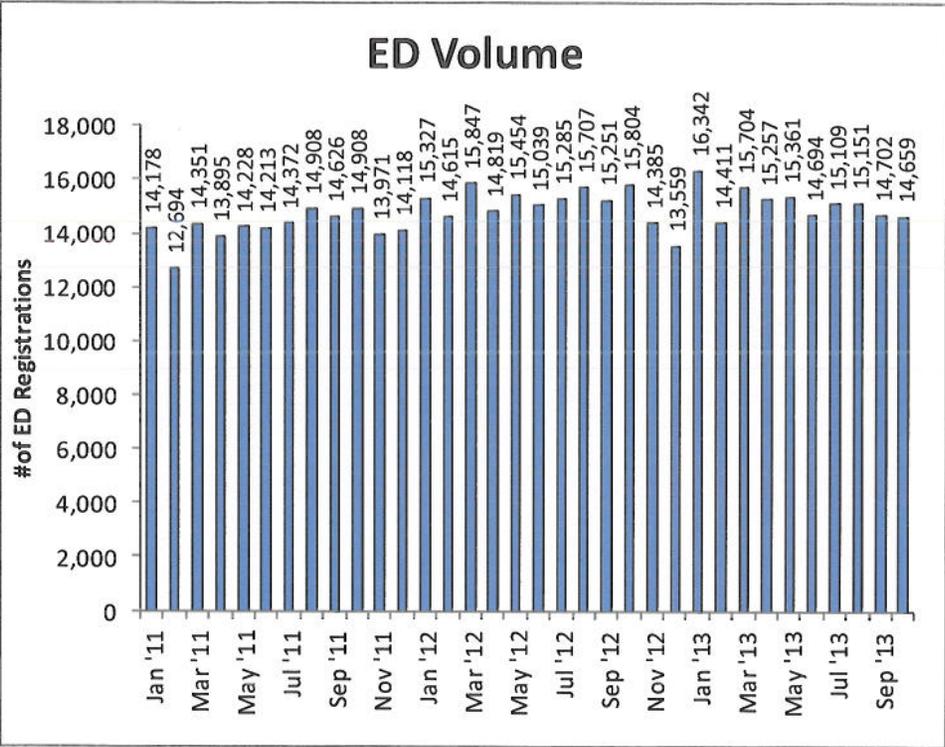

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: October 2013

Indicator #2 - Emergency Department Metrics

2a.
ED
Volume

ED Volume:
 Measured by total number of Emergency Department patient registrations.

Source of Data:
 Affinity

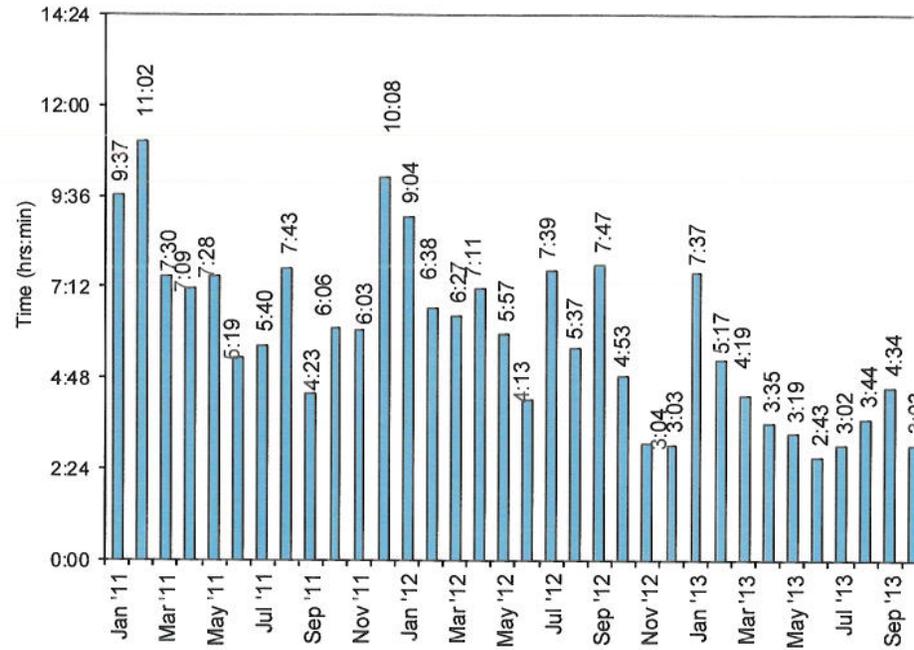

The annual total ED volume for FY 10-11 was 164,700 which increased to 178,004 in FY 11-12. ED volume for FY 12-13 was 181,760 which surpassed the FY 11-12 amount.

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: October 2013

<p>2b. Median Emergency Department Boarding Time (EDBT)</p> <p>*Harris Rodde Indicator</p>	<p>Boarding Time: Time from MD Admit time (effective date and time of pre-admit) to time the patient actually leaves the ED en route to assigned bed (effective date and time of the ED disposition).</p> <p>Calculation: The middle value in the set of individual boarding times for the month arranged in increasing order. If there is an even number of values, then the median is the average of the middle two values.</p> <p>Source of Data: Affinity</p> <p>Target: Less than 7 hours.</p>	<p align="center">Median EDBT</p> <table border="1"> <thead> <tr> <th>Month</th> <th>Adult (hr:mm)</th> <th>Peds (hr:mm)</th> <th>Total (hr:mm)</th> </tr> </thead> <tbody> <tr><td>Jan '11</td><td>9:36</td><td>2:08</td><td>7:41</td></tr> <tr><td>Feb '11</td><td>11:22</td><td>2:23</td><td>8:36</td></tr> <tr><td>Mar '11</td><td>7:27</td><td>2:04</td><td>6:03</td></tr> <tr><td>Apr '11</td><td>7:09</td><td>2:00</td><td>6:10</td></tr> <tr><td>May '11</td><td>7:28</td><td>1:50</td><td>4:40</td></tr> <tr><td>Jun '11</td><td>7:43</td><td>1:54</td><td>6:45</td></tr> <tr><td>Jul '11</td><td>7:43</td><td>2:03</td><td>5:19</td></tr> <tr><td>Aug '11</td><td>7:28</td><td>2:06</td><td>4:00</td></tr> <tr><td>Sep '11</td><td>10:08</td><td>1:49</td><td>4:23</td></tr> <tr><td>Oct '11</td><td>8:25</td><td>2:07</td><td>6:06</td></tr> <tr><td>Nov '11</td><td>9:04</td><td>2:12</td><td>5:26</td></tr> <tr><td>Dec '11</td><td>7:11</td><td>2:26</td><td>6:41</td></tr> <tr><td>Jan '12</td><td>7:11</td><td>2:04</td><td>5:20</td></tr> <tr><td>Feb '12</td><td>7:08</td><td>2:01</td><td>4:13</td></tr> <tr><td>Mar '12</td><td>7:47</td><td>2:05</td><td>3:42</td></tr> <tr><td>Apr '12</td><td>7:37</td><td>2:13</td><td>4:58</td></tr> <tr><td>May '12</td><td>6:28</td><td>2:06</td><td>3:04</td></tr> <tr><td>Jun '12</td><td>5:17</td><td>2:19</td><td>4:57</td></tr> <tr><td>Jul '12</td><td>4:19</td><td>2:12</td><td>3:03</td></tr> <tr><td>Aug '12</td><td>3:19</td><td>1:47</td><td>2:57</td></tr> <tr><td>Sep '12</td><td>3:44</td><td>1:52</td><td>3:19</td></tr> <tr><td>Oct '12</td><td>3:00</td><td>1:54</td><td>3:28</td></tr> <tr><td>Nov '12</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>Dec '12</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>Jan '13</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>Feb '13</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>Mar '13</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>Apr '13</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>May '13</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>Jun '13</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>Jul '13</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>Aug '13</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> <tr><td>Sep '13</td><td>3:03</td><td>1:52</td><td>2:52</td></tr> </tbody> </table> <p>October '13 data is preliminary data</p>	Month	Adult (hr:mm)	Peds (hr:mm)	Total (hr:mm)	Jan '11	9:36	2:08	7:41	Feb '11	11:22	2:23	8:36	Mar '11	7:27	2:04	6:03	Apr '11	7:09	2:00	6:10	May '11	7:28	1:50	4:40	Jun '11	7:43	1:54	6:45	Jul '11	7:43	2:03	5:19	Aug '11	7:28	2:06	4:00	Sep '11	10:08	1:49	4:23	Oct '11	8:25	2:07	6:06	Nov '11	9:04	2:12	5:26	Dec '11	7:11	2:26	6:41	Jan '12	7:11	2:04	5:20	Feb '12	7:08	2:01	4:13	Mar '12	7:47	2:05	3:42	Apr '12	7:37	2:13	4:58	May '12	6:28	2:06	3:04	Jun '12	5:17	2:19	4:57	Jul '12	4:19	2:12	3:03	Aug '12	3:19	1:47	2:57	Sep '12	3:44	1:52	3:19	Oct '12	3:00	1:54	3:28	Nov '12	3:03	1:52	2:52	Dec '12	3:03	1:52	2:52	Jan '13	3:03	1:52	2:52	Feb '13	3:03	1:52	2:52	Mar '13	3:03	1:52	2:52	Apr '13	3:03	1:52	2:52	May '13	3:03	1:52	2:52	Jun '13	3:03	1:52	2:52	Jul '13	3:03	1:52	2:52	Aug '13	3:03	1:52	2:52	Sep '13	3:03	1:52	2:52

Operational Monitoring Report
Reporting Period: October 2013

Median Boarding Time (Adult)*

October '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: October 2013

Indicator #2 - Emergency Department Metrics

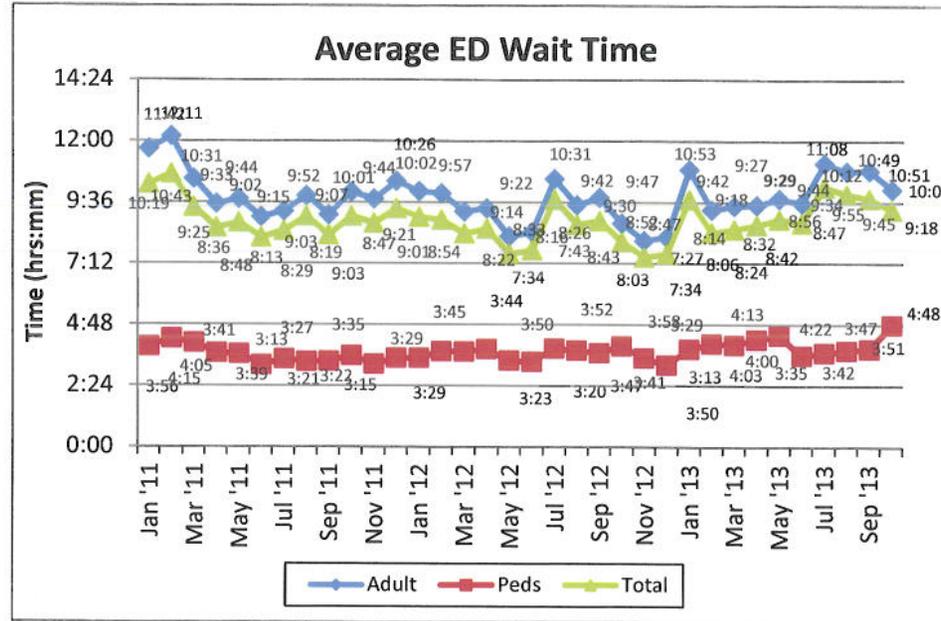

2c.
ED Wait Time

ED Wait Time:
 Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

Definition:
 Sum of all wait time values during the monthly reporting period divided by the total number of values.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

Adult Wait Time : *Excludes Psych, Pediatric, Observation Unit, and Jail patients

Total ED Wait time: *Excludes Psych, Observation Unit, and Jail patients

October '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: October 2013

Indicator #2 - Emergency Department Metrics

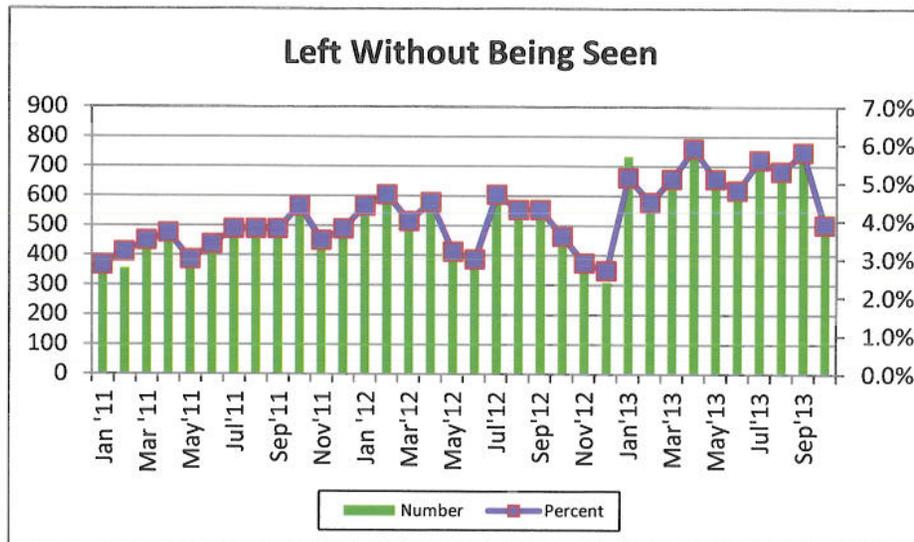

2d.
Left Without Being Seen (LWBS)
***Harris Rodde Indicator**

LWBS:
 The total number of patients who left the ED without being seen by a physician reported as a percentage of all ED visits.

Calculation:
 The total number of patients who left the ED without being seen divided by the total number of ED patient visits on a monthly basis.

Source of Data:
 Affinity

Target:
 No target value.
 Lower numbers are better.

October '13 data is preliminary data

LAC+USC Medical Center
Operational Monitoring Report
Reporting Period: October 2013

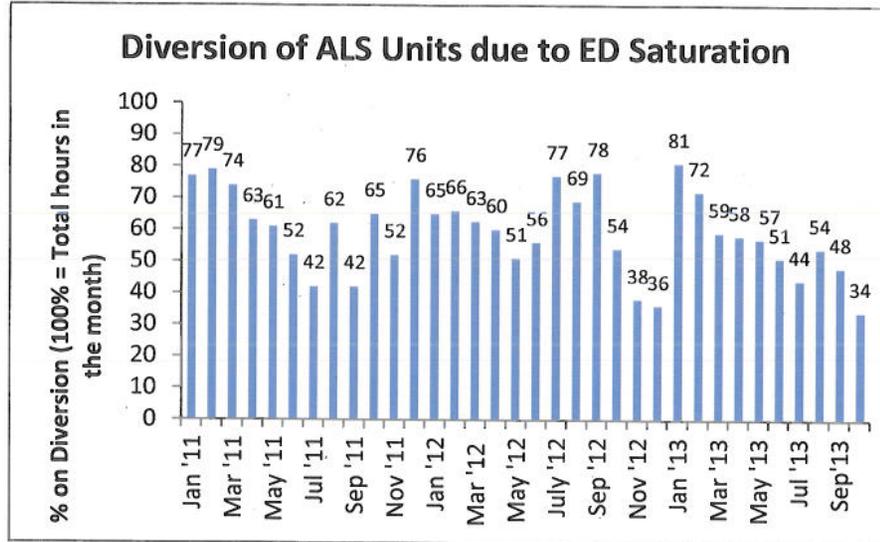

Indicator #2 - Emergency Department Metrics

**2e.
ED
Diversion**

ED Diversion:
 A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

Calculation:
 The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

Source of Data:
 ReddiNet

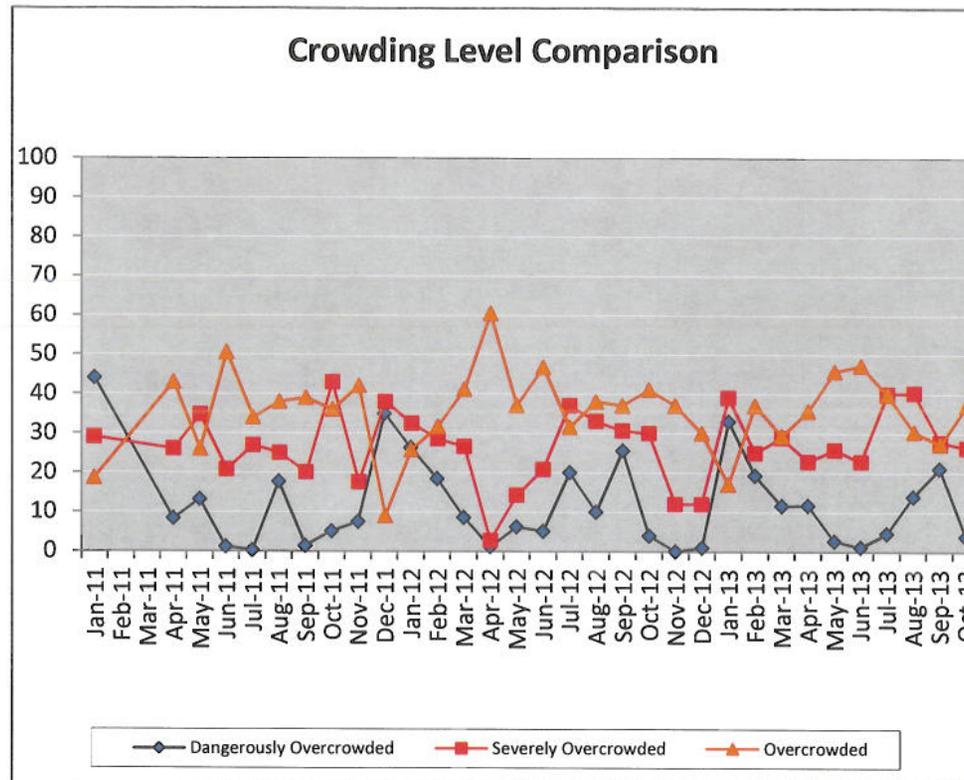

Key points:

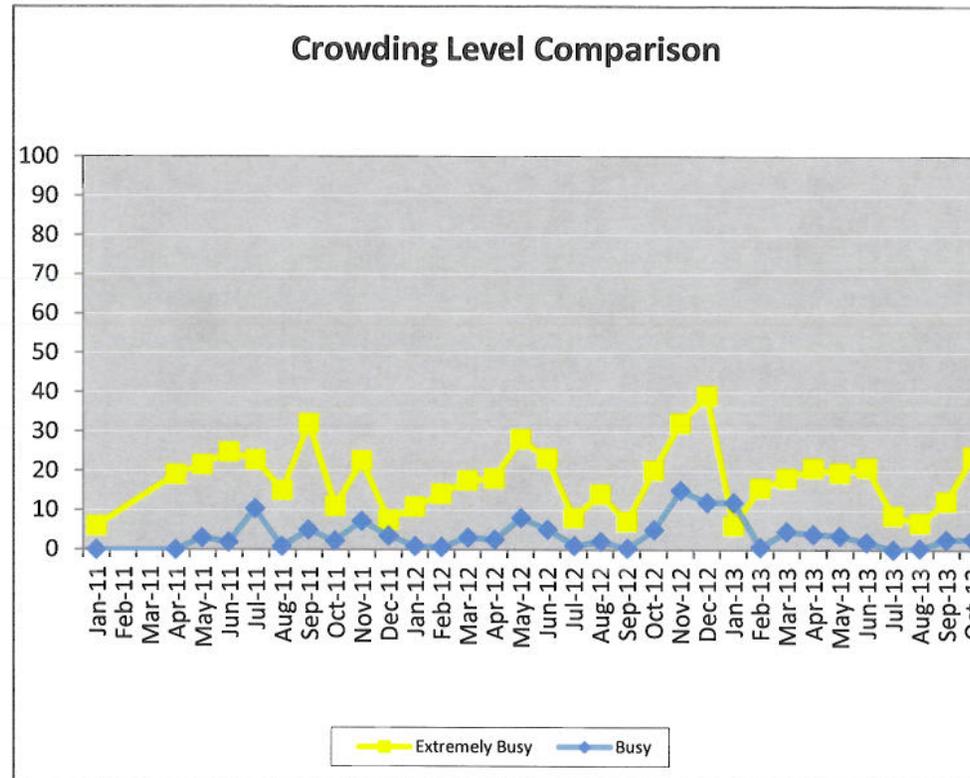

- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.
- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".

Indicator #3 – Trends for Patient Diversions and Transfers & #4 – Transfers to Rancho Los Amigos Metrics

3. & 4.
Rancho Los Amigos Hospital (RLAH) Transfers

Transfers:
 The volume of patients transferred to RLAH for acute hospitalization from the Emergency Department and from Inpatient Units.

Data Source:
 Manual record keeping.

Cancelled category includes patients whose condition changed leading to higher level of care or discharge home.

Month of October '13

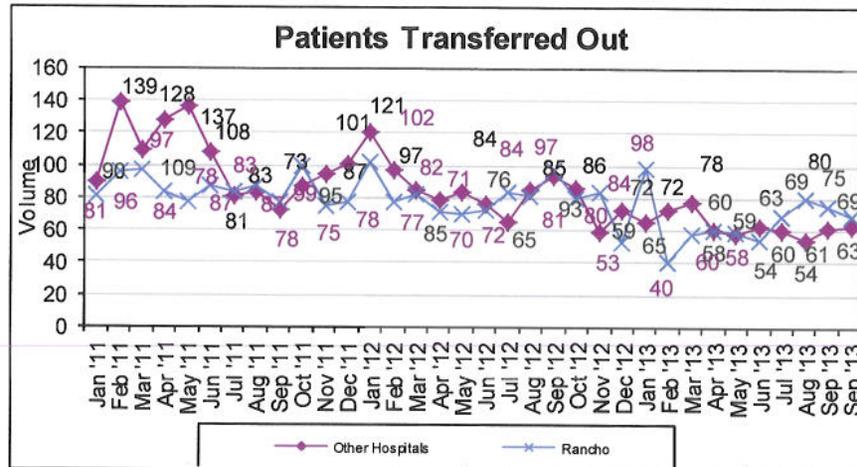

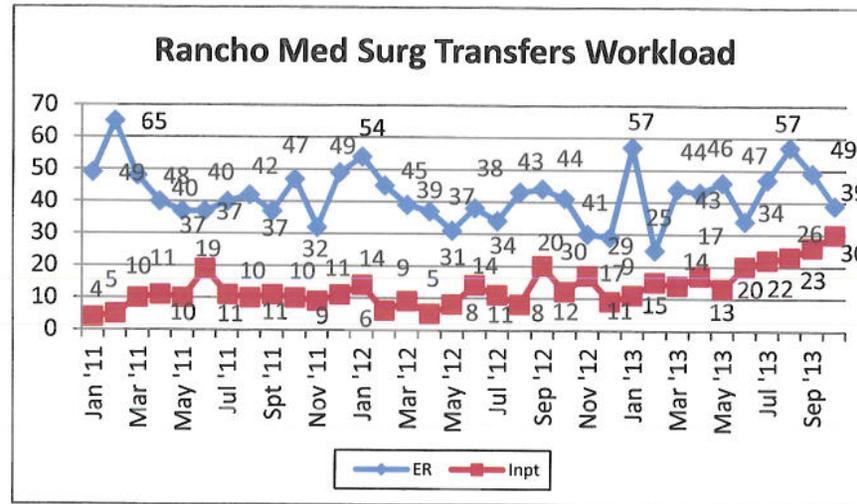

Referrals from ER:

	Med/Surg	Acute Stroke	Total
# Met transfer criteria	21	NA	-
# Referred to RLAH	21	18	39
# Transfers	21	18	39
# Denied	0	NA	-
# Cancelled	0	NA	-
# Patients Refused of Those Cancelled	0	NA	-

Referrals from Inpatients:

Indicator #5 – Harris Rodde Indicators																																																			
<p>5.</p> <p>Average Length of Stay (ALOS)</p> <p>*Harris Rodde Indicator</p>	<p>LOS: The difference between discharge date and the admission date or 1 if the 2 dates are the same.</p> <p>Total LOS:</p> <p>Calculation: ALOS is the arithmetic mean calculated by dividing the Total LOS by the Total # of discharges in the monthly reporting period, rounded off to one decimal place.</p> <p>Source of Data: Affinity</p> <p>Target: <5.5 days</p>	<p align="center">Average Length of Stay</p> <table border="1"> <caption>Actual ALOS Data Points</caption> <thead> <tr> <th>Reporting Period</th> <th>Actual ALOS</th> </tr> </thead> <tbody> <tr><td>FY 04-05 (Avg)</td><td>6.4</td></tr> <tr><td>FY 05-06 (Avg)</td><td>6.2</td></tr> <tr><td>FY 06-07 (Avg)</td><td>5.9</td></tr> <tr><td>FY 07-08 (Avg)</td><td>5.5</td></tr> <tr><td>FY 08-09 (Avg)</td><td>5.7</td></tr> <tr><td>FY 09-10 (Avg)</td><td>5.8</td></tr> <tr><td>FY 10-11 (Avg)</td><td>6.4</td></tr> <tr><td>Jul '12</td><td>6.2</td></tr> <tr><td>Aug '12</td><td>6.4</td></tr> <tr><td>Sept '12</td><td>6.5</td></tr> <tr><td>Oct '12</td><td>6.5</td></tr> <tr><td>Nov '12</td><td>6.2</td></tr> <tr><td>Dec '12</td><td>6.0</td></tr> <tr><td>Jan '13</td><td>7.1</td></tr> <tr><td>Feb '13</td><td>6.8</td></tr> <tr><td>Mar '13</td><td>6.2</td></tr> <tr><td>Apr '13</td><td>6.5</td></tr> <tr><td>May '13</td><td>6.4</td></tr> <tr><td>Jun '13</td><td>6.0</td></tr> <tr><td>Jul '13</td><td>6.1</td></tr> <tr><td>Aug '13</td><td>6.4</td></tr> <tr><td>Sep '13</td><td>6.2</td></tr> <tr><td>Oct '13</td><td>6.4</td></tr> </tbody> </table> <p align="center"> ◆ Target ALOS ■ Actual ALOS </p> <p>*Medical Center (New Facility + Psychiatric Hospital) ALOS - Preliminary data pending Auditor-Controller validation</p>	Reporting Period	Actual ALOS	FY 04-05 (Avg)	6.4	FY 05-06 (Avg)	6.2	FY 06-07 (Avg)	5.9	FY 07-08 (Avg)	5.5	FY 08-09 (Avg)	5.7	FY 09-10 (Avg)	5.8	FY 10-11 (Avg)	6.4	Jul '12	6.2	Aug '12	6.4	Sept '12	6.5	Oct '12	6.5	Nov '12	6.2	Dec '12	6.0	Jan '13	7.1	Feb '13	6.8	Mar '13	6.2	Apr '13	6.5	May '13	6.4	Jun '13	6.0	Jul '13	6.1	Aug '13	6.4	Sep '13	6.2	Oct '13	6.4	<p>The increasing length of stay observed in January and February is largely attributed to the discharge of several patients with extended lengths of stay. In October 2013, this includes 7 patients who were discharged with LOS > 100. Without the effect of these 7 patients, ALOS would have been 6.1 rather than 6.4.</p> <p>*As of July 2010 with the consolidation of Ingleside and Hawkins, all psychiatric services are now included.</p>
